From MT's Rachel Baughn ... "Monitoring Times", the full-spectrum radio hobby magazine out of Brasstown, North Carolina, is a great outlet for sharing your radio knowledge. MT is currently soliciting feature and technical articles for 2009. If you're wondering, 'But what would I write about?', MT has recently posted a starter list of around 136 suggested topics to get your thinking started at <www.monitoringtimes.com/html/List_of_Topics.html>. These ideas may be altered, embellished, added to, etc. Give us your best pitch at editor@monitoringtimes.com. Or write Editor Rachel Baughn, 740 Hwy 64 West, Brasstown, NC 28902.

Unfilled positions ... We're still in need of volunteers for the following positions: a DXN publisher, ASAP; replacement editors for languished columns ("The Answerman" and "Memory Dredg-

ing"), and one or more persons to edit future NRC publications developed by contributors or the club.

CALL LETTER CHANGES

	<u>Old Call</u>		<u>New Call</u>
890	WVOF	GA Lithia Springs [has a CP from 1000 at Walhalla, SC]	WJTP
1400	WKXI	MS Jackson	WJQS
1490	KBKO	CA Santa Barbara	KIST

CPs ON THE AIR

1130	WACQ	AL Carrville - CP for D1 25000/0 CH 1000 is on, increasing day power and adding the CH designation.
1230	KLAV	NV Las Vegas - CP for U1 1000/1000 moving to a new tower site at N36-12-52 W115-09-18 is on the air. KLAV had been operating at 500 Watts from a longwire antenna since February.
1230	KBCQ	NM Roswell - CP for U1 620/1000 is on the air.
1320	WBOB	FL Jacksonville - CP for U2 50000/5000 is on (heard in Finland!).
1490	KEYG	WA Grand Coulee - CP for U12 1000/960 is on.
1530	KVOG	GU Agana - CP for this new station with U1 250/250 at N13-27-24 W144-40-20 is on the air.

ACTIONS

560	WGAN	ME Portland - Coordinate correction to N43-41-24 W70-19-05.
930	WSFZ	MS Jackson - CP granted for U2 3800/3100, moving to the transmitter site of WOAD-1300 at N32-23-12 W90-09-47, and adding two new towers to the WOAD site. Because WOAD's single tower is substantially taller than those at the current site, WSFZ is forced to decrease their power to the new levels to cover the same area.
1150	WSNW	SC Seneca - Coordinate correction to N34-41-15 W82-59-16.
1190	WAGE	VA Leesburg - CP granted to move here (from 1200) with U4 50000/1300. As near as I can figure out from assorted documents, all of which come to different conclusions, WAGE moves to 1190 and WBIS-1190 goes off, surrendering its license. WAGE will build three new towers at its current site for daytime operation and utilize the current WBIS 4-tower site for nighttime operation.
1190	WSDE	NY Cobleskill - CP granted for U1 1000/20, adding night service.
1230	KXLO	MT Lewistown - Coordinate correction to N47-04-16 W109-24-32.
1570	WECU	NC Winterville - CP granted for U1 8000/200.

AMENDMENTS TO APPLICATIONS

1200	NEW	CA Desert Hot Springs - Initial application was for U1 1000/1000. This amendment requests U4 1400/1200 on 1220 kHz.

FROM THE VAST WESTLAND

Ed Soule from Hampton Cove, Alabama (Huntsville area) checks in this week with news of a Decatur AL area format change (see "Station News" 1310 below). Great to hear from you, Ed!

There is some great reading below, thanks to our fine group of reporters. This column is being assembled the week before Halloween. In honor of the occasion, I have been hard at work DXing the graveyard frequencies. The result has been two new stations added to my logbook (see "Regular Loggings" 1490 below)! At this rate, by the fourth Thursday in November I should have many more new ones to be thankful for! You can follow my progress in future columns. Won't you please join me by sending in your loggings? 73 **Bill**

Station News

- 630 KFXD ID Boise.** Per *Idaho Radio News*, station dropped C&W 10/13 and started airing news-talk using the KIDO (580 Nampa ID) "brand name." According to *IRN*, "...additional KIDO branded radio programming will be heard on AM 630 and kidoam.com.... AM 630 will continue to feature long time popular local hosts Jon Duane and Chris Kelly along with a significant increase in local news, sports, traffic, weather, and BSU programming all produced in house by the KIDO news and sports departments. Additional programming under the KIDO umbrella along with specific show times will be announced this Friday, October 10th. KIDO AM 580 or AM 630 will be the only radio stations in Boise to feature live and local news, talk, and sports programming throughout the day." Also, KFXD will relay some Boise State play-by-play from KIDO. (DP-HI)
- 770 KKOB(SX) NM Santa Fe. 10/28.** Noted an interesting problem for KKOB while on our way out of Santa Fe Tuesday morning, where we'd spent the night with a brother-in-law on our way back from Arizona. A dominant cyclical sound from what appeared to be a sub-audible heterodyne, presumably from the synchronized 230-watt transmitter on the west side of Santa Fe (NRC log says night-time only, but FCC data base shows as unlimited). I counted the cycles ... 120 in 60 seconds, indicating, if my fuzzy understanding of SAHes is accurate, that the Santa Fe transmitter and the Albuquerque transmitter are 2 Hz off. It was extremely annoying, and carried as far south as milepost 277 on US 285, about 25 miles from the Santa Fe transmitter. I had heard a similar effect 25 to 30 years ago when I was at WMIX 940. Weather knocked off the daytime

transmitter, and we switched to the night-time facility. When the power went back on at the daytime transmitter site, the combination gave the same cyclical, wobbling effect. My SAH assumption, though, may be wrong, if the effect was caused by the difference in distance between the two transmitters. Engineering knowledgeable people may set me straight on this. The bottom line, though, would seem to be that the product of the two transmitters would make KKOB's programming unusable within a 25-mile radius of the Santa Fe transmitter. **(QRM-NM)**

1130 KPHI HI Honolulu. 10/2 0017. New facility noted on the air (which changed callsign from KRUD 9/25 per FCC) while in the car, booming in with Filipino pop music in EE. However when I got home, signal was so weak I needed the loop to boost it (by comparison, KAOI-1110 on Maui was just fine without the loop). Noted at 0257 with ad in Japanese, woman talking over song "C'est la Vie" by Robbie Nevil, into AC pop without an ID. Heard partial ID 10/3 0030 "AM 11-? and FM 1-Oh-1-Point-5," confirming that the programming of KORL had moved to 1130, leaving 1180 silent. FCC had approved switching of powers between 1130 and 1180, with 1130 rising to 1 kW and 1180 falling to 330/140 watts (necessitating 1180 to get a relay via an FM translator). Heard woman mentioning "KPHI AM 11-30 and FM 101.5" during Filipino program on 10/4 at 2317, and confirmed FM is // 1130 on 10/5 at 0150. PD confirmed 10/8 that KORL has indeed moved to 1130 and became KPHI. Noted Wednesday nights with techno trance music show. **(DP-HI)** (The KORL CP that Dale refers to, changing its power from U1 1000/1000 to U1 330/140, also changes its frequency from 1180 kHz to 1170. **Ed.-WI)**

1290 KOWB WY Laramie. 10/14 2100. Ending Wyoming Cowboy football show. "You're listening to KOWB 1290 Laramie and 95.1 KCGY Laramie-Cheyenne" to Fox news. This one adds the FM /. **(WH-CO)**

1310 WQAH AL Priceville. This station is now oldies all the time, ex-gospel/religious. I have been listening off and on for a couple weeks since a recent visit to Decatur. There are no local announcements and no indication of satellite feed origin either. Only ID happens around 10 and 40 minutes after the hour as "The Tennessee Valley's Oldies Station, Oldies 1310 WQAH Priceville-Decatur-Huntsville." Heard no commercials at all until 10/29 when I heard one for the first time. This one might be confused with WDOD 1310 Chattanooga, also doing oldies from True Oldies Channel. **(ES-AL)**

1640 KDIAt CA Vallejo. 10/5 0157. Tentative. End of Christian program with man giving postal and e-mail addresses (mentioned "P.O. Box 7019," which corresponds to "Search the Scriptures Daily" from Bend OR); faded out before legal ID. Poor; heavy local QRM at the Waialae-Kahala post office. Not KGU 760 (which runs "Adventures in Odyssey"), even though 1640 is a mixing product channel of KGU and co-owned KHCM 880. **(DP-HI*)**

- 1090 KPTK WA Seattle. 10/14 0257. University of Phoenix ad, PSA by "The Credit Fairy"; clip of woman criticizing President Bush, ID "KPTK Seattle," AP Radio news with Brian Thomas; two minutes ahead of its webstream. Fair to poor; ripple fading. (DP-HI)
- 1110 KJSA TX Mineral Wells. 10/27 0900. Gal says "This is the Biz Radio Network," then guy says "Biz Radio 1110 KJSA Mineral Wells-Fort Worth." - NIGERIA:** 917 *R.Gotel*, Yola, is being widely heard as a heterodyne beat with 918 kHz in Europe. Very little information on it and no website or contact address. If you google "Radio Gotel Yola" there's a reference to the transmitter having been stolen from elsewhere! Station closes at 2300 UTC each night but some east coast DXers might hear it especially the whistle (het). Supposed to be 50 kW. It can sometimes be off air unexpectedly! Priest Pond, Prince Edward Island DXpedition

Chris Black N1CP (Icom 756 Pro II, Icom R-75, Flag, 400+ ft wire), Brent Taylor VY2HF (Icom R-75 with Kiwa mods, Flag, two Ewe antennas), Phil Rafuse, Geoff Rivett, Niel Wolfish (AOR 7030, Ewe)

Chris Black

I spent three very enjoyable days at the North Shore Priest Pond cottages in PEI (46°28.903'N 62°11.499'W) with Brent Taylor (who organized the event), Niel Wolfish, Phil Rafuse and Goeff Rivett. It was definitely the most fun you can have with your clothes on!

Brent, Niel and I arrived Monday October 13 and Brent and Niel set up a Ewe while I ran out about 400 feet (of a 1000 ft spool) in an easterly direction along the bluff and just dropped the spool. I ran about 30 feet of coax out to a magnetic longwire balun with no ground and connected the wire. It was getting dark and I didn't have time to set up the portable Flag and we wanted to start DXing. This antenna is referred to as "ant 1" in my logs.

The plan was to DX TAs from a couple hours before sunset until too tired to go any more and then get up about 4 a.m. to try for the west. I actually got KNX early Tuesday morning on the back end of my make-shift WOG (wire on ground).

I had planned to bring the SDR-IQ as well as the Icom 756 Pro II and the R-75, but a test at home revealed that the IQ would not work with my laptop, so just brought the Icoms. I had also planned to use the laptop with all its resources, rig control software for the Icoms and Total Recorder, so didn't bring much in the way of hard copy resources. It turned out that the laptop caused QRM to the radios (we think something funky with the wiring or bad grounding in the cottage because I have no problems with the laptop at home) so I was reduced to DXing 'nekkid' with pen and paper. This was a real bummer, as I am sure I missed some good catches by not being able to record and it would have been nice to be able to use the recordings to flesh out my logs with details I didn't get "live." As it was, I tried to get everything I could down on paper, so cut me some slack if my logs aren't as robust as they might be. It was fast and furious with so many good signals you were like a deer in the headlights.

Tuesday I set up my portable 20 x 65-ft Flag with a 16:1 transformer at the TA end and a fixed 850 ohm resistor on the back. This is "ant 2" in my logs. Brent left Niel and I Tuesday night while he went to monitor election returns with friends. The flag basically just kicked butt and left the Ewe in the dust. I was getting Saudi "arm-chair" at 1900 UTC on the Flag while Niel was only getting hets on the Ewe.

Wednesday we were joined by Phil and Goeff and another Ewe appeared on the lawn. After fiddling with their Ewes they decided to borrow my Flag so I put them on a two-way splitter. They all raved about the superior performance of the Flag so much that I was afraid they were going to not let me leave as planned on Thursday morning!

What really impressed me in addition to the signal quality and quantity was the lack of IBOC QRM. It was almost like DXing three years ago. We never achieved the Holy Grail of India or Thailand or Japan (we did have some Asian hets) or anything truly miraculous, just a lot of good across-the-band DX, much of which was new for me. Don't know how everybody did here, I would say conditions were not auroral as Latins were not much in evidence.

I will be getting an external 8-10 hour battery for the laptop so I can get back to the 21st Century next time. But you live and learn. The following logs are what I got for my \$600/1600 mile Odyssey. Enjoy.

Brent Taylor

On the morning of 16 October between 1007 and 1012 we noted carriers on 747, 585.5, 1071, 1521 and 1512 kHz. They were not strong enough to extract any audio, but clearly this was not Europe as all of the darkness path was to our west. We tried in vain for signs of carriers 1575 and 1566 also. It seems likely that we had China and Japan way back there somewhere. The 585.5 signal might be easier to identify due to its unique location on the dial. Carriers were sought again on the morning of 17 and 18 October but nothing found.

As with last year in Miscou, loggings of Spain (*RNE*, *SER*, and *COPE*) were simply too numerous to bother with. As usual, we had Arabic loggings on many frequencies where it was simply impossible to tell what we had due to the number of stations on the air from various parts of the Middle East and North Africa. I also did not include loggings of super-regulars such as *TWR* 1467, France 1557, Austria 1476 and Saudi 1521; nor did I bother logging the multiple Cubans all through the dial.
