From the Publisher: Wrapping up this issue for posting on e-DXN before the New Year. Thanks to all who supported *DX News* during 2017, and here's to lots of good DX to all of our members in 2018!

Help Wanted: We are still looking for a member who would be willing to edit DDXD-West, on either a temporary or permanent basis. And we are also hoping to find a member to compile the periodic College Sports Networks column.

If interested in either opening, please contact David Yocis at NRCDXNews@gmail.com. Also, for the time being, please send DDXD-West submissions to the same address.

NRC Verie Scanning Project: I want to let everyone know that BCB veries from Kermit Geary (SK), Bill Nittler (SK), and Carl "Skip" Dabelstein have all been added to nationalradioclub.org. A big thanks to members John Herkimer, Skip Dabelstein, and David Gleason (see his excellent historic site at <http://www.americanradiohistory.com/>) for their extensive work in scanning the veries and Kraig Krist who created the display format that we're using to show them off! – Wayne Heinen.

WRTH Raffle: How would you like a new 2018 WRTH for \$12 for USA members? (Sorry, the cost of postage to Canada and elsewhere is more than the cost of the book!) The NRC has 4 copies that will be available through this raffle. To receive a chance at the drawing, just send a postcard or letter to NRC WRTH Drawing, PO Box 473251, Aurora, CO 80047-3251. We'll draw 4 names of National Radio Club members in good standing (*your subscription to DX News or e-DXN.com must be current*) and notify the winner by phone, provided you supply your phone number. The 4 lucky winners will receive the WRTH after they send us \$12 shipping and handling (and a buck or two for the NRC TreasuryDeadline for your response in the PO Box will be Saturday February 10.

From *swling.com* (reposted on Facebook by Mike Brooker)

Since Overcomer Ministry leader, "Brother Stair" was arrested on multiple charges including sexual assault, I think many of us assumed his on-air programming would soon come to an end.

A number of private broadcasters had already pulled his programming after his arrest last Monday (Dec. 18). Now that Overcomer has announced the halt of all radio broadcasting—and the voice of Overcomer, Brother Stair, is in jail—their satellite and online feeds will likely replay old content.

Thanks to Shawn Axelrod, Bill Hale (BH), Mike Brooker, FCC Database (FCC), Mike Riordan (MR), DX Monitor (DXM), Charles Reh (CR), and Paul Snider (PS).

From the *DX News* archives

Compiled by Ron Schiller.

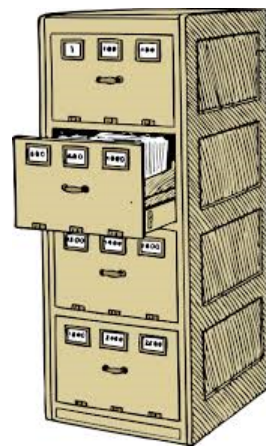

75 Years Ago – From the December 26, 1942 issue of *DX News*: A front page editorial deplored the fact that some Dxers had written to stations demanding to know why a verification of their report was not forthcoming! Marshall Blanchard (IL) reported hearing TIGPH-605, TIPG625, & TIBAS-655 Costa Rica with his "crystal." WJPF-1340 IL was heard by Joe Brauner(NYS) who also logged KWSO-OK to "complete" Oklahoma! When WJPF went AN, Ernie Cooper referred to them as We Jam Poor Frequency. OK's William Herman mentioned he was sick with the "grippe" (Ed: been years since I'd heard that term!) and missed the WLOF-950 FL DX Test. Buffalo, NY's Publisher Ray Edge seemed in awe of nearby Grant Batson's "exceptional location" in Westfield, NY.

50 Years Ago – From the January 6, 1968 issue of *DX News*: The DX Test calendar included WCMC-1230 NJ, WMCS-1400 ME, WILI-1400 CT, KRNR-1490 OR & WTSN-1270 NH. Among the participants in the Domestic DX Contest were NM's Fred Nordquist & NJ's Joe Fela. Newly married Ron Musco DX's with an HQ180A/150' long wire from Windsor, CT where he's an Electronic Tech. Stewart Drake (PA) logged his 42nd state capital, Phoenix, AZ's KOOL-960. G.A. Trower checked in from Brighton, UK. Among his goodies were Uruguayans CX140 1400 & CW45-1390! Jerry Starr (OH) received veries from 232 of his 245 reported stations (94%). Ev Johnson (IL) says CHAM-1280 was his only Canadian non-verifier from 158 loggings. Charles Rader reported from his Hamburg, NY shack; Dick Truax also from Columbus, Ohio.

25 Years Ago – From the December 28, 1992 issue of *DX News*: CPC said 160 DX Test requests were sent out and only 3 positive replies. Chicago's Robert Kramer (HQ129X & 2 loops) heard seldom-reported CFOB-640 Fort Frances, ON, a station he'd been chasing for years. Frank Merrill, then in IL, got his 45th state logging in WLAM (then 870) in Lewiston, ME. Paul Mount (OH) listed WKAQ-580 PR as his best NA logging for IDXD Achievements. The Dallas/Fort Worth market for radio in 1930 (per John Bowker) had all of 6 stations including WBAP, WFAA, KRLD, WRR & KFJZ. The 1930 US Census was the only one, I believe, that asked how many radios a family owned! By 1992, that number of AM stations in the DFW Metro had more than tripled to 21.

10 Years Ago – From the December 24, 2007 issue of *DX News*: WGHB-Farmville, NC billed itself as "Pirate Radio" even though it was legitimately FCC licensed and too far from Pittsburgh, PA to be in the (pro baseball) Pirates network! Bill Hale compiled a list of all the counties, parishes, etc. in the US & Canada; sold for \$8.95. Roy Barstow (MA) measured Guinea @ 1385.9 off frequency with his SDR coupled with a 50' flag antenna. CKEC-1320 NS-CAN is abandoning AM after 54 years to go to FM. CKEC grew from 250 watts in 1951 to 25,000 watts most recently, per Shawn Axelrod (MB-CAN).

- 1680 WOKB FL Winter Garden** – 12/27 0201 – For what it’s worth, noting Haitian kreyol in the sometimes overnights here. Woman alternating babble between coughing spells, lots of mentions of “Kanada” whatever the context of that was. Still in kreyol in the 0300 hour. **(TLK-FL)**
- WTTM NJ Lindenwold** – 12/17 0520 – Cuban-accented Spanish man with news items. Checking the Cuban national nets, not parallel. Then into Spanish mostly romantic ballads from 1031. Finally, Male English canned “WTTM, Lindenwold-Philadelphia” at 0600 and back to vocals. Over and under WOKB (Urban Gospel). First time here, in fact probably the first NJ log from here. Slogan is listed as Radio Unika, and simulcast WHWH-1350 (which Craig Cook in Central Florida was able to parallel weakly upon me sending out an alert regarding 1680). Here, only a strong Radio Ciudad del Mar occupying 1350. Running day power, or just decent propagation today? **(TLK-FL)**

Unreported Domestic Stations

Several stations reported to DDXD this issue were reported for the first time in more than a decade – but none for the first time this century. So we hold at 390 currently licensed stations in the United States and Canada that haven’t been reported to DDXD since at least Volume 67 (1999-2000). The full list was last printed in issue 84-18. Can you log and report one next issue?

A needed call change here, last heard as KEYF. Fair peaks with no XEG QRM until a bit later. (JW-CO)
- 1320 WGOE TN **Kingsport**- 12/26 0734 – Fair; time check “here in Grey” and “GOC.” Logged in 1985 as WKIN. Rare! (JJR-WI)
- 1330 KNSS KS **Wichita** – 12/26 0748 – Poor; 25 degrees Fahrenheit, in with unID sports (WTRX?) and REL (WBGW?). Calls finally at 0754, atop. (JJR-WI)
- 1340 KGGS KS **Garden City** – 12/24 0759 – Man with simple legal ID at 0759:52. Poor copy in KDCCO null but a new one, KS #54. This was my closest unheard station!! That honor now goes to KTMP in Utah, also on 1340, at 338 miles. (JW-CO)
- KICK MO **Springfield** – 12/20 1540 – Fading with financial talk with Dave Ramsey along with call ID. Heard in phase null of KGHM, Midwest City OK, which is strong here. (JR-OK)
- 1370 KWRT MO **Boonville** – 12/19 0810 – Spot for Edward Jones, followed by call letter ID and police blotter. Briefly fair but soon faded. A new one here, MO #57. (JW-CO)
- 1380 KLIZ MN **Brainerd** – 12/16 1800 – LID as “KLIZ-AM Brainerd-Baxter.” Poor under KOTA with local noise. (JW-CO)
- WKJV NC **Asheville** – 12/26 0808 – Poor with time check, sounded like station address “here in Asheville,” REL. (JJR-WI)
- 1420 KOTK NE **Omaha** – 12/21 0903 – News from Town Hall in progress, followed by Omaha weather and an ID only as “94.5 FM and 1420 AM the Answer.” Fair at best but not much QRM. (JW-CO)
- 1440 WGEM IL **Quincy** – 12/13 1859 – Quincy ad; program note for “Raider Report” with Quincy Notre Dame High School head coach Kevin Meyer; pause at 1859:50 but no LID inserted, just dead air. Fair and alone for a few minutes; ESPN followed, I think. (JW-CO)
- 1460 WJTI WI **West Allis** – 12/26 0726 – Fair with nonstop open carrier, first noticed 12/6! Unreal; an open carrier for 3 weeks. The FM 97.9 is fine! (JJR-WI)

- 1480 KBXD TX Dallas – 12/25 2100 – Out of SS music, “Radio Vida” and KBXD in accented EE. (WH1-CO)
- 1490 KKAN KS Phillipsburg – 12/19 1745 – Weak in a jumble of stations, but heard singing ID, then the signal was lost. New here. (JR-OK)
- 1540 KGBC TX Galveston – [1540.12] – 12/20 2020 – Off-frequency again, making a big het with 1540.0 stations, and shortly at 2023: “We’ve got you covered” on 1540, naming three more suburbs. I wonder how many separate announcements they have like this? Houston has *lots* of suburbs, but how well 1540 and 1480 cover them, especially at night, is debatable, and Siga is obviously having a hard time drumming up business. (GH-OK)
- 1550 KUAZ AZ Tucson – 12/25 1900 – Out of NPR, “1550 & 8989 FM KUAZ.” (WH1-CO)
 KXEX CA Fresno – 12/11 2158 – “Esta es KXEX Radio Guadalupe La Misionera” (WH-CO)

- KEBC OK Del City – 12/20 1727 – Full ID at this time: “You’re listening to NBC Sports Radio on KEBC Del City, 1560 AM The Franchise 2.” Fair and easier now that KKAA is silent. (JW-CO)
- KGOW TX Bellaire – 12/15 2358 – Out of Vietnamese talk by female, “KGOW 1560 AM Bellaire Houston” in accented EE. (WH-CO)
- 1570 KAKK MN Walker – 12/19 0959 – ID as “KQKK-KAKK Walker. It’s 9:00,” followed by news from Minnesota News Network and local weather at 1002. Not strong but good post-sunrise copy for nearly half an hour. Mixing with KVTK, also weak. Another new one, MN #60. (JW-CO)
- KTUZ OK Catoosa – 12/20 0953 – Mexican tunes, “La Zeta” slogans, Tulsa area ads; LID came at 1000:45: “KTUZ Catoosa-Tulsa La Zeta 15-70 AM, 101.9 FM” Last heard ages ago as KMYZ Pryor. Not strong but surprisingly readable for 1000 watts, 90 minutes past their sunrise. (JW-CO)
- 1580 WJFK MD Morningside – 12/26 0723 – Fair at 40+/S9! Thus, no CKDO. Veterans news, new format, ex-SPT. (JJR-WI)
- 1590 KDAV TX Lubbock – 12/22 2000 – Out of Christmas music, “AM 1590 KDAV Lubbock The Spirit.” (WH-CO)
- 1710 Pirate -- 12/18 0130 and 12/22 0810 – Screaming gospel huxter in Spanish, so typical Retén lo que Tienes, pirate from Baton Rouge LA, poor signal. (GH-OK)

TRANS-ATLANTIC DX

- 531 **ALGERIA** *Jil FM*, F'kirina Wilaya d'Oum El Bouaghi DEC 24 0458 – Good; choral marching band national anthem in progress at tune in, while 549 parallel was wiped out by a strong 550 WGR. [Conti-NH]

- 693 **UNITED KINGDOM** *BBC Radio 5*, Droitwich et al. DEC 26 1000 – Weak het against CKGM; presumed BBC5. Weak 1089 *TalkSport* and 1215 *Absolute Radio* also observed. [Conti-NH]

- 1053.1 **LIBYA** *R.Libya al-Wataniya*, Tripoli DEC 23 2330 – Loud het against 1053 *TalkSport*; after recently being close to nominal, now back to previous offset frequency, measured 1053.101 kHz. [Conti-NH]
- 1089 **UNITED KINGDOM** *TalkSport* synchros DEC 23 2300 – Good, but with heavy synchro echo; “On digital radio, and 1089 and 1053 AM, *TalkSport*,” and news by a woman. DEC 26 1000 – Weak het against 1090 WBAL; presumed *TalkSport*. [Conti-NH]
- 1125 **SPAIN** *RNE5* synchros DEC 24 2134 – Good; “Radio Nacional de España” mentioned in discussion parallel 1107 kHz. [Conti-NH]

PAN-AMERICAN DX

- 539.86 **NICARAGUA** *R.Corporación*, Managua DEC 24 1100 – Sign-on; carrier popped up just before 1100 UTC, throwing a het against CBT and WFLF. [Conti-NH]
- 750 **VENEZUELA** YVKS, RCR, Caracas DEC 26 0959 – Over/under WSB; promo, “porque lo bueno une” slogan. [Conti-NH]
- 770 **CUBA** *R.Artemisa*, Artemisa DEC 26 1059 – Under WABC; choral national anthem. [Conti-NH]
- 860 **CUBA** *R.Reloj*, Jovellanos//Bolondrón DEC 25 0213 – Fair for a few minutes with *R.Reloj* programming over a very weak CJBC. New. [Hayes-PA]
- 950 **CUBA** *R.Reloj*, Arroyo Arenas//Camagüey-Isábel Hortensia//Santiago de Cuba-Frente DEC 23 2300 – Loud wobbling and distorted RR Morse code. [Conti-NH]
- 1060 **MEXICO** XERDO *La Raza 1060*, Reynosa, Tamps. DEC 24 1206 – Canned “La Raza 1060” by man between Mexi-tunes. [Krueger-FL]
- 1110 **MEXICO** XERED *R.Red*, México, DF DEC 27 0739 – Male Mexico political talk, WBT mostly nulled, but some *R.Angulo* Cuba still present. [Krueger-FL]
- 1120 **MEXICO** unID DEC 27 0805 – Presume a Mexican, though not positive, however nothing U.S. appears to fit the format. Mostly Spanish romantic ballads, roughly pointing south/southwest and some KMOX co-channel still. Brief breaks 0929, 0937 and 0948, a couple times seemed to mention “La Invasora” or similar, though may not have been a slogan (and no Mexican or other Latin Americans located with that slogan). Audible daily until around 1200 fade. DEC 28 1147 – Spanish male and female chatter, one Mexi-tune. No Mexican anthem noted 1000, 1100 or 1200 thus far. [Krueger-FL]
- 1620 **CUBA** *R.Rebelde*, La Habana-El Sapo//Amancio//El Coco//Guantánamo-Antiguo DEC 21 0118 – Asserting thrice, “Armando y... en Concierto!” Good modulation and not parallel 5025 kHz. I suppose the MW outlet has switched to Rebelde FM feed as it often does. [Hauser-OK]

TRANS-PACIFIC DX

- 846 **KIRIBATI** *R.Kiribati*, London, Christmas Island DEC 17 0707 – JBA carrier from presumed *R.Kiribati*. DEC 18 0629 – JBA but steady carrier. Walt Salmaniw in Victoria BC says he is “seeing” it as early as 0300ish. Now visiting Hawaii, Gary DeBock tells IRCA Dec 17: “846 Christmas Island is by far the strongest DU here in Kona, but it seems to have a serious issue with the transmitter cutting out intermittently.” DEC 20 0704 – Reliable JBA but steady carrier. DEC 21 0528 – JBA carrier, but not heard at next check 0611 UTC. [Hauser-OK]
- 1017 **TONGA** A3Z *R.Tonga*, Nuku’alofa DEC 20 1134 – JBA carrier vs 1020 splash, presumably *R.Tonga* now reported to be leaving its carrier on all night. But there are also Christchurch and Sydney stations on 1017 kHz. [Hauser-OK]
- 1098 **MARSHALL ISLANDS** V7AB Majuro DEC 19 1333 – JBA carrier on the R75 with east-west long wire, no doubt V7AB, which leaves it on all night, after sign-off circa 1130(?). I was first checking 1017 kHz for Tonga which reportedly just started doing the same, but could not detect it. (846 Kiritimati signs off much earlier and does not leave carrier on, so no sunrise DX from it.) [Hauser-OK]

Here is 2017/2018 National Basketball Association (NBA) flagship information from the Internet. Many web pages did not list the announcers' names. And most of the network station lists are not dated, so I cannot be sure that the lists are current for this season; the same is true for announcer names. All of the team sites on www.nba.com have a three-horizontal-line menu icon, but on some of the team sites, this icon does not work. But ... all the nba.com web pages have a "do not reproduce" notice in the footer, so I am unable to reproduce those lists here. I list URLs, so you can download your own lists. This flagship list may not contain information on all the Spanish language broadcasts. Nor do I have all the "conflict" stations. Some of the teams' Media Guides have the flagship stations and announcers for each of the NBA teams; I am not sure if this information is accurate and/or complete.

Please send me any URLs to network lists you may have, as well as any additions and/or corrections to the information below. Thanks.

The Super/Ewe Antenna

Bruce A. Conti

The Ewe Becomes a SuperLoop

I've lost track of the time that's gone by, but it's been some 20 years since the SuperLoop antenna was introduced for AM broadcast band DX'ing. The SuperLoop was discovered by accident through various backyard antenna experiments. It all started as a super-sized Ewe antenna. First developed by Floyd Koontz WA2WVL and described in "Is this Ewe for You?" in QST Magazine, February 1995, the Ewe antenna was primarily for tropical band and 160-meters amateur radio applications. Simple to build, it consisted of two 10-ft vertical elements about 25 feet apart with a horizontal wire connecting the vertical tops. It looked like an upside down U, giving it the Ewe name. I super-sized the Ewe dimensions to 50-ft verticals and 75-ft horizontal for improved gain at medium wave frequencies.

The vertical bottom at the null end of the Ewe has a resistor termination to ground, and the other vertical bottom is fed to the receiver through an RF matching transformer, typically 9:1 for impedance matching to a coax lead-in. The horizontal wire 'forces' a phase shift between the two verticals which results in a wideband cardioid beam with a deep backside null.

Another desirable feature of the Ewe is stealth installation, an essential requirement for an antenna restrictive community. The verticals can be concealed against tree trunks with the horizontal wire hidden above in the tree canopy for a super-sized Ewe. A wooden fence or the wooden posts of a balcony can be used to conceal a smaller conventional size Ewe. Stealth installation is completed with a buried lead-in to the house.

Ewe termination resistance for maximum null depth varies between 700 and 1000 ohms typical based on ground conductivity. The problem with the Ewe; it requires an exceptionally good ground to perform well. Poor ground conductivity requires a higher termination resistance to produce a backside null, and the resulting maximum null depth isn't very deep. My experimental Ewe terminations varied between 1130 to 1800 ohms for the best null due to poor ground conductivity. So I began to experiment with different methods of improving the ground. Multiple ground radials, copper ground rods, and kitty litter bentonite clay reinforcement of grounds were tried without much success. I finally attempted to emulate high ground conductivity by connecting the termination ground to the RF matching transformer ground with a horizontal wire. Ewe ground rods and radials were replaced by the connecting horizontal wire and the SuperLoop was born; a rectangular loop in the vertical plane with an in-line termination resistor at the null-end bottom corner and the RF matching transformer to a coax lead-in at the other bottom corner. It was a 'floating' loop antenna with no physical connection to ground at the antenna. The SuperLoop produced a wideband cardioid beam with a deep backside null just like the perfect Ewe; inherently low noise, retaining the stealth construction of a Ewe with the loop bottom horizontal buried a couple inches, but not dependent upon a good ground. Eventually I discovered that I had stumbled upon a new configuration of a Flag antenna.

Back to the Future

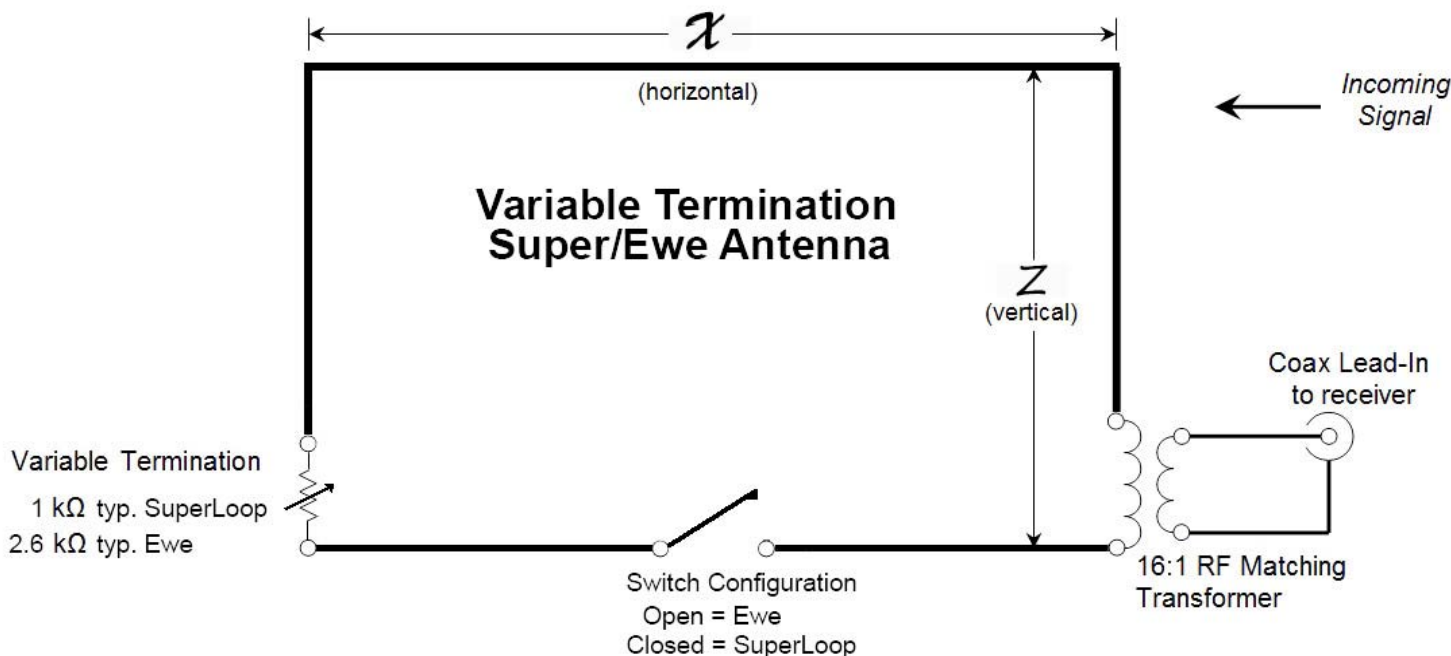

Now, 20 years later, the SuperLoop has returned to its roots as a Ewe antenna. Experimenting with Ewe models in EZNEC antenna modelling software, I learned that a Ewe with a poor ground produces a three dimensional wedge shaped pattern. The maximum backside null isn't very deep, but the wedge shape appears to produce comparatively less high angle skywave on the backside than on the front, and less high angle gain than a SuperLoop, while still maintaining good forward gain. This looked like it would be a worthy experiment.

A switch was inserted at the midpoint of the bottom horizontal wire of the SuperLoop. Open the switch and the bottom horizontal wire becomes two ground radials; one ground radial connected to the termination resistor, the other connected to the RF matching transformer. With the switch opened, the SuperLoop is now a Ewe antenna. Because the ground radials are rather short, and the ground conductivity is poor, it's a far less than perfect Ewe. So, I call it a pseudo-Ewe. Close the switch and the antenna is a SuperLoop. The switch can be a heavy-duty knife switch, a weatherproof toggle switch, or a banana jack and binding post connected outdoors. A remote-controlled relay switch that can be opened and closed from the shack is another option. I used a knife switch to prevent potential capacitive coupling between contacts when opened. This switchable SuperLoop/pseudo-Ewe antenna is named in short the Super/Ewe.

Super/Ewe in Action

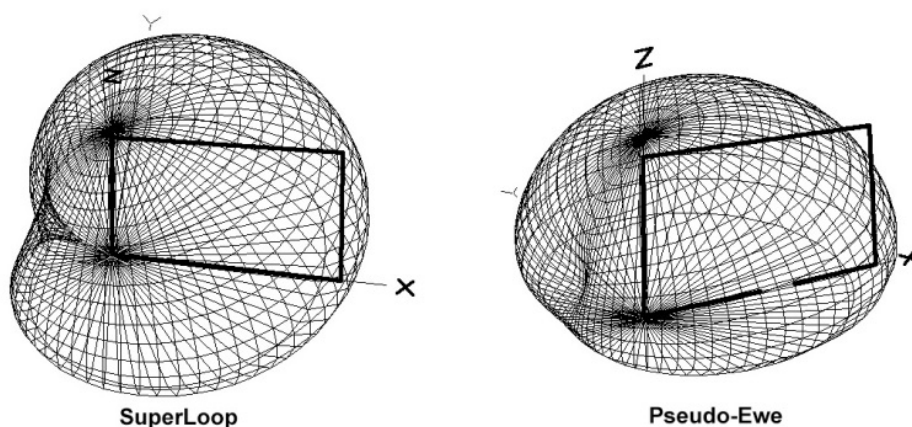

Experiments with the Super/Ewe switch opened for pseudo-Ewe operation have been positive overall. Although as expected the nulling isn't mind-blowing, the pseudo-Ewe's subtle rejection of

skywave interference seems to be enough to make a difference. A number of new domestic logs were entered within weeks of starting pseudo-Ewe operation, and it regularly hauls in readable signals from the UK and Spain here at the New Hampshire test site. If a deep pinpoint null of a specific signal is needed, then the switch is closed for SuperLoop operation.

The modification of an existing SuperLoop antenna with insertion of a switch is simple enough, so why not do it? Well, there is one caveat. A variable termination is required to get the best performance out of the SuperLoop and pseudo-Ewe antennas. SuperLoop termination resistance is usually under 1000 ohms, while the pseudo-Ewe is over 2000 ohms. Remote control variable termination can be transformer coupled, a motorized potentiometer, or a Vactrol. Fixed termination resistance of approximately 1200 ohms will get the job done if remote control is not an option. There is also a compromise between using the 9:1 RF impedance matching transformer specified for a Ewe, and a 16:1 transformer for the SuperLoop. The 16:1 match is more critical for the SuperLoop, and the pseudo-Ewe performance wasn't impacted significantly by 16:1, so I stuck with 16:1 for the Super/Ewe.

Results may vary depending upon ground conductivity and antenna dimensions, so be prepared to experiment with termination resistance and matching transformers to obtain the best performance out of a Super/Ewe. If nothing else, at least you'll have access to two antennas in one with unique reception patterns obtained by the flip of a switch.
