Notice. Station WSVS verifies all report that contain a stamped envelope or card. This is made possible by your Secretary John Kalmbach. On their last Frequency Check he was the announcer. Listen in to their next frequency check which falls on Friday February 14 1941. All reports must be sent to station WSVS. They are then turned over to John who sees that they are correct and if so issues a verification. This is authorized by station WSVS. After he sends out the verifications he must return the reports to the station. Up until now the staff at WSVS has been very small and besides operating the station they have to teach classes and therefor made it impossible for them to verify. John hopes that a great many of you members will report to WSVS often. Next months check will be dedicated to all Radio Clubs. WSVS tests from 3:00-3:15 am and is one of the very few 50 watt stations that is left in the U.S.

DONT FORGET TO TUNE WTAM ON SATURDAY NIGHTS FROM 11:15-11:30PM for TIPS.

QUESTION & ANSWER DEPARTMENT

Who are the French Speaking Stations on 12.125mc at 6PM; 12.800mc from 7-8PM & on 9.950mc at 8PM? All have strong signals but heavy background noise like FZI (Alfred) TPZ 12.130mc at Alger, Algeria operates from 2-3am & 2-6PM Fred. Can anyone help on other frequencies? (Editor)

George Cryder logged FZI French Equatorial Africa on 25mts at 3:30PM.

During the holidays receiving conditions were quite hopeless. A checkup of the records reveals that this condition in SW reception has always been poor during this part of the year. Of course this is merely a coincidence but it discourages those new buyers of SW receivers who want to tune the world and find that they cant hear a thing. Many forget about SW DX after their failure at the first attempt.

Here is a coming tip which is expected to take place for the duration of the split French Government. Pro-anti sides. In many cases frequencies are not assigned as yet and in two cases the call is still undesided. Might be a few others, as not received all data as yet.
