From the Publisher: And here we go for another volume year of *DX News*. We will have as much information about the latest DX targets as our members contribute – and we hope you’ll do your part to make this another successful year for the NRC.

Please check in with your column editors about their deadlines for each issue ... they are aiming to finish their columns every other weekend, getting completed columns in for publication by 2400 ELT on Sunday nights. I’m usually off work on Mondays and so that’s my day to assemble *DX News* and get it to Wayne Heinen for electronic distribution (for those who subscribe in that way) and to the printer.

By the way, as you have probably noticed, we are no longer distributing *DX News* electronically via the bulletin board site, but directly by e-mail. And there’s a bonus AM Switch update over weekends when we don’t publish – with both FCC info and *NRC AM Log* updates. Some reference information that we don’t have space to publish in *DX News* every issue also makes it into the AM Switch updater – so this is a great new feature for the active DXer, available to our electronic subscribers.

From John Wilkins: "The TUDN stations ID as "Tu D-N" (noted on KLSQ-870 this morning). They were carrying a talk segment on immigration, so they're not all sports as the name might indicate."

From *Radio Insight*: ABC Radio rebrands as ABC Audio

"Team – As summer comes to an end and fall approaches, it's time for change both outdoors and here at ABC!

Today, we're making official what has increasingly been done in practice – the use of ABC Audio in place of ABC Radio as our umbrella brand.

"Audio" is a natural evolution of our branding. It says "yes, and..." to the many, growing touchpoints for our journalism and stories. You're all aware of the new platforms entering consumers' lives, from podcast distribution to interactive voice and beyond. ABC Audio recognizes that technology is evolving, but the value of our work remains constant. So this is as much a commitment to our listeners that they will find our storytelling anytime and everywhere, as it is to you that your excellent work will continue to find the audiences it deserves.

And by the way, the power of radio remains critical to our business, as does the ABC News Radio brand within ABC Audio. Our 1,600+ affiliate stations can continue to expect nothing less than the same ABC News Radio products and services that they know and trust. So ABC Audio will house all that we have to offer: our industry-leading heritage news product, ABC News Radio; our new on-demand content team; our Affiliate Solutions group; the growing business development department; our sales integration operation; and our FM entertainment team."

Thanks to Shawn Axelrod, Bill Hale, FCC Database (FCC), John Wilkins (JW), Steve Kennedy (SK), Frank Welch (FW), Paul Snider (PS), Glenn Hauser (GH), and Bruce Conti (BC).

Unreported Domestic Stations

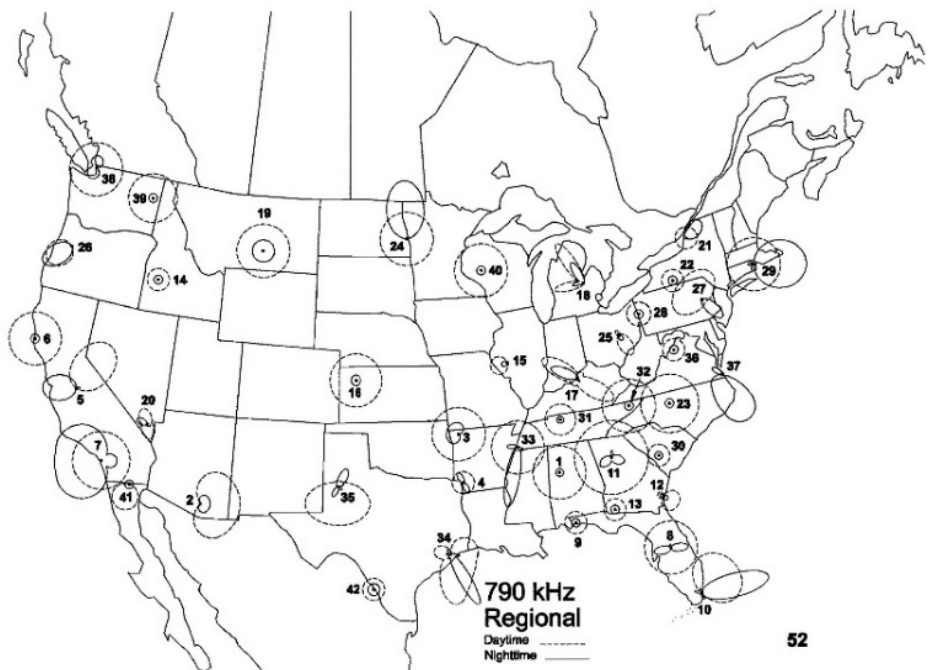

One station – WYEA-1290 – was reported to DDXD this issue for the first time since at least Volume 67 (1999-2000). And we've added new station KENT-1540 to the unreported list ... so our list of currently licensed, full service AM stations in the United States and Canada that have not been reported in that time holds at 340. The last full list was published in Vol. 86 No. 19 ... can you log one and report it to DDXD next time?

Issued September 23, 2019 – For the period September 23-October 19, 2019
<http://www.swpc.noaa.gov/products/weekly-highlights-and-27-day-forecast>

Solar activity is expected to be at very low levels over the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to range from normal to high levels. High levels are expected on 28 Sep - 12 Oct and 14 Oct; moderate levels are expected on 24-27 Sep, 13 Oct, and 15-18 Oct. The remainder of the outlook period is expected to be at normal levels. All enhancements in electron flux are in anticipation of multiple, recurrent CH HSSs.

Geomagnetic field activity is expected to be at quiet to G2 (Moderate) geomagnetic storm levels. G2 levels are expected on 28 Sep followed by G1 (Minor) geomagnetic levels on 29 Sep. Active conditions are expected on 23-25 Sep, 30 Sep and 06 Oct. Unsettled conditions are expected on 26-27 Sep, 01-03 Oct, 10 Oct and 12-15 Oct. The remainder of the outlook period is expected to be at quiet levels. All enhancements in geomagnetic activity are in anticipation of multiple, recurrent CH HSSs.

PAN-AMERICAN DX

- 540 **MEXICO** XETX Nuevo Casas Grandes, Chih. SEP 13 1147 – "La Ranchera de Paquimé, 540 AM" and FM (90.5 listed), canned ID they emit every few minutes from XETX, Nuevo Casas Grandes, Chihuahua, near the frontera, and heard immediately upon tune-in, west/southwest separable from earlier southerly Spanish talk, probably XEWA, unseemed religious like KDFT Ferris, Texas. IRCA Mexican Log says both these XE's are staying on AM. [Hauser-OK]
- 569.94 unID SEP 16 0636 – LAH against 570.0 kHz stations. Nothing listed at mwoffsets. [Hauser-OK]
- 580 **MEXICO** XEMU/XELRDA Piedras Negras, Coah. SEP 7 1157 – Vicente Fernandez song to 1200, then CDT time check, "La Rancherita del Aire" slogan and ID mentioning only XHEMU-FM 103.7 and into news. So, still don't know if they're still XEMU or not. [Wilkins-CO] SEP 13 1149 – Romantic song in Spanish from south/southwest, and no WIBW unless that's causing a SAH. 1200 ID as "La Rancherita del Aire" with new official calls XELRDA to match its slogan, although it's really rebranded XEMU which lost the frequency and then bought it back, still llamando itself "XEMU" though I heard neither call this time. [Hauser-OK]
- 760 **MEXICO** XEABC La Paz, Edo.Mex. SEP 20 1108 – 'Hablando Claro' program or segment with item about something that happened in Mexico 2+ years ago on SEP 19, 2017; with WJR nulled. Of the four 760 Mexicans, most likely XEABC, 70/10 kW with variety format, rather than Chiapas or Jalisco, and surely not Sonora. Searching on that title and XEABC leads to a media directory at Radio – Universidad Autónoma del Estado de México making such a connection. [Hauser-OK]
- 790 **MEXICO** XENT La Paz, BCS SEP 14 1215 – Low audible het looping southwest about the same as KFYO Lubbock. Presumed XENT, as in MW Offsets 789.9586 kHz. No other station anywhere is listed that far below 790 kHz. Nominally 10000/750 watts but IRCA Mexican

Log says "night power seems much higher than 750," and is staying on AM. I also had a definite ID of XENT on 790-, April 11, 2018, after the frequency had been reported at 789.96 by John Wilkins. [Hauser-OK]

- 800 **BONAIRE** PJB *TransWorld Radio*, Kralendijk SEP 15 0144 – Without really trying in tune-across, Spanish mention of rtm.org and Bible talk in strange accent. Dominant on the east/west long wire, where's KQCV? It still dominates on the DX-398 except when nulled. [Hauser-OK]
- 800 **MEXICO** XEROK Cd. Juárez, Chih. SEP 7 1210 – Spanish virtually zero-beat with KQCV, which I null as much as possible; discussing border issues at Juárez; 1211 mentions "Calibre", keyword for XEROK, contraction for "Canal Libre", as if it were still a "clear channel"; 1211 rooster crows. [Hauser-OK]
- 860 **MEXICO** XEMO Tijuana, BC SEP 4 0640 – Strong and alone at times, mixing with KTRB at others with male preaching in Spanish. Verified via audio stream. Format change? [Battaglino-CA]
- 870 **MEXICO** XETAR Guachochi, Chih. SEP 7 1200 – As I try to ID the Spanish from the south as KFJZ Fort Worth, by 1202 I am also hearing the choral Mexican national anthem from the southwest, which has to be XETAR; 1204, multilingual XETAR ID's; 1208 fades up "XETAR, Su voz en la Sierra Tarahumara," but I've heard it much better before at SRS. SEP 14 1208 – Sign-on routine, starting late? Or just protracted in multilanguages, but several ID's heard. In Spanish, mentions that they will be on air for 12 hours, "iniciando doce horas de transmission," i.e. still a daytimer which perhaps WWL/listeners appreciate. [Hauser-OK] SEP 17 1204 – Anthem in progress, then ID at 1206 followed by announcements and talk, all in Spanish, I think, with no indigenous languages. Fair peaks but generally under KLSQ. [Wilkins-CO]
- 970 **MEXICO** XESW Cd. Madera, Chih. SEP 9 1159 – Ranchera song to 1201, then national anthem and ID at 1203 with very poor copy but pretty sure it was XESW. [Wilkins-CO]
- 1050 **MEXICO** XEG Monterrey, NL SEP 12 0602 – Super-hype voice actor full Spanish ID claiming 100,000 watts "en efectivo", the strongest station in Mexico or the U.S. Effective? meaning in a certain direction, but less transmitter power? That term is usually applied to FM where ERP is almost always much greater than transmitter power, taking into account antenna gain. Still plenty of interference, and XEG has not been the dominant 1050 signal at night for a long time, so I question their claim. And it's supposedly ND day and night. IRCA Mexican Log shows nothing but 100/100 kW and it's also stereo with no FM. [Hauser-OK]
- 1090 **MEXICO** XEAU Monterrey, NL SEP 10 1118 – Lots of Gobierno de México PSA's, Banco de México ad, something business in Oaxaca state, female at 1134 "Esta es XEAU... 1090 AM y 103.7 FM... Desde Monterrey, Nuevo León, México." Listed in the new IRCA Mexican Log, 22nd Edition as maybe having migrated to FM, but not yet. [Krueger-FL]
- 1300 **MEXICO** XEP Cd. Juárez, Chih. SEP 9 0715 – Fair with strong peaks with various Latin music – female vocal, then male/female duet. "Radio Noticias," "Nuestra Noticias, Radio Mexicana" ID's between songs. Verified via stream. Mixing at times with presumed KAZN Pasadena. [Battaglino-CA]
- 1460 **MEXICO** XEYC *R.Fórmula*, Cd. Juárez, Chih. SEP 12 0713 – Fair to poor quickly with contemporary dance music, announcements in Spanish between songs – not readable. Verified via stream. [Battaglino-CA]
- 1460 **MEXICO** XECB San Luis Rio Colorado, Son. SEP 8 1219 – Ranchera tunes, each followed by a canned "Radio Ranchito" slogan. Rough copy underneath XEYC and others. [Wilkins-CO]
- 1570 **MEXICO** XERF *La Poderosa*, Cd. Acuña, Coah. SEP 12 0730 – All alone with Spanish talk – female announcer throughout. Interviewing another woman on the phone about situation at the border. Verified via stream. [Battaglino-CA]
- 1620 **CUBA** *R.Bayamo*, Bayamo SEP 22 1001 – Under *R.Rebelde*; doorbell chimes marking the hour. [Conti-NH]
- 1630 **MEXICO** XEUT, UABC *R.Universidad Autónoma de Baja*, Tijuana, BC SEP 12 2356 – All alone with classical music. 10kW day power getting out well in the afternoon LT at 102 miles. Verified via stream. [Battaglino-CA]

TRANS-PACIFIC DX

- 774 **JAPAN** JOUB, NHK2, Akita SEP 9 1141 – Scraps of audio, probably the longstanding English language lesson. Couldn't pull anything out on 747 due to local noise. [Wilkins-CO]

Transpacific carrier search: SEP 7 1153 – 747, 774, 828 all from the northwest, the Big Three from NHK Japan; no others noted as I am also DX'ing 10-kHz channels. SEP 13 1141-1146 – Before LSR of 1212 UTC all from northwest on the altazimuth wrist-mounted DX-398, i.e. Japan, Korea, etc., 747,

774, 828, 972, 1134, 1242, 1566 kHz. 1134 and 1242 harbor 100 kW private Japan stations; 1134 also 500 kW in South Korea, but 1242 only 10 kW there. 972 slightly stronger than the rest. SEP 20 1058-1105 – As I happen to be awake more than an hour before local sunrise when this usually be done, on the DX-398 looping northwest: 594, 675, 693, 747, 774, 828, 972, 1134(2), 1566 kHz. From west/southwest 612, 702, 882, 1548 kHz. [Hauser-OK]

Here are the two remaining National Football League (NFL) lists. Note that 93.1 KCBS-CA is a second flagship for the Rams; it was not on my flagship list in my last column. Also note that footnote I has changed; the one station with that footnote also carries the Rams' games.

Now to start on the National Hockey League (NHL) lists.

Re: Northern Neck of Virginia DXpedition July 2019

I had the opportunity to visit one of my regular DX'pedition destinations – Waters Edge – near Fleeton, VA from July 23-28. Conditions weren't great; lightning noise was high throughout and the Northern Neck of Virginia is not Cape Cod or Maine and certainly not Newfoundland.

There were a few Brazilians, Ecuador, Benin, etc. Nothing new and nothing in great numbers but I still had fun away from home. If you're interested you can see/hear what I heard on this webpage:

http://realmonitor.com/am_logs_we11.php

I did something I've been meaning to do for quite awhile and have a slightly modified page URL:

<http://realmonitor.com/we11/index.php>

It has a feature where the (green, for now) header above the loggings that tells you who, what, where, when, etc. actually follows you down the page as you scroll. It's called a 'sticky header' and involves a little CSS and JavaScript. I basically 'stole' it from the internet and modified. It makes it easier to keep track of date/time as you get below the first screen.

I also added a few more loggings from July 28 @ 0000utc - including South Africa on 729, Brazil on 690 and a TIS from Wallops Air Station on 760. Love those wav files! Always there just waiting to be listened to!

Re: AM DXing in Laramie, WY

One thing that has surprised me since moving here 9 months ago is just how many AM's I hear from Mexico. I kinda sort of expected to hear some, but not as many as I have. The other surprising thing is how strong they are. XEDP, XEPRS, XEABCA, XERF, and XEROK are regularly pretty listenable. Sometimes stations like XEABCA, XEDP and XERG are extremely strong at night, almost as good or better than Denver and Cheyenne stations. XERF is local-like strength some nights and XEDP can often take out KNUS at sunrise and sunset.

Re: Recording Your DX

I know quite a few of us record our DX, but a lot of people still don't. I've run into some old timers who flat out refuse to record, with one telling me: "My written log and my word should stand for itself and be enough." Quite a few people record on computer but I don't for multiple reasons:

a) Potential interference introduced into your DXing system (not very likely but I'm taking every advantage I can to reduce interference); and

b) You're Mobile.

I try to come up with ways to do things that anyone, even if they aren't too handy, can do, with parts and equipment they can get easily no matter where they are. I use a Zoom H1 digital handheld recorder fed by its line in port from the RCA outputs of my radio and I listen using the headphones in the audio out jack. I shot a short video a year or two ago after I had a few questions on how to set this up, and it's easier to show than try and explain. Here's the video: [link](#).

I know there's one or two DX'ers on this list I've specifically encouraged and been able to help set up with more or less this same system. I'm not saying what you're doing is wrong. but if you don't record, you should. It makes it much easier for stations and in some cases, believable when they hear it rather than just read a report. I love DXing and I just want people to get the most out of it like I know is possible, like I do.

I have audio files on my Google drive account and I share from time to time what I think is interesting, don't have the time to do a website and stuff.

From: Mark Connelly
 Re: Recording Your DX

Most of my DX is via SDR (Elad, Perseus) so computer-resident recording software (Total Recorder most of the time) does the job. I have used dedicated hand-held digital recorders of various types as well, especially when using portable or desktop receivers. Zoom, Tascam, Edirol, Sony, and C. Crane (CC Witness) all have competent recorders. Besides DX, these are also good for entertainment radio recording, TV sound, dubbing LP's / 45's / reel-to-reels / cassettes into digital, and recording live material from speech and music to sounds of nature.

Pogo LX was one of the first such recorders (circa 2000 give or take). I still have one kicking around in a junk box somewhere.

Whether using software such as Total Recorder or dedicated recording hardware, it might take a bit of practice to get the right compromise between adequate fidelity and files that aren't too huge. WAV and MP3 are the most popular file formats, ones that can usually be emailed to station personnel for reception reporting purposes.

Paul, do you have a website with links to what you have recorded?

I have this as a start-up page for my stuff: https://www.qsl.net/wa1ion/dx_audio.htm

You can then click on links that cover years 2015, 2016, 2017, 2018, and 2019. The site has some vintage pre-2000 material too, originally on cassette or reel-to-reel and then converted with Total Recorder. Gary DeBock out west has amassed many audio clips though I'm not sure if he has a links page for all those DX'peditions. Same thing for Bill Whitacre: lots of DX'pedition recordings. These guys can toss out many useful tips beyond what I have mentioned.

This column might have been longer, but some surgery has shortened up my time at the radio and the computer. I should be good to go real soon.

73 for this time, Shawn.

Here's my dues, and an order for the AM Radio Log 40th edition. This info is essential; a true must have, as is the 8th edition of the NRC AM Station Pattern Book. A must have to find any probable "mistakes" by AM stations still on day power at night. The Pattern Book can be a tool in helping find those errant stations if they are out of whack. My last 5 AM additions are courtesy of such out of norm transmission situations, WXYG-540 MN, WLES-590 VA, CKNT-960 ON, and that to WWJ for turning off its despised HD-IBOC, KWNO-1230 MN – due to WCWA audio drop, and WVRQ-1360 WI on day power. AM total is 3794. Will look to update AM Totals and GY totals in 2020. AMs now with FM translators are an aid to IDing stations too!

Ode to AM Radio

First, it was radio that glowed by battery power
 We sat around the brown RCA radio by the hour

Listening to the Grand Ole Opry every Saturday night
 Other times, the "Shadow" caused us much fright

Later, we listened to " FBI – In peace and war"
 Cowboys, comedians, adventurers by the score

AM radio was our magic portal to the world
 The hopes and dreams of farm kids unfurled

Our old radios and dear parents are all gone
 But AM radio for some, will always live on

From the *DX News* archives

75 Years Ago – From the September 23, 1944 issue of *DX News*: As the NRC became an exclusively medium-wave club, Publisher Ray “Pop” Edge asked members to use the “Frequency Frolic” column (the ancestor of both DDXD and IDXD) more often. Newt McLeod in West Peru, Me., reported “really loud signals” from KFI, KSL, and KOA, although TAs were not yet coming in.

50 Years Ago – From the September 27, 1969 issue of *DX News*: Due to rapidly rising inflation (printing costs up 15% from the year before), *DX News* will be cutting back from 34 to 32 issues per year. Several members wrote tributes to longtime NRC member Ralph Johanns, who recently passed away. Mike Bugaj, recently returned from duty in Iceland, reported a new AFRTS station on 1234 kHz. Richard Wood heard his 55th country from Hawaii, with the BBC relay in Trucial Oman on 1410 kHz.

25 Years Ago – From the October 3, 1994 issue of *DX News*: Yet another Chicago-area station profile from Tony Fitzherbert focused on WCFJ, “Winning Chicagoland For Jesus,” in Chicago Heights on 1470 kHz. Bruce Conti filed a report on the 1994 NRC convention in Nashua, including tours of WSMN-1590 and WKBK-1250, some DXing (Denmark-1062, Norway-1314, among others), and Dave Schmidt turned on the carrier-current “WNRC” on 1390 kHz (with reduced power after the smoke detector in the hospitality room turned out to be RF-sensitive).

10 Years Ago – From the September 28, 2009 issue of *DX News*: Jim Tedford became the new editor of DDXD-West. Shawn Axelrod’s “DX Toolbox” presented ideas for antennas for those who are space-constrained. On the other extreme, Gary DeBock presented plans for giant PVC-pipe passive loop antennas ... up to 9 feet on a side!

IRCA MEXICAN LOG

The IRCA MEXICAN LOG lists all AM stations in Mexico by frequency, including call letters, state, city, day/night power, slogans, schedule in UTC/GMT, formats, networks and notes. The call letter index gives call, frequency, city and state. The city index (listed by state, then city) includes frequency, call and day/night power. The transmitter site index (listed by state, then city) tabulates the latitude and longitude of transmitter sites.
