DX Time Machine

50 years ago ... from the October 22, 1960 *DX News*: Clarence H. Freeman of Clearlake Highlands, CA reported receiving a verification back in 8 days from the KICY-850 (Nome, AK) DX test; according to the QSL, reports were received from Michigan and Ohio.

25 years ago ... from the October 28, 1985 *DX News*: Doug Beard of Springville, IA was "just about as amad" as he could get because the FCC's new agreement with Canada, which replaced NARBA, allowed for no protection of that portion of a Canadian clear-channel station's secondary (skywave) coverage in the United States.

10 years ago ... from the October 23, 2000 *DX News*: John R. Malicky filed his report on the 2000 NRC Convention at Lima, Ohio, with lots of great stories and photos.

CALL LETTER CHANGES

- 930 CJYQ NL St. John's – CP is granted for U5 25000/3500, decreasing their nighttime power while going non-directional and relocating that night transmitter.

This makes two (CHSC St. Catharines and CJUL) Canadian 1220s that have signed off in the past couple of weeks. Could this mean WHKW-Cleveland could open up its tight pattern nulls toward those two cities? Time will tell.
- 1230 KKPC CO Pueblo – Coordinate correction to 38-16-33/10-29-15.
- 1310 WKZD AL Priceville – Coordinate correction to 34-32-24/86-54-15.

HEAR AND THAR

- ⊙ Returning to the airwaves: KGVL-1400 Greenville, Texas returns with Oldies as 14GVL and is no longer // their FM.
- * Reported as Silent: WGAD-930 Rainbow City, Alabama; KZSF-1370 and KSJX-1500, both San Jose, California, are silent after fire destroyed their transmitter site; WCWC-1440 Williamsburg, Kentucky; and CFGT-1270 Alma, Quebec has signed off, moving to 104.5 MHz. After sign-off, AM programming consisted only as a repeated message, read by a male as follows: *Présente à Alma et au Lac Saint Jean est depuis 1954 sur la bande AM, CFGT diffuse maintenant à la fréquence 104,5 FM. Merci de votre fidélité tout au long de ces années. 56 ans*

plus tard, CFGT prend un tout nouveau départ. L'objectif : toujours être la voix d'Alma et du Lac Saint Jean Est. Rendez-vous sur "Planète 104,5", votre nouvelle station RNC média.

- * **DX TIP RECALL:** Al Tobia reports he is no longer hearing a "weak broadcast signal FMing between 510-520 khz", as reported last Issue.
- * **KRKO-1380 Everett, Washington** has been in a battle with the Snohomish County Council over the placement of two towers they want to add to their current array of two to proceed with their upgrade from the current U2 5000/5000 to U2 50000/50000. In order for KRKO to upgrade, one of the stipulations in the application is a environmental impact study of the land where their towers are located. The first hurdle would be for the county council to approve the request to use more of the land where they are located. The council, in a preliminary move, passed its new shoreline rules with a 5-0 vote. The new rules will allow existing AM radio towers and ones with permits already issued to be rebuilt if they are damaged or destroyed. Meanwhile The FCC has requested more environmental analysis on the two towers. New Snohomish County rules for shoreline development will allow existing AM radio towers and ones with permits already issued to be rebuilt if they are damaged or destroyed. The issue had been a point of contention as the County Council prepared its final version of shoreline-management rules that have been in the works for six years. Some feared that overly restrictive rules for rebuilding radio broadcast towers could have encouraged more acts of sabotage such as the September 2009 toppling of two of KRKO's towers. The partnership that built the KRKO towers also is planning two more 199-foot towers at the same location. The FCC has requested more environmental analysis. The council passed the shoreline rules with a 5-0 vote Wednesday. The shoreline regulations are overseen by the state Department of Ecology under the Shoreline Management Act.
- * **Fines: KAPL-1300 Phoenix, Oregon** has been fined \$5600 for failing to file their renewal application in a timely manner and subsequent unauthorized operation after its authorization had expired.
- * **Thanks to Shawn Axelrod and Deane McIntyre.**

Jim speaks: The Flag antenna that **Neil Kazaross** and **Chris Black** helped me set up continues to perform. You can easily see the difference when I toggle from the Flag to the other wires; there's usually nothing. The Flag has less signal overall but does a good job of lifting up the weak signals. On another subject, I am disappointed with Global Tuners. Actually, it's a great project and I use it a lot, but the number of decent MW receivers has diminished since last season. Hopefully more will come back on-line.

Network listings for professional sports play-by-play coverage

There is a web site www.freefootballradio.com that lists for each NFL team, radio stations on the network that stream on the Internet. I am not sure of the source of the information therein, and I am not using that site in my columns, as the site does not list stations that do not stream on the Internet. Also, the URL <http://radiotime.com> has network lists, but I do not know the sources of their lists. I had to use this for three lists that I could not locate elsewhere.

Note that all of these lists are subject to change throughout the season. Also note that some of the web sites have a "Do not reproduce without permission" statement, so I cannot reproduce those lists here. And I am not sure what radiotime.com does with these lists.
