From the Publisher: The electronic version of DDxD-West received here triggered all sorts of "File Corrupted!" warnings and most of it couldn't be accessed. We weren't able to get it resolved before press time, so you'll see here as much of the column as I was able to recover (which isn't much) and we'll run a double column next issue.

DXpeditions Galore: A number of DXpeditions are currently underway or have just been concluded; see some early reports herein. As Phil Bytheway notes in his column, this may be the lowest year for sunspot activity in a century, and low solar activity usually means good MW DX conditions! So this is the time to be listening for the really rare stuff.

Space Weather Forecast

Via NOAA web page

Solar activity is expected to be at very low levels throughout the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to reach high levels on 04, 21-30 Nov, with moderate levels on 05-11, 20 Nov, and normal levels on 12-19 Nov, in response to CH HSS influence.

Geomagnetic field activity is expected to reach G1 (Minor) storm levels on 21 Nov, with active levels on 06, 20, 22-24 Nov, due to recurrent CH HSS activity. Quiet to unsettled conditions are anticipated throughout the remainder of the outlook period.

- WCED PA **DuBois** – 10/29 0459 – “Fleet Owner” ad then name check for Red Eye Radio. Nice WCED ID after the hour change with inclusion of 96.7 and 107.9. Very clear at times. Later that day I had a brief conversation with Jay Philipponne, Priority Communications owner, about this logging and broadcast power at this time. He expressed some surprise at the reception and indicated he would check it out. Noted again 10/31 at 0500, transition from diesel additive ad into full ID as above. Blurb for Tri-County Insider after the news. Very clear and loud ID at 0600. (JW-PA)

Once mighty XEW, La Voz de la América Latina desde México, is seldom heard here; if I do get a 900 Mexican, it's XEOK Monterrey, or used to be: IRCA Log thinks it may be off to FM. There was a 100:1 power disparity, 250 vs 2.5 kW night power! WRTH 2019 gave XEW only 100 kW, a 40:1 ratio. [Hauser-OK]

- 1090 **MEXICO** XEAU Monterrey, NL OCT 21 0559 - Promo for Milenio Diario newscast at LV times, 0600 into infomercial. Still no ID, but another match for XEAU since searching immediately finds: "XEAU-AM is a radio station on 1090 AM in Monterrey, Nuevo León. It is owned by Multimédios Radio and carries Milenio Radio along with sister station XHFMTU-FM 103.7 HD3. Wikipedia." Of course that does not prove that no other 1090 station airs M.D., but surely XEAU, our closest 1090 anyway is the one I have been hearing. As usual, KAAY from the east can be nulled, but not the annoying 1089 het from the 700+ kW of UK synthros. OCT 26 0605 - Spanish from south easy with KAAY from the east nulled and initially dead-air. It's an infomercial not for mattresses but now for Vita-C, an antiseptic, referring to phone number to call "en pantalla," i.e. on the screen, another television infomercial. The number probably depends on which station is airing it in order to track response sources, but it's rather hard to 'see' on the radio! Maybe they later inserted it verbally. Anyhow, still presumed XEAU. [Hauser-OK]

- 1510 **MEXICO** XEQI *Opus 1510*, Monterrey, NL OCT 27 0629 - Classical music from south/southwest, no doubt XEQI; there is no USA AM station with a classical format we hear. [Hauser-OK]

- 1540 **MEXICO** unID OCT 26 1040 - Mexi-tunes, choral anthem at 1100, more Mexi-tunes but very poor in KXEL co-channel, plus low side hets from likely KGBC and KBOA. Not parallel XEHOS, Hermosillo, Sonora's alleged AM stream which was feeding XHHOS *La Invasora* 101.9 FM (ID'ing as) and no anthem at 1100; maybe that happens at 1200, being how far west they are. XESTN Monterrey has no functioning stream. The 2019 WRTH lists both while the 22nd Ed. IRCA Mexican Log only shows XESTN and as no longer simulcasting 1110 XERED Radio Red but rather XERC "Radio Centro 97.7" FM from Mexico City. The Wiki entry for XEHOS states the AM went silent in 2017 (with an edit from "Raymie" three months ago, who we know is a highly credible source for Mexican radio/TV). So, is this XESTN, seemingly the only one still on 1540? [Krueger-FL]

From the *DX News* archives

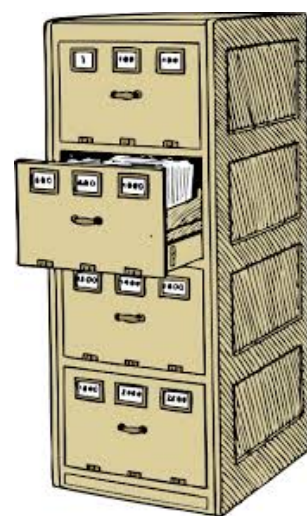

75 Years Ago – From the November 11, 1944 issue of *DX News*: Hank Wilkinson in Baltimore, Md. commented on how much better TA stations were coming in this year, with reception on Nov. 1 being particularly excellent. His technique is to tune slowly from 540 to 1500, rather than jumping around, particularly since lower frequencies faded out earlier at European sunrise than higher frequencies do.

50 Years Ago – From the November 8, 1969 issue of *DX News*: Russ Edmunds will be the new editor of DDXD, succeeding Randy Kane, who will take over the job of mailing *DX News* every week. Many DXers commented on the improved conditions; Dick Truax in Lexington, Ky. heard 60 new stations in October. In a project for the Association of North American Radio Clubs (ANARC), Gerry Dexter was soliciting volunteers to provide QSL cards for the Smithsonian which hoped to have a display of QSL cards, preferably from the 1920s and 1930s.

25 Years Ago – From the November 7, 1994 issue of *DX News*: The FCC announced 79 stations that would be allocated space on the new expanded band (1610-1700 kHz). Many of these stations did migrate to the X-band, but often to different frequencies from the initial allocation. David Yocis reported to DDXD and IDXD after rejoining the NRC after a 10-year hiatus.

10 Years Ago – From the November 9, 2009 issue of *DX News*: Neil Kazaross described a system for phasing BOGs (Beverages-on-ground antennas). From the November 16, 2009 issue of *DX News*: The *New York Times* reported on the hesitant move of AM stations in Europe to digital broadcasting. Shawn Axelrod's column covered all the different types of MW receiving antennas. Bruce Conti reported Albania off-frequency on 1457.81 kHz, pitting a loud het on Sunrise Radio-1458 until Albania's 2330 UTC sign-off.

All *DX News* editions from Volume 1 Issue 12 through Volume 82 are now available free to the public at the NRC web site: <http://nationalradioclub.org/DXNs/index.html>.

Re: AM Radio History on a Podcast

I think podcasts are great. I think podcasts about history are outstanding. I think podcasts about history that are less than fifteen minutes long are awesome!!

I subscribe to one such podcast called "This Day in History." As its name suggests, it's a daily podcast highlighting an important historical event that happened on that day. I listen to my podcasts via TuneIn. It's also on iHeart Radio. I'm pretty sure it's available on Apple iTunes, too.

Today's podcast - October 18th - is about the invention by Texas Instruments of the first commercial transistor radio, the Regency TR-1, back in 1954. Give it a listen - it's only six minutes and twenty seconds long. Enjoy!!

Re: QH14 Lubec Maine DXpedition

I snuck in a short visit to Quoddy House in Lubec, Maine for some DX October 18 - 21. Still going through wav files but what I have so far is here: <http://realmonitor.com/qh14/>

Maybe this will be of some use to upcoming DX'peditions to PEI, LBI and Newfoundland.

Highlights of QH14 so far were; several TPs and a couple of DUs, TWR Sri Lanka on 882, Radio Tsentr from Latvia on 1602.15, Ethiopia on 1359 and Slovenia on 648. Good DX to all!

From: Mark Connelly, WA1ION

Re: QH14 Lubec Maine DXpedition

Outstanding report Bill, especially for such a short DX'pedition. 846 India, 882 Sri Lanka, the Aussies and East Asians ... certainly hard DX, some perhaps never heard before in this part of the US. Your logs and Roy's stuff concentrated more on low Africa and Latin America give the rest of us a bountiful target list for our own efforts.

Bill, was there anything from South America during your trip?

All I can say is that Newfie, PEI, NJ, and whatever else materializes in East Coast DX'peditions over the next few weeks should produce a bumper crop of interesting and, in some cases, All Time New One, logs.

Re: QH14 Lubec Maine DXpedition

For once Murphy was blessing rather than cursing me. ;-)

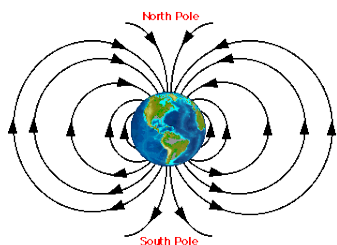

Have a couple of other logs at 0030utc on Oct. 21 that are probably India but I'm not keen to ID stuff based on music only ... even if there's not much else that would be playing South Asian music on 1287 or 1071.

I had only one antenna, a 160' DKAZ at 37 deg., so not much chance of LatAm stuff. No Cubans, woohoo! I did hear a 'Noti Uno' jingle and multi-station ID on 630 at one point but that's about it.

73 for this time, Shawn.

Sx – Solar Radiation Storm Level / Gx – Geomagnetic Storm Level / Rx – Radio Blackouts Level.

"**DEEP SOLAR MINIMUM:** Last year, the sun was blank (without sunspots) for 221 days. That marked 2018 as a year of deep Solar Minimum. This year is shaping up to be even deeper. As of today, the sun in 2019 also has been blank for **221 days** – and it's only October. 2019 is blowing past 2018 in the race to the bottom of the solar cycle, and by the end of the year could rank as the deepest Solar Minimum in a century."

SOLAR WIND SPARKS AURORAS IN THE USA: During the night of Oct. 24-25, geomagnetic activity increased to category G2--that is, moderately strong –as Earth moved deeper into a fast-moving stream of solar wind. At the peak of the G2-storm, auroras spilled across the US-Canadian border into Minnesota:

FCC Speeds Digital-Only AM Proposal Forward As Part of Revitalization Effort.

Inside Radio, Oct. 29, 2019
Via Bill Hale

A champion of AM revitalization for the past six years, Ajit Pai has used his authority to advance several ideas percolating inside the Federal Communications Commission since becoming the head of the agency in 2017. The latest lifeline proposal, however, hails from the ranks of radio and it has quickly won support from a large number of broadcasters. If approved by the FCC, it would allow owners to power down analog AM transmitters and leave just a digital-only signal as their replacement.

The proposal under consideration at the FCC wouldn't force any AM to remain a hybrid of analog and digital – or make the leap to an all-digital signal. "Because all-digital broadcasting would be on a voluntary basis, AM operators would be the ones deciding if transitioning is right for them," Pai wrote in a blog post. He said the Commission will be looking in the coming months for more information about such things as the interference potential of all-digital stations as well as addressing what the technical standards for all-digital AM stations should be.

Specifics of the FCC proposal will be released in the coming days. But Pai said he views what is being teed up as a way the Commission can do more to give AM stations as much "flexibility" as they can in order to compete in the digital age. He will bring the formal Notice of Proposed Rulemaking to a vote at the Commission's November 19 meeting.

The proposal was first submitted to the FCC for consideration last March by Bryan Broadcasting. Ben Downs, VP/GM of Bryan Broadcasting, told *Inside Radio* he's encouraged to see Pai move it forward.

"The FM translator rules were what most of us in small and medium sized markets needed to continue to compete. Properly engineered, these translators will provide service that covers our communities. But the spectrum is just too full for translators to help in the major markets," Down said in an email. "This will be an opportunity for an AM station that is competitively challenged to compete with music again."

While many ideas languish at the FCC, failing to ever gain industry support, the all-digital AM outline has quickly gained traction both inside the agency and among pivotal industry players including the National Association of Broadcasters. "We agree with Bryan that all-digital AM service will allow broadcasters to provide substantially improved sound quality," the NAB reiterated in a letter to the Commission last week. Digital radio developer Xperi, and several small and mid-sized radio groups also said all-digital AM should be explored. The California and Missouri state broadcast associations also went on record asking the FCC to advance the proposal.

The FCC had already been toying with the idea of allowing digital-only AM stations. The Media Bureau last year granted one-year experimental authority to conduct tests on all-digital using Hubbard Radio's adult alternative "The Gamut" WWFD Frederick, MD (820). That included testing to see how the switch to an all-digital signal impacts WWFD's coverage area. Nine all-digital AM tests were conducted between 2012 and 2014, spanning a variety of station types and geographic locations. "These experiments validated the successful performance of all-digital AM radio service," the NAB noted in its letter to the FCC.

David Layer, the NAB's VP of Advanced Engineering, has said the goal is to eventually switch over all stations to HD-only broadcasts when digital receiver penetration is high enough. But most broadcasters agree that day still lies in radio's future.

"All-digital (MA-3 mode) won't be the answer for every AM station," said Downs. "But it will be perfect for some stations that want to compete with a music format. And since every HD car radio ever sold is capable of receiving these signals, there are now 60 million radios owned by potential listeners. And that can't hurt."

In addition to a digital-only AM proposal, Pai also said Monday that the Commission will begin examining the 1992 rules that put limits on the amount of simulcasting commonly-owned radio stations in a market can air. Pai said they'll look at whether the rules should be modified or eliminated outright. He said since the rules were adopted nearly three decades ago, the number of commercial radio stations has rapidly grown, and many stations are now simulcasting on mobile apps and websites. "With so much more competition and program diversity, which were the objectives of the radio duplication rule, we are seeking comment on whether the rule is still necessary and whether it should be modified or eliminated," said Pai.
