From the Publisher: Another full issue for mid-spring, with baseball season starting on time this year! I'm happy to report now being fully Covid-vaccinated and looking forward to getting back to normal life, as I hope you all are or soon will be.

We'll be back again in 3 weeks ... look forward to some DX Toolbox and some spring DX reports!

From the Archives

75 Years Ago – From the April 20, 1946 issue of *DX News*: Al Bartholomew of Corning, N.Y. reported receiving one of his best QSLs, from the Linz, Austria U.S. Army station operating with 15 kW. He also noted hearing the DX test from KXLR-1450 (North Little Rock AR) on April 7, as well as KWIL-1240 (Albany OR, today on 790) signing off at 4:00 a.m. Eastern. Ted Saling of Estcada, Oregon was grateful for the 2-page list of new stations granted by the FCC/Canada published in the April 6 issue; he's heard 10 of them so far and is looking forward to lots of new targets for the upcoming year.

50 Years Ago – From the April 17, 1971 issue of *DX News*: The first part of Gordon Nelson's article "Pattern Controlled Loops for the Mediumwave DXer" was published, arguing that while it was well known that poor loop design can result in less-than-perfect symmetrical patterns and weaker nulls, perhaps one could intentionally develop non-symmetrical antenna patterns (such as cardioid) for DX purposes. In a separate piece, Gordon explained why the BBC station in Malta on 1546 was so well heard in North America despite its low (10 kW) listed power. Photos of the antenna site showed that the intended beam of the station was to Libya, with a direct aim at North America off the back end.

25 Years Ago – From the April 22, 1996 issue of *DX News*: Bryan Clark reported on a successful DXpedition to Wainakarua on New Zealand's South Island, with "easy" loggings of WJDM-1660, KXBT-1640, CBJ-1580, and DX tests from WKXY-930 and WAMR-1320, along with some Caribbean stations and long-path Spaniards. The

FCC has now set up an online database for AM stations; many stations are missing and presumed deleted and Wayne Heinen and Bill Hale are combing through it looking for more changes.

10 Years Ago – From the April 11, 2011 issue of *DX News*: The MLB network lists were published, thanks to Barry Finkel, with several teams (such as Baltimore and St. Louis) moving back to 50 kW clear-channel flagships. In AM Switch, an STA for WXVA-610 and a CP for WOMN-1110 to move to 1100 were discussed; both are still pending 10 years later!

All *DX News* editions from Volume 1 Issue 12 through Volume **86** are now available free to the public at the NRC web site: <http://nationalradioclub.org/DXNs/index.html>.

FCC and CRTC Decisions and Applications

CALL LETTER CHANGES

- 1020 WIBG NJ **Ocean City-Somers Point** – Call change to WWAC (Apr. 7).
 1200 WJXY SC **Atlantic Beach** – Call change back to WMIR (Mar. 23); had these calls 1997-2017.
 1570 KVAM CO **Loveland** – Call change to KXJJ (Mar. 29).

STATIONS GOING DARK

- 640 WBIN GA **Atlanta** – License cancelled Apr. 1 according to the FCC, no explanation. But still seems on the air; a license renewal glitch? It's hard to believe iHeart would mess up a renewal application, but the station was only recently acquired.
 1330 WZCT AL **Scottsboro** – This, and not "WZCT-1310 Tuscaloosa AL," is the station that should have been reported as deleted in issue #13.
 1480 WKGC FL **Southport** – License cancelled Apr. 1; station was silent Nov. 4, 2019 and did not convince the FCC it wasn't silent for more than a year before notifying the FCC in December 2020 that it had resumed broadcasting.
 1490 WSYL GA **Sylvania** – License cancelled Mar. 29; licensee voluntarily surrendered the license rather than appear at a license renewal hearing to defend its being mostly silent for the last several years.
 1600 KPNP MN **Watertown** – License cancelled Apr. 2 according to the FCC, no explanation.

 1050 WLYC PA Williamsport – Silent May 16, 2020; on the air Mar. 20.

Lee Freshwater reports that WMOP-900 Ocala FL is back on the air after being off for about 9 months (although never on the FCC silent list). The sale of this station, along with WGGG-1230 Gainesville FL and an FM translator in Gainesville, had been held up pending a dispute with the former LMA operator, which has now been resolved.

For some reason WSTL-1220 was on the FCC silent list we printed last issue; they are not on the FCC list at the moment and from what I can tell they've not been inactive for several years now.

Stations informing the FCC that they are silent:

- 1130 WALQ AL Carrville – Silent Mar. 21, transmitter damaged in storm.
 1290 WOPP AL Opp – Silent Mar. 22 pending repairs to antenna system.
 1300 WJYP WV Saint Albans – Silent Mar. 24, flood damage to transmitter.
 1310 KIQQ CA Barstow – Silent Mar. 24, has lost licensed transmitter site.
 1330 KKPZ OR Portland – Will go silent Apr. 30 to prepare station for sale.

From Radio Ink: *Rush Limbaugh Continues* – When Premiere Networks sent out a press release Monday announcing that WBOB-AM/FM in Jacksonville would be adding the Rush Limbaugh Show, we checked in with Premiere to make sure it wasn’t a mistake, being that Rush recently passed away. Here’s what they told us.

The Rush Limbaugh show will continue airing with rotating guest hosts that, from time-to-time air audio clips of Rush.

Here’s the official Premiere statement: “No one can replace Rush Limbaugh, and Premiere Networks will continue to provide millions of loyal listeners with the voice of Rush for the long term. We have a variety of familiar voices who are guiding the audio of Rush for all of the important issues of the day, including recent guest hosts Todd Herman, Ken Matthews and Brett Winterble. With over 30 years of audio, Rush has a definite view on any and every topic.” Chesapeake-Portsmouth Broadcasting Corporation’s WBOB AM 600/FM 101.1 will air the program live from noon to 3 p.m. ET. General Manager Jonathan McClellan said, “Rush Limbaugh is a pioneering force in

broadcasting. He redefined talk radio and shaped the conservative political message for our country. WBOB is excited to add Rush's program to our lineup. We value the future of his legacy, and we believe his talented team will drive the momentum of the movement far into the future. We welcome this monumental voice."

From Radio Ink: *Entercom Becomes Audacy* – A company-wide meeting will be held this morning to inform all Entercom employees that the new company name will be Audacy. This is the logo to go along with the new name. The company has been called Entercom since it was launched by Joe Field on October 21, 1968.

CEO David Field: "We have transformed into a fundamentally different and dramatically enhanced organization and so it is time to embrace a new name and brand identity which better reflects who we have become and our vision for the future. Audacy' captures our dynamic creativity, outstanding content and innovative spirit as we aspire to build the country's best audio content and entertainment platform. "The company's ticker symbol will change from ETM to AUD on or about Friday, April 9, 2021.

The company will also **sunset the Radio.com brand** and align its direct-to-consumer platform under Audacy (emphasis mine-wh).

From Radio Ink: *G. Gordon Liddy Passes* – The former FBI agent, best known for his role in the 1972 Watergate break-in that led to the resignation of Richard Nixon, hosted a conservative talk show syndicated by Radio America on 270 radio stations. He retired in 2012. Liddy, a father of five, was 90 years old.

From the Wires: *Brother Stair, SK* – CANADYS, S.C. (WCSC) – The Colleton County coroner said an evangelist who founded the Overcomer Ministry in the county has died. Ralph G. Stair died of heart failure at his home, according to Coroner Richard Harvey. Harvey said Stair had been under hospice care. His age was not immediately clear. The coroner's office listed Stair as 84, but Stair's Overcomer Ministry, which announced his passing on its website, listed his age as 87 and his time of death as 11:17 p.m. Saturday.

From Radio Insight: *FCC Auction 109* – As the FCC prepares to conduct Auction 109 of 136 FM signals and 4 AM signals on July 27, the agency has set the timetable and ground rules for the auction. A short form filing window for potential bidders to specify their qualifications to participate and identify which properties they seek to bid on will take place from April 28 through May 11. That window will include a freeze on all minor change applications for any full-powered FM to prevent any overlap and contour protection changes to existing licenses. All upfront payments for the auction will be due on June 16.

Note from DY: The four AM signals open for auction are the dial spots occupied by four Saint Louis area-stations that had their licenses cancelled a couple years ago– on 1190, 1430, 1490, and 1510 kHz.

DX TEST

- 1090 WENR TN Englewood – 3/14 0007 – I tuned in a bit late for the start of the DX Test, but immediately heard sweep tones, which then disappeared. Later comparison of my log with Loyd VH's YouTube recording of the test (DX Central) confirmed that the sweeps had changed to a telephone "off-hook" sound just then, which I could not discern up here in Maryland. Later observations, all of which matched Loyd's recording, included slow sweep tones at 0022, fast sweep tones at 0023, slow sweeps again at 0024, and a partial code ID at 0042. (STB-MD)

UNID

- 1230 unID -- - 3/8 0646 – Ad for a convention center mentioning phone number 653-8442 (no area code given), Subaru dealership ad. (DP-QC)

 WAYY WI Eau Claire – 4/10 0100 – Under/over WPRV; "790 WAYY... Fox News is next." New log. (BC-NH)
 870 WWL LA New Orleans – 3/10 0605 – "WWL First News at 5:05" in the clear, followed by many mentions of "WWL." This one is not quite as easy from Maryland as it was decades ago. (STB-MD)

- WHCU NY Ithaca – 3/10 1924 – “Lite Rock 97.3” heard along with Cuba’s “Radio Reloj” ID and clock ticks. WYXL in Ithaca, NY, goes by “Lite Rock 97.3 and is part of the same Cayuga Radio Group as WHCU. Any doubt erased minutes later with “NewsTalk WHCU” ID at 1927. **(STB-MD)**
- 880 KRVN NE Lexington – 3/12 0655 – Ad for a Red Angus Bull Sale on March 24, ID “0656 at KRVN,” faded out shortly thereafter. My second Nebraska station. **(MD-GA)**
- 900 CHML ON Hamilton – 4/11 0100 – Under local WGHM open carrier; “The frequency 900 on the AM dial, call letters CHML, we are 900 CHML a Corus Communications radio station.” **(BC-NH)**
- 910 WLTP OH Marietta – 4/4 0741 – Over IBOC-like noise with “across the Ohio Valley...on News Radio WLTP and wltp.com” station promo amid conservative talk. **(MKB-ON)**

- 1090 KAAZ AR Little Rock – 3/13 2002 – While tuning into this frequency to prepare for the WENR DX Test later on, I heard religious programming in behind local WBAL. The songs seemed to match KAAZ’s on-line stream, but the ads in between did not. NRC members on Facebook advised that this is often the case. It became obvious at 2037, when an on-line ad ended, dropping the listener right in the middle of “I’m Getting Ready to Leave This World,” which had been playing in its entirety over the air immediately before. **(STB-MD)**
- WILD MA Boston – 3/14 0007 – Presumed with religious talk, usually dominant over both KAAZ (IDed earlier in the evening) and the WENR DX Test. Tuned in to “Saving All My Love For You” by Whitney Houston, more music by Paula Abdul, Chicago, Des’ree, Taylor Swift etc., wanted to make sure I wasn’t hearing things so at 2246 “More Than A Woman” by The Bee Gees punched through. No ID, but // to Simple Radio stream. (98.7 EZ FM). Poor to very poor with CKOC and WHBY. **(PS-ON)**
- WHBY WI Kimberly – 4/11 0200 – Fair; “Up early and need to know what’s happening? It’s Gordon Deal and America’s First News weekday mornings at 4 on WHBY Kimberly-Appleton-Oshkosh.” **(BC-NH)**

- 1270 WNOG FL **Naples** – 3/7 0315 – Fox Sports Radio mentioned several times with a local ad mentioning an event in Naples. Faded in for a few seconds while listening to KFLC. New one for me. **(MD-GA)**
- KFLC TX **Benbrook** – 3/7 0305 – TUDN Radio Dallas in SS with an apparent soccer match. The word “goal” was heard occasionally. Internet stream was a few seconds behind the radio broadcast. New one for me. **(MD-GA)**

Fair at times to very poor with KXEL and CHIN. // to Tune In stream. Thought for sure I had either WBCO Bucyrus, OH or WBRY Woodbury, TN on after hours. Was not expecting WBNL. 1560 WRIN IN **Rensselaer** – 3/31 2140 – C&W music, numerous ID’s for 104.5, PSA for colon cancer screening, and numerous classic country selections. Alone on frequency, WRIN-1560 is listed as a daytime station with no night authorization, nice of someone to have left the AM switch in the “on” position! **(TF-NH)**

WKIK MD **La Plata** – 3/16 0650 – Weak signal, C&W atop for four minutes before vanishing into static and then WSBV at 0710, not bad for 250 critical hour watts from the southern Washington suburbs. WMBH MO **Joplin** – 3/29 2228 – Arkansas Razorbacks v. Baylor Bears NCAA Tournament game, possible ads. No ID heard, but // to foxsportsjoplin.com. WYZD NC **Dobson** – 3/6 1818 – I was able to Shazam off the air the song “My Latest Sin Is Sinking Fast,” by the Faithmen Quartet, and then Shazam it again from WYZD’s on-line stream moments later. Then, at 1829, “WYZD, Dobson. The time is now 6:29.” **(STB-MD)**

WTNS OH **Coshocton** – 3/20 0643 – popped up with C&W, followed by a weather forecast “and that’s the weather on Real Country,” into more C&W music. WTNS is the only “Real Country” station on 1560. 500 watts from Ohio visited the mountains of NH for four minutes! **(TF-NH)**

WCNW OH **Fairfield** – 3/17 0612 – Talk mixed with a gospel choir, at 0615 a real DX gift as the signal came up to an audible level with disclaimer: “the contents of this program do not necessarily reflect the opinions of the staff and management of WCNW,” then into another program hosted by a woman, soon gone. Pre-sunrise 500 watts goes SE over Cincinnati, away from here, from two towers, the CH signal goes SW from three towers in another array. The call stands for “Wonderful Country ‘n Western” the station’s first format, in 1968. **(TF-NH)**

Unreported Domestic Stations

Two stations were reported to DDXD this issue for the first time since at least Volume 67 (1999-2000): KDBS-1410 and KROO-1430. In addition, two long-silent stations that have, not coincidentally, been unreported during this time have now finally been deleted – WKGK-1480 and WSYL-1490. So now we have just 261 stations in the United States and Canada not reported to DDXD at all during this period. Can you log and report one for next issue? The most recent list was published in issue #1 – if you’d like an updated list by e-mail, send a request to the publisher at NRCDXNews@gmail.com.

- 855 **SPAIN** RNE1 Murcia et al. APR 11 0100 – Good; servicios informativos. [Conti-NH]
 891 **ALGERIA** R.Algerienne, Ouled Fayet APR 11 0200 – Strong signal poorly modulated, only heard time pips, local 900 WGHM open carrier. [Conti-NH]
 909 **UNITED KINGDOM** BBC Radio 5 synchros APR 11 0000 – Good with local 900 WGHM open carrier; “This is BBC Radio 5 Live” and “BBC news at 1 o’clock.” [Conti-NH]
 1089 **UNITED KINGDOM** TalkSport synchros APR 11 0200 – Good; “On digital radio, 1089 and 1053 AM, this is TalkSport,” and news, “From the Sky News Centre at 3.” [Conti-NH]
 1152 **ROMANIA** R.România Actualitati, Cluj APR 11 0158 – Over/under Spain; choral national anthem parallel 1179 kHz, formerly broadcast before 0300 hour, now an hour earlier with spring ahead to summer time. [Conti-NH]
 1413 **SPAIN** RNE5 synchros APR 11 0500 – Fair; servicios informativos. [Conti-NH]
 1458 **UNITED KINGDOM** Gold, Ashton Moss APR 11 0500 – Fair; news by woman parallel 1548 Gold. [Conti-NH]
 1548 **KUWAIT** R.Sawa, Kuwait City APR 3 2358 – Good; long intro to world news with Sawa ID’s, then fast paced headlines. APR 4 0100 – Continued good signal; R.Sawa ID. [Conti-NH]
 1548 **UNITED KINGDOM** Gold, London APR 11 0458 – Fair; Gold jingle into ad string, then news. [Conti-NH]
 1675 **GREECE** unID APR 11 0359 – Fair; Greek folk music and male announcer. Internet searches unsuccessful finding 1675 listings, no responses from social media inquiries, apparently a new or non-regular operating frequency. [Conti-NH]

Transatlantic carrier search: MAR 30 0257 – 585, 612, 621, 639(2), 684, 693, 747, 774(2), 855(2), 891, 999, 1098, 1107, 1125, 1152, 1215 kHz. 747 is interesting, no superpowers in Europe beyond 25 kW Canary Islands, if not 100 kW Iran. Lately am not hearing much from 531 Algeria even when 891 is in; something changed? I thought conditions were somewhat auroral, but K-index at 0300 UTC is zero, no storms. MAR 31 0141 – Not every single 9-kHz carrier this time, but of note no 531 Algeria or 621 Canary which used to be staples, yet 612 Morocco? And 891 Algeria. We expect them all to be 24 hours, but maybe not. Also noted are 1215, two on 1305 kHz. And one on 1431 which is surely the 600 kW VOA Djibouti on the east coast of Africa, as otherwise there are only a few very low power in Europe, max 5 kW in Italy. Around 0530, 531 and 621 can now be detected. APR 5 0457 – Early enough for northwest and southwest Europe still to skywave: 531, 558, 576, 585, 612(2), 639(2), 684, 693, 738, 774(2), 837, 855, 882, 891, 909, 1053, 1089, 1125(2), 1134, 1152(2), 1215, 1296(2), 1305(2) kHz. Also 1710(2), likely domestic. (2) = at least two carriers beating. [Hauser-OK]

PAN-AMERICAN DX

- 640 **MEXICO** XEJUA Cd. Juárez, Chih. MAR 26 0158 – Poor-fair, under KWPN; vocal in Spanish, call letter ID by man: “Somos XEJUA...” [Knight-CO]
 660 **MEXICO** unID MAR 22 0407 – ‘La Hora Nacional’ so it’s an XE, still on standard time until April 4, at 10 p.m. CST Sundays, after which it goes to 0300 UTC. Quick check of other frequencies finds LHN on 730, 570, 540 but best on 660 kHz. Likely XEEY Aguascalientes, though 4 or 5 others in IRCA listing. [Hauser-OK]
 700 **MEXICO** XEGD Hidalgo del Parral, Chih. APR 1 0501 – WLW goes off for maintenance, thanks to tip from MARE. It made a false stop at 0500, came back on to include ID but nothing said about going off nor for how long. This uncovers two weak Spanish signals at almost the same southwest/northeast DF, inseparable. Main one has to be XEGD. One music, one talk then both music, making SAH of 152/minute = 2.53 Hz. No Mexican entries on 700 in mwoffsets list. At 0516, “La Poderosa 700 AM y 90.3 FM” or vice versa at 0528, which nails it as XEGD, per IRCA Mexican Log, but music is predominantly romántica, not grupera/adult contemporary. At 0520, clear Poderosa MST time check as 10:19. Not unusual to get it around sunrise. The only further Mexicans per IRCA Log are in Jalisco and Michoacán, but considerably CCW from XEDP bearing. With these nulled, I hear nothing from the few other USA/Canadians at night on 700, which are low-powered and/or too far and/or aiming away from here. At 0555, WLW still off and something Spanish mentions 101, likely an FM frequency but no known matches to 700 stations. At 0600 choral Mexican national anthem,

and suspect XEGD or something goes off, as the weak mix after that is different. IRCA Log shows 0500 for it. The two Texans, Dallas-Ft. Worth and Houston to the south/southeast were not showing earlier with their unfavorable patterns; by 0630 there is gospel music in English but not the format of either Texans. That could be CJLI Calgary, 50/20 kW, or even KGRV Oregon, 23/0.47 kW. Has KDAZ Albuquerque moved from 730 to 700 yet? [Hauser-OK]

- 710 **MEXICO** XEDP Cuauhtémoc, Chih. APR 2 1206 – Choral Mexican national anthem ends and full sign-on? ID only for XHDP, 89.7, 10 kW, La Ranchera de Cuauhtémoc, Chihuahua, street address; no mention of this nonentity AM XEDP listed as 7000/100 watts. Then live female announcer with 6-past time check and right into Low German laconic-sounding gospel huxter. This out-of-place language is a regular on XEDP. Not as in IRCA Log, “once aired German programming at times.” Earlier from 1200 were Mexican national anthems on 770, 730, 720, 700, 690 at least. It’s been months since I’ve been up to check these at sunrise which here today would be at 1216 UTC. Most of Mexico not already on DST suffers from it from April 4, pushing these events one hour earlier. Except Sonora which stays on MST UTC-7 year ‘round to match Arizona. [Hauser-OK]
- 770 **MEXICO** XEACH Monterrey, NL MAR 30 0242 – “Fórmula Financiera” mentioned and 0243 “Grupo Fórmula, Monterrey, 770 AM,” interference from another Spanish, hard to separate from south/southwest, probably Fresnillo. The mountain king station is XEACH. I thought conditions were somewhat auroral, but K-index at 0300 UTC is zero, no storms. [Hauser-OK]
- 770 **MEXICO** XEFRTM Fresnillo, Zac. MAR 22 0550 – Rock music, Spanish announcement; string of PSA’s including Secretaría de Salud Pública, Electoral, concluding with 3-tones which as pointed out by Mike Jeziorski in IDXD 88-13 is a giveaway that it’s Mexico. After that, PSA mentioning Tribuna Electoral, Zacatecas, so it’s XEFRTM rather than XEACH Monterrey or any other. [Hauser-OK]
- 780 **MEXICO** XEXY *La Poderosa*, Cd. Altamirano, Gro. MAR 22 0137 – Frequent call ID’s with “Y” as “jeh,” *La Poderosa*, mentions of Guerrero; often good; Gro. #5. Never heard here before, so unsure if they have newly returned to air. [Jeziorski-QRO]
- 800 unID MAR 30 0337 – Open carrier over CKLW, but not KQCV heard from that direction while this is southwest/northeast, suspect XEROK. [Hauser-OK]
- 810 **MEXICO** XEHT *R.Huamantla*, Huamantla, Tlax. APR 1 0201 – “Radio Huamantla” slogan, “El Radio Que Te Mueve,” location of Huamantla, Tlax. given; poor; Tlax. #2 of 2. Thanks to Hal Hoffman posting in the NRC Facebook group that this AM was back on the air and to Tim Hall confirming. [Jeziorski-QRO]
- 830 **MEXICO** XEITE *R.Omega*, México, DF MAR 21 1116 – Spanish Christian talk, brief Spanish inspirational vocals, woman with slogan 1124, formal ID, no anthem at 1200 UTC. Formerly non-Christian *R.Capital*. [Krueger-FL]
- 890 **CUBA** *R.Progreso*, Chambas MAR 26 0210 – Very good. ID by man: “La onda de la alegría de Habana,” into mellow Cuban vocal, gave regular mail and email addresses after song with *R.Progreso* mentioned. New, Cuba #22. [Knight-CO]
- 930 **MEXICO** XESAME Saltillo, Coah. MAR 26 0602 – Mexican anthem (single verse with children’s voices), full ID; poor; Coah. #4. Listed as a CP in the IRCA Mexican log, they are on air. [Jeziorski-QRO]
- 970 **MEXICO** XERFR *R.Fórmula*, México, DF APR 9 1059 – End of choral anthem, Casio-like computer blips, ID, string of phone numbers, gobierno de México wear your masks PSA, into news. Good, but brutal lightning noise. [Krueger-FL]
- 980 **COLOMBIA** HJES Cali MAR 26 0158 – Tentative. Poor signal. Six RCN time pips starting 02:00:15 UTC heard thru KQUE. Nothing else discernable. Most likely HJES which would be a new logging. [Knight-CO]
- 1050 **MEXICO** XEG Monterrey, NL MAR 23 0617 – Choral national anthem is just ending rather late after HCM/CST midnight, and then full florid legal ID for XEG, which I should record and copy verbatim, including street address in Monterrey, and 100,000 watts “efectivos” – as in ERP? AM stations normally are known by their transmitter power, although ERP can be calculated in different directions if they are not non-directional, which XEG supposedly be, day and night. 100/100 kW, WRTH and IRCA Log agree. At the moment it’s atop, but plenty of interference. Much of the time it is buried in all the U.S. interference vs this traditional Mexican “clear” channel. NRC AM Log shows 44 U.S. stations at night, one 50 and one 10 kW at distances, likewise in Canada, but U.S. mostly under 1000, under 100 or even under 10 watts! But it all adds up, piles on. I could easily believe XEG really run much less than 100 kW. Remember in the good ole days when it was a border-blaster in English with a simple address of Fort Worth, 11, Texas? [Hauser-OK]

- 1081.3 unID APR 3 0151 – Het against 1080 KRLD. Nothing this far off in mwoffsets; possibly local device, but the MW band is otherwise ‘clean’ tonight, no transatlantic carriers either. [Hauser-OK]
- 1300 **MEXICO** XEP R.Mexicana, Nuestras Noticias, Cd. Juárez, Chih. MAR 20 0802 – Full ID with slogan, call, location; good before KVET faded up; estado #20. [Jeziorski-QRO]

TRANS-PACIFIC DX

Transpacific carrier search: APR 2 1156 – Finding only 774, 747 and 828 from strongest to weakest, obviously the NHK2 big guns from Japan, i.e. 500 kW from Akita and Sapporo, only 300 kW from Osaka, respectively. But file as unID, since no modulation detected; and on R75 long wire, so no DF'ing. Tried for top of the hour time chimes at 1200 on 774, but too much splash from 780 KSPI Stillwater and/or an XE on 770 kHz. Today's Enid sunrise 1216 UTC. [Hauser-OK]

INTERNATIONAL NEWS

BONAIRE: The *Voice of America* wanted to cover Venezuela on medium waves. Negotiations had been conducted with the government of Guyana as well as with TWR since July 2020. Eventually an agreement was reached with *R.Libertad* in Barranquilla, Colombia, on 600 kHz. Unfortunately the power of the transmitter was too low: 50 kW. An agreement has been reached to use America's most powerful medium wave station, *TransWorld Radio*, Bonaire, on **800 kHz** with a power of 450 kW and a directional antenna. The transmitter is a Nautel, commissioned on January 30, 2018. The VOA program in Spanish "Venezuela 360" is broadcast between 5:00 to 6:30 p.m. Venezuelan local time (2100-2230 UTC) presumably Mon-Fri. [Radios du monde via Svern Martinsen, *ARC mw-eko*] Checking for it via TWR Bonaire SDR, March 22 at 2142 an interview is underway with someone fluent in Spanish but with obvious American accent. 2159 VOA ID and sign-off, quick ID as "PJB-98, apreciamos su sintonía," and back for more VOA. What's 98 about, an FM frequency? There's no PJB or any other Bonaire FM station in the 98s listed in WRTH 2021. [Hauser, WOR]

GUAM: 630 KUAM returning to the air. According to www.radioheritage.net KUAM ceased broadcasting 630 on May 1, 2020. It would continue on FM, streaming. No explanation of why. Now, an FCC application to move its transmitter site has been approved. The old site was leased on a month-to-month basis and could not be relied upon. The new site is at the KSDA shortwave facility with what appears to be a temporary antenna design, to be at reduced power but sufficient to cover the island. FCC AM Query now shows the original 10 kW info and, as applications, for a new site at 2.5 kW with a letter granting STA until September 20, 2021. A month earlier, in February, KUAM applied to change from commercial to non-commercial, and with a new licensee name, Good News Broadcasting, i.e. religious. Its old brand was *Isla 63* music, by Pacific Telestations. Expect the new facility to go on the air once the license transfer be completed, with weaker signal and new format. Matt Francis reported in the WOR iog: "The assignee – Good News Broadcasting Corporation – is the not-for-profit operator of Joy FM in Guam, KSDA 91.9 FM and KORU 89.9 FM in Northern Marianas Islands. According to joyfmradio.net, they assumed responsibility for the FM station sometime after 1992. It had originally started operating from the AWR-Asia studios in Guam in 1991, but Good News took over following a decision by AWR to shift away from local AM and FM broadcasting." [Hauser, WOR]

ITALY: Per new info from IRRS, broadcasts of World of Radio are scheduled via **594 kHz** which per WRTH 2021 is *Challenger Radio*, 5/1 kW at Villa Estense, Italy. Alfredo Cotroneo of IRRS tells me, "WOR will also be repeated on our IRN streaming channel and occasionally at other times on MW and SW. The list of our public streaming channels are available at nexus.org/MP3. The program Saturday at 1801 UTC is simulcast on 7290 kHz and 594 kHz. (Further World of Radio airings on 594 kHz are Sat 2334 and Sunday retimed to 2000 as 594 closes at 2100 UTC.) We also anticipate a move from 594 to **918 kHz** (much better frequency) later this summer, as soon as we receive final authorization from the authorities. LW **207 kHz** will also be activated at around the same time and we may also be able to schedule some broadcast there." [Hauser, WOR]

Catching up with where I left off at the end of December. The last new log in 2020 was 960 KLAD Klamath Falls OR on 12/19. No luck hearing the WNJC DX tests. I have them verified from Michigan when they were WWBZ. 2020 ended with 24 new stations heard and veries from 33 new stations. New veries in from 1030 KVOI, the KSEN DX Test and KLAD. I experimented with a 300 foot wire antenna running out the back in a drainage ditch pointed east and closer to the top of the hill. I heard a few stations better on it but have to pull it in at the end of the session because I've had antennas cut. New stations heard this year are 1/22 1190 XEPZ Heraldo Radio in Ciudad Juarez. Thanks to Tim Hall for the ID. 1/30 1230 KCUP Toledo OR DX test, only heard sweep tones a few times during 2 hours of listening. I haven't been very active and hope to get back soon. 73's, Martin

Jim Renfrew – 17065 Howard Road, Holley NY 14470 jim.renfrew@gmail.com

I just sent my 1000th medium wave QSL request, so let me take some time to review the results. My first request went to KGLC-910 in Oklahoma in 1982, and my 1000th request has gone out to WLIK-1270 in Tennessee. So this is a 40 year review, with an average of 25 requests sent each year. Some years I sent a lot more, and one year I only sent one.

The most recent QSL received, WBTX-1470 in Virginia, is my 684th response, so my success rate is 68.4%, not as good as FM which is around 80% or TV which is around 90%, but much better than shortwave with is closer to 60%.

I've heard around 2650 medium wave stations, so you can see that I don't write to every station that I hear. Why not? Time, mostly. But more than a few receptions would lack a lot of the necessary detail. For example I heard the legal ID at the top of the hour, with call sign and city of license, leading into network news, but no other distinguishing details, so there's little that would prove anything. Between 1976 and 1982 I sent no requests at all to the first 500-700 stations I heard, because I had little money to spare. Too bad, because some of those stations are long-gone.

It could be argued that I could send a sound clip or recording to the station, but I have only done that on rare occasions. It could further argued that if I sent requests to the station by e-mail it would be easier to add the audio clip. The truth is that I am rarely recording. I usually turn on the radio at my desk and work on other things, so I am not hovering over the radio so much. I have a lifetime's worth of Perseus recordings from Newfoundland still to review from 2020 on, so I am not eager to add more recordings that I may never get to. I will say, though, that organizing sound clips is a lot easier than trying to find brief recordings on a long cassette tape. I used to have a dubbing tape deck where it was much easier to record a brief segment onto a second cassette, but that machine died long ago, and who has the capacity to play cassettes anymore?

I do send follow-up requests, and 63 of these have resulted in a response, out of probably 150 sent, about a 40% success rate. By the way, in a follow-up I never suggest that the station has been negligent in responding, but that "maybe my original letter or your response got lost in the mail." It's easy to send follow-ups, because I keep a copy of every letter that I've sent, and can easily make a copy of it to include with my follow-up.

For domestic requests I try to use a colorful commemorative stamp, and I hand-address the #10 envelope so that someone's attention is drawn to it. I enclose a US or Canadian stamp, mailing label and a smaller envelope. I don't affix the return label because the station often uses its own envelope. The key ingredient is a prepared card that I mostly fill out, but with a spot for a signature. When I first wrote for QSLs in the 1960s as a teen in Connecticut the responses were often actual printed QSL cards, but those are very rare these days. Long ago, I would address my request to the Chief Engineer, but in the last twenty years I start with the Station Manager. I notice all kinds of titles used by the people responding, including a lot of receptionists.

I use a template for each letter that I send, adding in the details as needed. Whenever possible I try to say something in my letter that connects to the station's community, like "I used to live near there," or "I have visited your town in the past." One piece I often add is to suggest that the station's advertisers will be pleased to see how far their ads have reached. Or, if the reception is a 250 watt station from Texas, I include a little bit of info, not techno-babble, about how such a reception is possible. One time my QSL request to an Oklahoma TV station resulted in a QSL and a video cassette. It seems that my request, which included an explanation of the nature of sporadic E-skip, was read during the weather segment of the evening news, sort of a "stump the weather guy" moment, and the meteorologist allowed that skip is caused by clouds!

For international requests I use a meter stamp, instead of a postage stamp so as not to draw the attention of thieves, and I also use a printed label, nothing that would suggest to a thief that there is money inside. I've also tried registered letters. I keep the envelope as thin as possible. I have often used International Reply Coupons in years past, but have no idea if these are even used much anymore. On a few occasions I have gone to a stamp dealer to buy collector stamps that can be used by the respondent. I did that when writing to the Falkland Islands for a shortwave reception many years ago.

Some more about results: 60 countries verified, 48 states + DC verified, 10 provinces verified. If the house is ever washing away in a flood, or burning to the ground, the first thing I will grab is my album of international QSLs!

In annual trips to Newfoundland I have chosen to not seek QSLs from the 120 or so countries we have heard. It's just too much, plus preparing letters in languages other than my own is extremely time-consuming.

Buried in the basement somewhere are my 1960's medium wave QSLs, beginning with WABC-770 and WMCA-570, the two AM stations I listened to at the time. One of those early QSLs, WLIB-1190, as I recall, stamped "VERIFIED" on my postcard reception report and returned it to me, so I actually have an example of the kind of request I wrote in those days. "Yikes!" is all I can say. A postcard!

I've made a bold start on QSLs in 2021, with 23 requests sent out, and 10 responses. The best one I've heard from in 2021 is KFGO-790 from North Dakota.

Hi all back again with the highlights... Hit my GOAL I matched last year's total logged stations of 638, as of 4/11! Highlights for this muse are mostly the new ones and call changes to keep it short... **2/08** Logged a needed call change from KKRK-970 at 0600 "Balance Rock Radio 97.5..." ex-KXTA call change #7 this season. Next up on **2/14** 0800 my local KDFD was having automation trouble most of the night and "KGB... San Diego's Talk Station" snuck through the open carrier for a needed call change #8 ex-KFMB. **2/15** at 0800 on 1460 coming out of REL music "WRYT Edwardsville, **KHOJ Saint Charles...**" with Multi Station Covenant Radio Network ID and "Road Map to Heaven" program new #23 on the season and taped. Next up was **2/19** I had seen some posts on one of the mailing lists about a solar disturbance and taped overnight with the south oriented flag antenna. There was some southern enhancement and blockage of some northern signals yield 3 new ones in one taping session! some enhanced conditions to the south at 2300 "930 Breaking News Stimulating Talk ... The Answer KLUP Terrell Hills-San Antonio" to THN New #24 new on the season followed a little later in tape listening time coming out of a Dave Ramsey promo "This is News Talk 1350 AM KPNS Duncan. A Mollman Media Station" new #25. Both of them were literally alone on their channels! **2/20** an animated SS sports play by play promo on 1440 with "XEDF AM..." at 0400 for new one #26. **3/05** at 0800 "This is Radio San Toribio Amarillo Catholic Radio KSJH-LP 102.3, **1360 KTNZ AM & FM** and..." call change #9 ex-KDJW. Here is Major League Baseball (MLB) flagship information for the 2021 season from my Internet searches. Many of the team web sites did not list the names of the announcers, and frequently when they did, the biographies mentioned information such as "For the 17th season ...", which does not tell me if the bio page has been updated for the current season. I do not save the bio pages from each season. Please send me announcer information (and corrections), as some of the web pages either did not list the announcer names or were definitely from last season (and maybe did not change for this season, but I have no way of knowing). And sometimes I cannot determine if an announcer is on radio only, TV only, or both. Any copyright statement on an mlb.com page is probably placed there automatically, even if the page content has not changed for the current season.

http://en.wikipedia.org/wiki/List_of_current_Major_League_Baseball_broadcasters has broadcaster information, and that web site has been updated for the 2021 season (last modified on 8 April 2021, at 17:01 (UTC)). But some of the references date back to 2010.

Note that in some cases, the visiting team announcers will NOT be at the ballpark. They will be in the home stadium (or studio) watching the game on TV and announcing from the TV signal. This is to avoid unnecessary travel. (Better than announcing from ticker tape.)

In some cases I was not sure that the network list was for the 2021 season, as many lists were undated; I have noted which lists are unchanged from last season.

Note that if a station streams its broadcasts over the Internet, that the station cannot stream the baseball broadcasts because the Major League Baseball organization wants listeners to get a paid subscription via mlb.com.

GRAVEYARD DX UPDATE

Tim Hall, 1244 Crystal Springs Dr., Chula Vista CA 91915-2123
 TimHall1@gmail.com

1400 kHz

WEST	PA	Easton	Tim Hall	Lakeville, PA	52
KRUN	TX	Ballinger	Tim Hall	Ozona, TX	102
KUNO	TX	Corpus Christi	Tim Hall	Junction, TX	237
CBOD	ON	Maynooth	Tim Hall	Madawaska, ON	30
XEPF	MEX	Ensenada, BN	Tim Hall	Chula Vista, CA	52
XELH	MEX	Acaponeta, NAY	Tim Hall	20 mi SE of Cabo San Lucas, BCS	256

Some of the above records are "reclamations" of records published back in V59 #2. Long-time members may want to check the old columns in the NRC archives. You may find that a record you once held was either vacated over the years (XELH) or now qualifies as a primary or secondary record due to rule changes over the years (XEPF - main record-holder was in Hawaii; CBOD - removed at some point due to a 60-mile minimum which was later rescinded).

Looking ahead to 1400, the following stations have no US record: WAWO-GA, WHZP-ME, WKNW-MI, KEYL-MN, KEBE-TX, WRON-WV, CBG-NL. Here are some stations in states that may be audible from Canada, which currently have no Canadian record: KFTM-CO, WCYN-KY, KEYL-MN, KBCK-MT, KBRB-NE, WTSL-NH, KJDY-OR, KBJM-SD, KRSC-WA, KKTL-WY, KODI-WY, CBG-NL.

DX News Submission Guidelines

Most NRC members contribute to *DX News* by contributing to one or more of our columns. Each column has a volunteer editor who compiles information sent in by club members or found through research or personal knowledge.

Station loggings and tips should be sent to Domestic DX Digest (for stations in the United States and Canada) or International DX Digest (for all other stations). DDXD in turn is divided into East and West columns, with the line between the Eastern and Central Time Zones as the boundary. By longstanding custom, DDXD uses Eastern Local Time (meaning EST or EDT, depending on the season) and IDXD uses Universal Time (UTC). These columns run in every issue of *DX News*.

By and large, loggings should be current (usually not more than one month old) and should give some details of the logging. The goal is to provide a tip that fellow DXers would find helpful in hearing the station themselves. Loggings should be of unusual or rare stations for you. For DDXD, loggings of 50 kW “clear channel” stations within 600 miles or so, or stations you hear on a regular basis, should not be submitted. The rule of thumb is to report a domestic station not more than once a year. However, station news such as changes in format, call sign, patterns of reception, etc., can justify exceptions to these rules of thumb.

Your editors will very much appreciate it if you submit your loggings in the format you see here in print in *DX News*. For example, dates should be “4/14” in DDXD and “APR 14” in IDXD. The more time editors spend changing each of your loggings that say “4-14” or “04/14,” the less time they have to focus on the content of the column (and the more irate they’ll be when they see your next submission). Please try to keep abbreviations to a minimum; many *DX News* readers are not native English speakers. Ham abbreviations (other than QRM for man-made interference, e.g. other stations, and QRN for naturally occurring interference, e.g. static, which seem to be common usage among MW DXers) should not be used – your publisher is particularly not fond of “OM” and “YL,” not to mention “XYL,” which strike him as a bit dated and sexist for use in print these days.

Stations that still “verify” receptions with written or electronic responses to DXer reports are reported to Confirmed DXer (published every two months).

The next major group of columns are station news columns. AM Switch is a weekly column that includes official station changes from the U.S. and Canadian licensing authorities and format, slogan, network, and relay station information to update your *NRC AM Log*. This column was edited for many years by Jerry Starr and then by Bill Hale, but hasn’t had a formal “editor” since September 2012 – the publisher combines information researched by several different members. Members with information to contribute can send it to the publisher directly, or to Wayne Heinen, the *NRC AM Log* editor. Stations carrying professional and college sports networks are updated each year in Pro Sports Networks and College Sports Networks (this column is vacant, an editor is needed!). Other network lists are published from time to time. If you run across a list (or even a URL to an online network list), please send it to the publisher.

Forty years ago, most of *DX News* was devoted to Musings of the Members, edited for many years by the late Ernie Cooper, with narratives from each member about recent loggings and other activities. Today, Musings is rarely used to report loggings, but we still encourage members to write in about their DX activities and comment on the hobby and the club. Active debate and discussion is good, but please keep it DX-related. Virtually every political and personal viewpoint can be found in the NRC, but we have many other places to debate those things. Here, we share the hobby of DXing, and even if we differ on other matters, we can be brought together by radio.

We also run a number of achievement columns. Graveyard DX Achievements has mileage records for the stations on the local or “graveyard” channels of 1230, 1240, 1340, 1400, 1450, and 1490 kHz. These are maintained online (at www.nrcdxas.org) and updated in *DX News*. Domestic DX Achievements and International DX Achievements report total stations heard and/or verified by members. The publisher maintains these totals and runs them in *DX News* as space is available.

Finally, DX Toolbox is a (more or less) monthly column with tips on DX strategies, web resources, and other miscellaneous topics. SDR loggings that are too old for DDXD or IDXD but are nonetheless of general interest can be reported here.

DX News also includes feature articles on DXpeditions, technical topics (receiver reviews, antenna design, propagation theory, etc.), radio history, station profiles, DXing techniques, and anything else that may be of interest to the MW DXer. Material for publication not falling into any of our columns should be sent directly to the publisher. In general, you should not try to make your submissions “camera-ready” for publication – use minimal formatting and we’ll take it from there.

If you’d like to contribute to a column, but aren’t sure how to do it, you can always contact the column editor first for suggestions. Or you can contact the publisher – preferably by e-mail at NRCDXNews@gmail.com, or by regular mail too. Participation and contribution by the members are always welcome ... we hope to see your DX news in *DX News* soon!
