DX Tests: The Courtesy Program Committee (CPC) of the National Radio Club and International Radio Club of America are proud to announce another “Dual DX Test” this weekend (for those receiving e-DXN).

KJJR-880 Whitefish MT: Chief Engineer Todd Clark will be doing maintenance testing starting on Saturday, April 8 at 12:01 AM Mountain Daylight Time (0201 ELT or 0601 UTC), using daytime power and pattern. 10,000 watts. Programming will consist of sweep tones, Morse Code IDs, 1 kHz “long duration tones,” etc. The test will last two hours, until 02:00 AM Mountain Time.

KSEN-1150 Shelby MT will test the following day, Sunday, April 9 at 12:01 AM Mountain Daylight Time (0201 ELT or 0601 UTC), using daytime power and pattern. 10,000 watts. Programming will consist of sweep tones, Morse Code IDs, 1 kHz “long duration tones,” etc. The test will last two hours, until 02:00 AM Mountain Time.

Slow-Scan TV: Both tests will also feature the transmission of Slow-Scan TV images commonly used by amateur radio operators and increasingly by shortwave broadcasters.

The images are transmitted as audio tones in Scottie 1 format. KDWN recently used this same format in Las Vegas during their signoff DX Tests. SSTV requires computer software to decode. This can be done using an audio connection to your PC or holding a cell phone near your speaker.

SSTV is straightforward and works great. You can get reasonable images by picking up audio with your laptop without wiring.

Download the free MMSSTV app and try it out: hamsoft.ca/pages/mmsstv.php – another great app for Mac or PC is Fldigi from <http://www.w1hkj.com/>. You can also search the App store on your iPhone or Google Play for Android for “SSTV.” Lots of great apps are available.

Highly recommend you test BEFORE the weekend. The best bet is to tune to 14.233 MHz in

USB mode if you have a shortwave receiver. Lots of activity there most of the day.

At the station’s request, the Courtesy Program Committee will be responsible for verifying reception reports and issuing QSLs. All reception reports should be emailed to: dx@highnoonfilm.com. The new QSL rules for CPC-coordinated tests will be in effect for this test. Please read them carefully.

A big thank you to Chief Engineer Todd Clark who agreed to include SSTV and allow us to test this mode as an option for future tests. Also to Paul Walker, who arranged for all this.

And to Rob Keeney who encoded the images into SSTV format and provided technical expertise on incorporating them into our files.

From the Publisher: We are saddened to pass along the news that Gail Sampson, the wife of longtime NRC member John Sampson, [passed away](#) on March 17. John and Gail were married for over 62 years. Our condolences to John and all of John and Gail’s family.

Wellbrook Communications will be closing down at the end of April, with the retirement of owner-operator Andrew Ilkin.

STATIONS GOING DARK (OR NOT)

- 790 KOSY AR Texarkana – License cancelled Mar. 31 at licensee’s request; had been silent since Sept. 12, 2022.
- 880 KCMX OR Phoenix – License cancelled Mar. 13 at licensee’s request.
- 1060 KXPL TX El Paso – License cancelled Feb. 23 at licensee’s request; had been silent since Feb. 28, 2022.
- 1240 WHMQ MA Greenfield – License cancelled Mar. 20 at licensee’s request; had been silent since
- 1280 WDSP FL Defuniak Springs – License cancelled Mar. 30 by FCC for excessive silence; has been silent since June 9, 2021.
- 1530 KQSP MN Shakopee – License cancelled Mar. 23 at licensee’s request.
- 1560 WKIK MD La Plata – License cancelled Mar. 17, no explanation on FCC web site.

Attorneys for the licensee of deleted WEKC-710 Williamsburg KY have filed a “petition for further reconsideration” of the station’s cancellation; e-DXN users can read it [here](#). The station’s 2012 license renewal application (for an 8-year term) was held up for years due to unpaid fees, but under FCC rules a station can keep broadcasting while it’s license renewal application is pending. In 2020 the matter had not yet been resolved, but the station did not file a new 8-year extension application. So, in 2022 the FCC retroactively granted the 2012 extension but found that the license had expired in 2020 when it was not renewed. The licensee (an 89-year-old minister) is very unhappy.

From *Radio Insight* (Mar. 31): “After surrendering the licenses of 650 KPRP Honolulu and 940 KKNE Waipahu HI in December, SummitMedia requested the licenses be reactivated and now we know why as the company is donating both to Saul Levine’s Advanced Public Radio. In addition to his commercial licenses in Los Angeles and Monterey CA, Levine’s Mount Wilson FM Broadcasters owns 105.7 K289BE Kawaihae HI and Advanced Public Radio holds CPs for new non-commercial signals on 90.1 Holualoa and 88.3 Kahului HI.”

Nielsen: AM/FM Ratings Overtake TV For First Time (from *Radio Ink*):

In 2019, Deloitte’s Director of Research, Technology, Media & Telecommunications Duncan Stewart made a bold prediction. He said AM/FM audiences 18-34 would be larger than TV audiences for the same age demographic by 2025. It turns out Stewart was right, even if he did undersell by three years.

As highlighted in this week’s Cumulus Media/Westwood One Audio Active Group blog, Nielsen reports that radio’s total audience has overtaken television’s for the first time in media history. The Q3 2022 Total Audience Report shows radio’s average audience persons 18-49 is up three percent on TV.

With cord cutting and streaming on the rise, Nielsen data shows television reach among persons 18-49 has dropped -28% and time spent viewing eroded -56%, an hour and a half, since 2018. This

comes on the heels of Edison Research's 2023 Infinite Dial report, showing 73% of adults 18+ still listen to AM/FM.

With radio's celebration, a warning: if streaming can undercut an unprepared traditional TV industry, how does AM/FM ensure its audience?

Unreported Domestic Stations

No stations were reported to DDXD for the first time this issue since at least Volume 67 (1999-2000): KTAP-1600. In fact, we didn't really come close ... the longest non-reported station this issue was WMBG-740, last reported in Volume 81. We hold at 211 domestic stations on our list of stations not reported to DDXD in this century.

The full list of unreported stations was last published in issue 89-18 – we'll run it again over the summer, but if you want an updated list sooner, just e-mail the publisher at NRCDXNews@gmail.com. Let's see if we can get another one knocked off the list next time!

DX TESTS

- 990 WWKY KY Winchester** – 3/26 0002 – Code IDs (.-. -. -.- -. -.-) and swoop tones easily cutting through usual WDCX groundwave and CBW. **(MKB-ON)**
- 1150 WMST KY Mount Sterling** – 3/26 0013 – Code IDs (.-. -. -.- -. -.-) and various swoop tones, weak but clearly audible under near-local CKOC monster groundwave with CBS Sports talk. **(MKB-ON)**
- +++ – 3/26 0000 – DX Test mixing with WDEL, CKOC, QRN (thunderstorms somewhere) and a continuous tone on 1152 kHz made for more difficult reception of WMST than expected. --- NOTES FROM CANADA ---

Jon Pearkins jon@pearkins.com

As they promised, the CRTC announced license renewal decisions for a fairly large number of stations, most of them FM. But they've delayed their decisions on the many cited for non-compliance with Radio Regulations. All stations listed below have had their licenses renewed until August 31, 2030. The CRTC plans to announce its license renewal decisions for a number of stations soon, many of which have been cited for non-compliance with Radio Regulations. Included in this list is CHQR-770 Calgary, which is currently in non-compliance for simulcasting on FM.

****UPDATE****: The CRTC announced license renewal decisions for three more AM stations until August 31, 2030. The stations are listed below and each was reminded of the Revised Commercial

Radio Policy's expectation of 5% of the music aired to be from Canadian emerging artists. A new annual report is also required that details the amount of Indigenous content aired, including percentage of Indigenous music and number of Indigenous musical artists.

- 530 CHLO ON Brampton** – The License renewal notes the requirement to serve at least 12 cultural groups in 13 languages during each broadcast week. There was also a reminder of the Revised Commercial Radio Policy's expectation of 5% of the music aired to be from Canadian emerging artists. A new annual report is also required that details the amount of Indigenous content aired, including percentage of Indigenous music and number of Indigenous musical artists.
- 980 CJME SK Regina** – License renewal.
- 1050 CJNB SK North Battleford** – License renewal.
- 1280 CJRU ON Toronto** – The only Canadian campus radio station on AM is at Toronto Metropolitan University, formerly known as Ryerson University, which was famous for its broadcasting degree. CJRU is student-run and owned by Radio Ryerson Inc. License renewal continues the current 99 Watts non-directional.
- 1280 CFMB QC Montreal** – License renewal noted the requirement to serve at least 16 cultural groups in 16 languages.
- 1320 CJMR ON Oakville** – License renewal noted the requirement to serve at least 11 cultural groups in 15 languages, with a maximum of 62% of the broadcast week (6:00 AM to midnight) being brokered ethnic programming.
- 1350 CIRF ON Brampton** – The license renewal notes the requirement to serve at least 14 distinct ethnic groups in 11 languages during each broadcast week. \$30,000 per year in Canadian content development (CCD) was also detailed in the Renewal decision. The station transmits a non-directional 1000 Watts day and only 40 Watts at night.
- 1430 CHKT ON Toronto** – The license renewal notes the requirement to serve at least 14 cultural groups in 15 languages during each broadcast week.
- 1470 CJVB BC Vancouver** -The license renewal notes the requirement to serve at least 23 cultural groups in 23 languages during each broadcast week.

April Fools Day, April 1, 2023 included more joy than laughter for many working in Radio. As a federally-regulated industry, the new federal minimum wage of \$16.65 per hour effectively overrides the minimum wage in all provinces, since all provinces currently have a lower minimum wage.

Rogers plans to complete its deal to buy Shaw on April 7th after receiving final approval from all necessary federal government areas. Rogers owns radio stations, most notably the CityNews stations, but Shaw created Corus in the 1990s and moved all of its stations there. The Shaw family will continue to maintain its controlling interest in Corus.

Aurora conditions have been almost continuous over the last couple of weeks, only allowing Cuba's CMBQ-530 to make it to Edmonton once. And, even then, with Aurora conditions still blocking reception from some locations. The night of March 23-24 marked the first time in about 10 years that I could actually see the Northern Lights. Oddly enough, they were directly overhead and slightly to the South. Normally, they are close to the Northern horizon. Of course, Skywave reception was virtually non-existent.

Other licensing news . . .

- 910 CKDQ AB Drumheller** – The just-approved "Application for a technical amendment to a broadcasting licence for an analog radio programming undertaking" for co-owned CHOO-FM, also in Drumheller, makes reference to a proposed CKDQ-FM, which would replace CKDQ-910. It cites CRTC application 2023-0030-0, which has not yet been published. CHOO-FM can now increase power and make changes to its transmitter site in preparation for CKDQ-FM sharing the site.
- 990 CBF-16 QC La Romaine** – The CBC has applied to move this 40 Watt ICI Première (formerly CBC French AM network) LPRT to 95.1 MHz with 139 Watts. It will continue to simulcast CBF-8-FM in Trois-Rivières, Quebec.

--- U.S. STATION NEWS ---

News/Talk **1090 WBAL/101.5 W268BA Baltimore** has announced the addition of Premiere Networks' Coast to Coast AM hosted by George Noory to its lineup. The move returns the show to the Baltimore market after being dropped by 680 WCBM in May 2022. (**radioINSIGHT**)

--- DX TESTS ---

- 720 KDWN NV Las Vegas – 3/2 0258 – End of program, then “You and thousands of other Las Vegans listen to K-Dawn every day. Many of you do that on 101.5 FM and a few others on the AM dial at 7-20,” continuing with announcement of leaving AM. Fair, with XEDE and XEJAGC. **NEW! for Nevada #1 and state #32.** Huge thanks to the CPC and KDWN CE Tracy Teagarden for making this logging possible. I got them on their last day of operation. (MJ-QRO)
- 990 WWKY KY Winchester – 3/26 0001 – DX Test opening with Morse “VVV” ID, test tone, cell phone ring tone, busy tone, etc. Weaker than 1150 WMST and separate test audio. (TK-FL)
- 990 WWKY KY Winchester – 03/26 0001 – Fair signal noted under KFCD, with pause in Spanish programming, heard morse code. Relog DX Test: Also logged 04/10/2022 when last test was conducted. (JN-TX)
- 990 WWKY KY Winchester – 3/26 0005-0006 & 0023-0024 – Poor, with dial tone and then oscillating sound (up & down), more oscillating sound. (NB-WI)
- 990 WWKY KY Winchester – 03/26 0012:42 – As this is close to local clear channel 1000 WMVP, I had a hard time interpreting what I heard. I heard Morse code, and doubt that there was another station on that frequency testing at the same time. I did not hear any voice ID. 0013:25 – tone sweep. (BF-IL)
- 1150 WMST KY Mt. Sterling – 03/26 0000 – With WJBO and KSAL in pretty strong. 0000:32 noted continuous tone are couple of times; 0002:51 morse code was noted very easily under the dominant stations. Heard at fair signal. Relog: Last heard 04/10/2022 DX Test. (JN-TX)
- 1150 WMST KY Mt. Sterling – 03/26 0000:37 – Tone; 0006:44 – Tone Sweep; 0011:44 – Voice ID. (BF-IL)
- 1150 WMST KY Mt. Sterling – 3/26 0001 – DX Test with Morse ID, tones, etc. Singing ID, Marvin Gaye’s ‘What’s Going On,’ Tears For Fears “Head Over Heals’ and a few other songs mixed in. Man with ID @ 0100 mentioning “... testing withing FCC compliance... good engineering practices.” Better signal than 990 WWKY. Overall, about the same signals as the test on April 10th last year. (TK-FL)
- 1150 WMST KY Mt. Sterling – 3/26 0016-0019 – Fair-to-Poor, with what sounded like Morse Code, then up-and-down oscillation. (NB-WI)

--- UNIDS ---

- 1050 unID - 3/20 2014 – Suspect this is WFSC Franklin, NC, but it’s going to need work to pull an ID. Likely the unID David Crawford is hearing. Pointing roughly ENE. Oldies with James Taylor, Petula Clark, Prince, Sha Na Na and Stevie Wonder. One quick male-voiced “... on your AM 1050 ...” noted. Back up briefly at 2054 with Elton John’s ‘Rocket Man.’ XEW beginning to dominate the channel at this point with spots for Mexican and cross-border things in Spanish. (TK-FL)
- 1429.98 unID - 3/19 0705 – Spanish lady with, maybe Christian talk, or at least something brokered. Estimated reading (1429.978 – 1429.984) and seemingly very slightly variable. Maybe WOIR. (TK-FL)

--- CORRECTION ---

I claimed I heard, and at the time I was sure I heard KRLV back in 09/15/2022:

- 920 KRLV NV Las Vegas – 09/15 0559 – With commercial for ‘Ramsey Solutions.com.’ Male was noted saying “9-20 AM, 100.9 FM . . . radio . . . studio, this is KRLV . . . ,” then into ABC News. Fair signal under KYFR. New. (JN-TX)

After emailing with Tim Hall and reviewing the recording again, this is the true log!!

- 920 KXLY WA Spokane – 09/15 0559 – With commercial for ‘Ramsey Solutions.com.’ Male was noted saying “9-20 AM, 100.7 FM, from the _____ Construction, _____ and Concrete studio, this is KXLY Spokane-Coeur d’Alene, 9-20 News Now . . . ,” then into ABC News. Fair signal under KYFR. **New!** (JN-TX)

--- DX LOGGINGS ---

- 540 WXYG MN Sauk Rapids – 4/1 0738 – Mention of FreeGunLocksMN.com “. . . in St. Cloud” in ad, Calls, then James Taylor song. Poor, but no CBK. (JJR-MI)
- 540 CBK SK Watrous – 3/23 0406 – “Smartest Listener Contest” requires contestants to call in to phone # 1-877-322-8255. Answers sent by text or posted on social media will not be counted. Question: This Canadian invention is found in the majority of households? Mentioned producer Bernie Hamilton. Having a technical problem receiving calls. A caller from Phoenix, Arizona guessed it is the refrigerator, but this was not correct. Faded out by 0409. **NEW.** Recorded. (LB-CO2)

- 550 KFRM KS Salina – 3/18 0400 – With a couple of canned announcements with the call letters and one announcement with “Voice of the Plains” followed by the TOH ID (simply “KFRM, Salina, Kansas”) and then USA News. (RV-TX)
- 550 KBOW MT Butte – 3/30 0610-0621 – Mostly all alone, but KARI gradually faded up with typical 1960s-style paid religious program. KBOW was playing continuous Traditional Country music with no splitters until 0618:15: “If you’re not Country, you’re not trying. This is your hometown station, K-B-O-W.” Then mentioned AM frequency (not sure about FM), city and state. Then into a local ‘McDonald’s’ commercial voiced by the two owners with more local commercials to follow, ending at 0620:45 with another ID that definitely mentioned the FM frequency, too. Odd as, only a few hours earlier, 550 was nothing but KFYR. TRANS-PACIFIC DX

846 **KIRIBATI** *R.Kiribati*, London, Christmas Island MAR 17 0652 – JBA carrier, nothing else in 9/kHz splits; glad to detect again after several nights. Gary Pence KM5X says, “Kiribati is s8 at NH6XO in Oahu at 0728 UTC.” MAR 21 0706 – JBA carrier, the only 9/kHz split in MW bandscan. MAR 22 0645 – JBA carrier, as usual now, the only 9/kHz split audible in MW bandscan, getting too late for Europe even if otherwise propagable. APR 1 0636 – JBA carrier presumed *R.Kiribati*; and no other 9/kHz splits. [Hauser-OK]

Transoceanic carrier search: MAR 16 0619 – Only 891 and two beating on 1107 kHz. Het on WLS suggests 600/300 kW Algeria; 1107 surely two of the 20 kW *Radio 5* synchros in Spain. Still no trace of TP 846 Kiritimati. MAR 14 0630 – Surprised to detect no 846, Kiritimati off or out of season? But 1503, two signals beating slowly. There are a pair of low-powers each in Spain and New Zealand. Also a faster beat on 1305; there are several in Spain, only one in NZ, per WRTH 2022. MAR 23 0712 – No 846 Kiritimati; but 684 and 612 kHz. It’s rather late but maybe 684 the 150 kW Spain; 612 the 300 kW Morocco. Nothing Pacifican closer than Australia on 684, NZ on 612, per WRTH 2022. [Hauser-OK]

INTERNATIONAL NEWS

ICELAND: RUV East Iceland long wave transmitter switched off. The mast at Eiðar, at 218 metres the third tallest structure in the country, transmitted RUV radio services across the east of the country and out into the Norwegian Sea. In a statement, RUV say that the equipment needed to maintain the service is very expensive, and few radios now receive long wave broadcasts. The change is being made in association with Iceland’s Civil Defence and other bodies concerned with emergencies, as long wave signals have traditionally formed part of emergency communication planning. However, an upgraded FM system will take over this function.

The long wave signal from Eiður, on **207 kHz**, has been replaced by a more powerful FM network in East Iceland. RUV has increased the number of FM transmitters and renewed existing masts. Long wave transmissions will continue for a time on **189 kHz** from Hellissandur at Gufuskálar in West Iceland – Iceland’s tallest structure at 412 metres – but it too will ultimately close, and then the FM system will fully take over the role of safety broadcasts.

Speaking before the [March 1] demolition, Bragi Reynisson, director of technical affairs at RUV, said, “The mast will be cut down in such a way that it falls to the ground. Increased requirements for flight safety around Egilsstaðir Airport have called for us to take action and remove the mast. Of course, it is always problematic to demolish such a tall structure. We will be joined by a police team to ensure everything is safe nearby.” The construction and upgrades of the FM transmission system in less populated places started in 2017, and is progressing well. Transmitters have been placed in the Highlands, as have powerful sites at key locations for seafarers. Back-up power stations reduce the risk of transmission interruptions due to weather and power outages.

“There are holes in it [FM coverage], as there has been with long wave. But what we have done in recent years is to build a large number of transmitters in order to consolidate the FM system. And we have replaced equipment at older transmission sites, and we have also built backup power or battery backup power for up to 24 hours at all major transmission sites in the east. We strive to cover all year-round residential areas and all major roads and major tourist attractions. But unfortunately there will be places that are outside that are simply very difficult to reach. There we have to refer to other ways to make contact, such as for example through satellite systems such as Starlink or through satellite phones,” said Bragi.

Long wave signals travel for very long distances, and so have been useful to offer coverage of large land masses and sea areas. However, services are in decline worldwide, as ever fewer listeners now own radios that can pick up long wave. UK national broadcaster the BBC say that the ancient glass valves which allow their long wave transmitters to function are now so rare that fewer than ten exist in the world, and when one of the last two stop working, so will its service on long wave – although

the broadcaster will likely end long wave transmissions before that happens anyway. [www.ruv.is/english/2023-02-28-third-largest-structure-in-iceland-demolished, MWC *Medium Wave News*]

As I celebrate 50 years of listening to AM, FM, Short Wave and Long Wave radio, I have seen many changes. In the late 1970's, music on AM radio was going to FM radio; many say the disco era played a role. During the 1980's, AM stations were selling or changing their formats. It would be talk, sports, foreign language or another. If only the owners would have looked into the future, AM radio would not be sounding like it is today.

Today's issue of Musing Of The Members, I ask our DXers and readers to do like the late Tom Hall of 790 KABC AM would do: an open talk forum and help me answer a question. Why are AM stations simulcasting on the FM band?

Owners for example, like ABC, CBS and Metromedia had one AM and FM station in a major city. The Reagan Administration deregulated radio in the 1980's. Look where AM and FM stations ended up. Buyers like Emmis, Clear Channel and Salem were buying stations up and in turn, were sounding like one another and in the end, had to sell them off.

After a 10 year hiatus, I rejoined the N.R.C.; many AM stations were simulcasting on FM by now. For example, why KNX 1070 AM Los Angeles be on 97.1 FM? KDWN 720 AM Las Vegas on 101.5 FM? KCBS San Francisco AM 740 be on 106.9 FM? The Federal Communications Commission should tell owners like Audacy and others, "If you have an AM station, broadcast another format on your FM station." There will more listening offers to choose from.

In conclusion, if the radio industry can turn the clock back to the days of a company owning two stations maximum (one AM, one FM) in a major city, it would be great. I thank you and await response from our members. Until then, 73, Rene.

Three veries; WHAS-840, KDWN-720, XEPRS-1090. KDWN and XEPRS made my season!

2/11 heard weak REL talk on 1640, probably needed WSJP Sussex WI. 2/12 1330 heard country music, ID for WKDP Corbin KY for a new one. 2/13 my local 1420 WBRD Palmetto has been off. Daytime was a Spanish REL station. In the evening I heard Way Radio, WAOC St. Augustine FL for a new one. 690 had occasional fade up of Catholic REL station that was probably New Orleans. 630 had my UNID REL station in briefly.

2/17 800 WSVS in for a new one. 2/20 850 KOA in again but fades in/out. 2/24-5 listening to 1170 for WDFB DX Test, heard possible tone briefly so not enough to say I heard it. 3/1 surprised to hear the 720 KDWN DX Test. 3/2 tried for KXST DX Test but too much Cuba. 3/12 REL talk on 1160 probably KRKY San Antonio but faded before ID. 3/13 1060 XE NA and ID for XERDO La Raza at 1 AM, new. 3/15 Spanish songs and ID for WONQ on 1030, new. 3/19 WABC 770 in for a report. 3/20 1110 WTIS La Mega in at night, seems to be somewhat regular. 3/21 WBBR 1130 in for a report. 3/26 heard both DX Tests, WWKY and WMST. Reports sent, thanks! Martin

A series of technical problems, including a possibly fatal failure of my KiwiSDR, had kept me away from the dials between May and December of 2022, but the holidays gave me time to troubleshoot and a broken connection to the loop antenna was repaired. In the subsequent months I have been able to log a few Mexican stations that debuted on the air in recent months (XECPAD-1300 Xalapa, Ver. "Radio UV" from the Universidad de Veracruz; XECCBI-1370 Huamantla, Tlax. "La Más Peligrosa"; XECPAF-850 Jalpán, Qro. "R. Universidad Sierra Gorda"; XECSEP-1230 Culiacán, Sin. "Arre en Acústica"), but almost all of my new catches in 2023 have come from the US.

After finally reaching 500 stations logged at the end of February, my informal threshold for a "serious" logbook total, March brought a series of great catches as well as enjoyable and valuable interactions with the DX community on social media. The first was the alert sent out by the NRC, IRCA, and CPC that KDWN-720 Las Vegas would go dark, but air some brief DX test content before

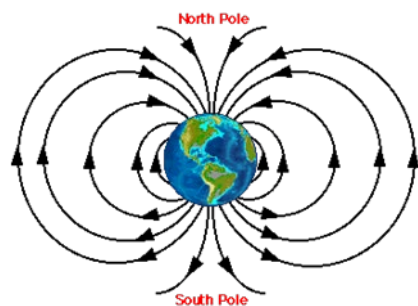

doing so. They stayed on until March 2, which was when I was able to pick up their farewell announcement. Details in the weak recording could be identified thanks to a clear one posted by Jacob Hammond in the tremendously helpful "mwdx" Slack channel that has been recently created. Jacob also alerted DXers to KZMQ-1140 Greybull WY staying on their day pattern at the same time, and I was able to pull out their weak signal under strong XEMR on my Perseus recording. From all of my various QTHs around the US and Mexico, I had never logged Nevada before, and Wyoming is always a thrill to hear.

Later in the month I spent time reviewing past SDR recordings and found that March 9 offered some interesting leads. On 1640 I could make out WSJP Sussex WI for state #33, previously reported in DX News by Terry Krueger in FL and Stephanie Battaglini in CA as the best way to log Wisconsin. I decided to spend the rest of March combing through the March 9 recording channel by channel, picking up a number of new Texans along the way, but when I reached 1000 kHz and heard an ad in English under a briefly faded XEOY, the phone number given matched perfectly with a law firm in the Seattle area. I shared the recording in both the Slack and NRC Facebook groups, and more careful listening and cross-checking with the law firm's website gave me the details I needed to pin down KNWN, formerly KOMO. (message to KNWN asking whether they had aired the spot went unanswered.)

During my Chicago-area DXing days in the late 70s and early 80s, KOMO was the best way to hear Washington, and at one of Robert Kramer's holiday get-togethers fellow college student and DX BFF Earl Higgins and I logged KOMO on their regular equipment test during the Monday morning silent period of WLUP (now WMVP). I never would have expected to hear the same station in 2023 on regular schedule from 2220 miles away. The support and enthusiasm shared by the groups on Facebook, Slack, and Loyd van Horn's outstanding live DX Central sessions on YouTube have made teasing out such rare catches even more fun and rewarding. Now, more than 40 years later, Earl and I can exchange virtual high-fives for our new catches across a variety of platforms. 73, Mike

Just back from another trip to CO where the AM band was a lot noisier than on past trips. The Airspy Discovery HF/YouLoop combination performed somewhat better on the HF bands than on AM compared to the C.Crane Skywave SSB with only its internal antenna, but the Crane did as well or better on AM. I haven't had the opportunity to go over all the recordings yet, but from the ones I did review, I found a few new stations to add to my CO log. The most interesting was R.Formula 1150 in Mexacli, Mexico. I also logged two Canadians I hadn't heard before: CBK 540 and CBR 1010. I tried the WMST 1150 and WWKY 900 tests and though there are local Denver stations on those frequencies. I thought I'd be able to pick out the CW IDs. No joy, but I did log those last year from NY 73.

Here is Major League Baseball (MLB) flagship information for the 2023 season from my Internet searches. Many of the team web sites did not list the names of the announcers, and frequently when they did, the biographies mentioned information such as "For the 17th season ...", which does not tell me if the bio page has been updated for the current season. I do not save the bio pages from each season.

Please send me announcer information (and corrections), as some of the web pages either did not list the announcer names or were definitely from last season (and maybe did not change for this season, but I have no way of knowing). And sometimes I cannot determine if an announcer is on radio only, TV only, or both. Any copyright statement on an mlb.com page is probably placed there automatically, even if the page content has not changed for the current season. If a network list web page has a different URL than last year, I treated the list as current for the 2023 season; I did not compare the list with last year's list.

http://en.wikipedia.org/wiki/List_of_current_Major_League_Baseball_broadcasters has broadcaster information, and that web site has been updated for the 2023 season (last modified on 28 March 2023, at 18:56 (UTC)). But some of the references date back to 2010.

In some cases I was not sure that the network list was for the 2023 season, as many lists were undated. If a list differed from the list I downloaded last year, I treated the list as new for this season, but the list to which I was comparing already had duplicates removed. Some lists have the same station listed two or three times, each with a different city (and maybe a different state).

Note that if a station streams its broadcasts over the Internet, that the station cannot stream the baseball broadcasts because the Major League Baseball organization wants listeners to get a paid subscription via mlb.com.

On the mlb.com site for some teams, the announcers are listed under the "Roster" tab. But many of the bios have not changed since they were written, so they refer to previous seasons.

I did not find the 2023 network list for the Arizona Diamondbacks (the list is unlinked and the same as last year).

And I am not sure that I have all of the Spanish-language broadcasts listed.
