29 ... Graveyard DX - 1490 kHz

Eclipse DX: On the afternoon of Monday, April 8, much of North America will be experiencing a total or partial solar eclipse. Will you hear any unusual daytime DX as a moving patch of darkness travels the continent? Be sure to report DX News: Gordon Nelson presented data from anything of interest that you hear.

DXtra News: On Sunday, March 3 we sent out to e-DXN subscribers our first edition of DXtra *News*. The issue ran 18 pages and included some articles and longer Musings that we haven't had space to run in the print edition (some are in this print issue, others we will include eventually, others we'll probably never have space for), as well as some reference files – including a full list of all outstanding FCC construction permits.

We've got more stuff in the hopper and will probably have a second DXtra News sometime before the next print edition. Look for it wherever you receive your regular electronic DX News. So be sure your membership includes e-DXN if you want to receive this supplement to DX News, and if not the print edition will continue have all the most timely material that every AM band DXer is looking for!

One request: If there is a member(s) who would be interested in collecting material from the club listserve that would be worth including in DXtra News, please drop a line to David and let's chat -NRCDXNews@gmail.com.

NRC AM Log Sold Out: We are now sold out of the 44th Edition of the NRC AM Radio Log. Wayne and team will now turn to the preparation of the 45th Edition due out this summer.

From the Publisher: See you again in 3 weeks!

From the Archives

90 Years Ago: From the March 28, 1934 issue of DX News: The 500 kW transmitter of W8XO (WLW Cincinnati) requires 4300 amperes to light the filaments, and puts greater pressure on the earth (in pounds per square inch) than the Chrysler Building or the Eiffel Tower.

75 Years Ago: From the March 26, 1949 issue of DX News: WWOD-1390 (Lynchburg, Va.) was

pleased with the results of its DX test, with 42 reports received by the station broadcasting with 1 kW, directional to the east.

50 Years Ago: From the March 25, 1974 issue of Finland documenting the "mid-winter anomaly" referring to the observed fact that trans-Atlantic loggings do not peak with maximum darkness at mid-winter (except at solar minimum) but have two distinct peaks during the winter.

25 Years Ago: From the March 22, 1999 issue of DX News: Morris Sorenson submitted many loggings from his DXpedition to Coe Hill, Ontario. Paul Ormandy's article in the New Zealand DX Times was reprinted.

10 Years Ago: From the March 31, 2014 issue of DX News: New NRC board chair (and former DX News publisher) Paul Swearingen offered a "State of the NRC" report.

Good morning,

Thank you for reaching out and yes this is confirmation. Our radio station serves as traffic information for Lake County IL. We are the county north of Cook County which is where Chicago is located. We are known as one of the Collar Counties in the Chicago area. Our population is ~700,000 people with a traveling public of nearly 2 million, daily.

Our highway advisory radio (HAR), 1620AM, WQBR, has been online since ~2005. We have 5 transmission towers which you can read about on our website.

Believe it or not, you are not the furthest we've been contacted by. In the last 2 mo we have been contacted by two different people in Finland with a similar story to yours. It's fascinating to us. Thank you so much for reaching out!

If you have any more questions, please let us know and thank you so much again for sharing with us.

--- MAKE GOODS ---

I have some make-goods from last issue. Apologies to **Mike Jeziorski** for omitting one of his loggings which relates to another, to **Terry Krueger** for omitting his credit after a logging (just so you know), and **John Rieger** for omitting an historic logging of his DX career. Here are the loggings as they should have appeared in Issue 12:

- **610 WPLO GA Grayson 2/10 1920 –** Mexi-tunes, male canned "La Bonita 6-10" and back to vocals. Close to real-time parallel station stream. Some WAGG co-channel. (TLK-FL)
- **1120 WBBF** NY Buffalo 2/19 0737 Poor, with 'Flowers' by Miley Cyrus, killing KMOX for a few minutes. "Hot 98-9" slogan into chatter, then lost. A NEW! logging, for 1120 #9 and #2540 overall! (JJR-MI)
- **1340 KICK MO Springfield 2/20 0500 –** Legal ID for KICK and K222CT. Good. **NEW, for Missouri #5.** 1212 miles/1950 km. Two GY loggings [see 1400] at the same time from the same city more than 1200 miles away! **(MJ-QRO)**
- **1400 KGMY MO Springfield 2/20 0459** Legal ID and mention of 'Fox Sports.' **Fair. NEW! For Missouri #4,** 1217 miles/1959 km. Two GY loggings [see 1340] at the same time from the same city more than 1200 miles away! (**MJ-QRO**)

Station IDs for Canadian stations. The CRTC doesn't require hourly call letter Station Identifications but ISED, the federal government's Innovation, Science and Economic Development Canada department, does, for all individually licensed

radio stations, other than the CBC. A rebroadcast transmitter does not have its own license, but is part of a parent station's, and must be 100% simulcast with the parent station. Only the parent station must ID itself, though some choose to almost mention their rebroadcast transmitters. On the other hand, two separately licensed radio stations can simulcast but each station has to ID hourly. These days, with automation, most stations only ID their own station, though there are still a few holdovers from when the ISED regulations were originally written, before automation became popular, allowing multi-station IDs during simulcasting.

- **890 CJDC BC Dawson Creek** Was heard just north of Toronto, Ontario by Saul Chernos on February 23rd at **0038**, with a much stronger signal than WLS-890 Chicago. Meanwhile, CJDC is one of the only Canadian AM stations north of Edmonton, Alberta and Jon Pearkins, which means the station is either very strong or nowhere to be heard, depending on Aurora conditions between Edmonton and Dawson Creek. Historically, CJDC has a special place in the hearts of many Western Canadian broadcasters, as it provided the first job for many of them, on AM and/or TV. Not just announcers, but also camera and engineering staff.
- **1330** CJYM SK Rosetown DX conditions in Edmonton finally allowed CFYM-1210 Kindersley, Saskatchewan to be heard February 20th after several nights of failed attempts, checking against CJYM to determine the type of simulcasting in use. CFYM was at least 20 seconds behind CJYM, with each station doing its own ID, without mentioning the other. For example, CFYM was heard with a splitter "This is Our Music: Twelve Ten CFYM" at **0246** on February 20th. Obviously, there is no way to check now, but before they both began simulcasting CHAB-800 Moose Jaw, Saskatchewan, CJYM simulcast CFYM and they appeared to be playing the same music at exactly the same time. (JP-AB)
- **1340 CFKC BC Creston** This rebroadcast transmitter of CJAT-FM Trail BC should have been included in the recent list of stations that Bell Media has agreed to sell to Vista Radio, subject to CRTC approval. Other AM stations in the sale to Vista include CFTK-590 Terrace BC, CKOR-800 Penticton BC, CKIR-870 Invermere BC, CJDC-890 Dawson Creek BC, CKFR-1150 Kelowna BC, CJOR-1240 Osoyoos BC and CIOR-1400 Princeton BC. At the same time, Bell Media also announced an agreement to sell CKTB-610 St. Catharines ON to Whiteoaks Communications Group, also subject to CRTC approval.

TRANS-ATLANTIC DX

- **ALGERIA** *R.Algerienne*, F'Kirina MAR 2 0458 Fair; choral marching band national anthem. [Conti-NH]
- **ALGERIA** *R.Algerienne*, Ouled Fayet MAR 13 0648 Only TA carrier this late among lower spots checked such as 684, 711, 774, 855, is 891, surely the 300/100 kW Algeria, but again it has a slow beat SAH signifying one other station. Surely it's too late into the dayside for any others of considerable power in mwlist: Ethiopia, Iran, Lesotho, Sudan, Turkey. Could Eurafricans check on this? Could there really be a second synchro transmitter in Algeria? [Hauser-OK]
- **MOLDOVA** *R.Rossii*, Grigoriopol MAR 1 2300 Good signal but not much audio getting through adjacent 1000 WCMX, WIOO, and WLNL interference; off at 2300 as scheduled. [Conti-NH]
- **UNITED KINGDOM** *TalkSport* synchros MAR 17 2300 Fair; ad string through top of the hour including McDonald's whistling sounder, then ID, "...this is TalkSport," and football news. [Conti-NH]
- **ROMANIA** *R.România Actualitati,* Bacau//Resita MAR 1 0258 Good; choral national anthem. The anthem will play at 0158 after switch to summer time in Europe on March 31, the last Sunday in March. [Conti-NH]
- **LITHUANIA** *R.Baltic Waves,* Viesintos MAR 1 0100 Fair; Ukrainske Radio ID and time pips. [Conti-NH]
- **MOLDOVA** *Vesti FM*, Grigoriopol MAR 1 0000 Poor; signature touchtone phone sounder. [Conti-NH]
- **FRANCE** *TWR* Roumoules MAR 1 2300 Good; lively instrumental to one cycle of interval signal and off. [Conti-NH]

Transatlantic carrier search: MAR 10 0118 – 855(2) and 1098 are the onlies I can outmake, surely Spains and UK. MAR 12 0636 – Not a full 9/kHz bandscan this late, but checking a few likelies; only 711, surely Western Sahara. Nothing on 774 or 855 Spain, 891 Algeria. MAR 17 0233 – Nothing but 711 and 891 vs the high noise level, surely Western Sahara and Algeria. At 0609, only 711 and 882; I suppose 25 kW COPE Tenerife, Canarias most likely on 882 vs a 10 kW in Wales. [Hauser-OK]

PAN-AMERICAN DX

- **CUBA** CMBQ *R.Enciclopedia*, Villa María FEB 21 0300 Fair; able to understand *R.Encicolpedia* in Spanish. [Todd-SC] FEB 25 0655 Instrumental music featuring what sounded like a pan flute. All alone and good. Parallel station stream. 10 kW at 2,184 miles. [Battaglino-CA] MAR 7 0725 Strong signal with elevator music but more than usual white noise from the skywave bounces. [Pearkins-AB]
- **CUBA** *R.Rebelde*, Guantánamo MAR 2 0500 Good, over *R.Enciclopedia*; midnight lullaby and choral national anthem. [Conti-NH]
- **MEXICO** XETX *La Ranchera de Paquimé*, Nuevo Casas Grandes, Chih. FEB 25 0711 In between ranchera songs, *La Ranchera de Paquimé* noted by male. Also parallel stream. 700 watts at 545 miles. [Battaglino-CA]
- **MEXICO** XEWA *Los 40*, San Luis Potosí, SLP FEB 0803 Poor, but there in mix with XESURF, XETX, and probably XEHS; a hip-hop tune in English by Teddy Seims, followed by a tune by Feid and ATL Jacob, Los Cuarenta mention between songs. 150 kW at 1,233 miles. [Battaglino-CA] MAR 6 0707 Usual, for them, very dirty white noise from skywave bounces almost obliterating the Mexican pop music. CBK Watrous had a poor signal that was easily nulled. [Pearkins-AB]
- **MEXICO** XEHS *La Mejor*, Los Mochis, Sin. FEB 27 0902 In between Mexican instrumental tunes, "La Mejor" by male popped up from underneath XESURF. Also noted "Los Mochis, Sinaloa" by same male announcer at 0906 UTC. 2.5 kW at 700 miles. [Battaglino-CA]
- **CUBA** *R.Rebelde*, Pinar del Río MAR 2 0500 Poor through WDEV; midnight lullaby and anthem parallel 530 kHz. [Conti-NH]
- **MEXICO** XEPL *La Super Estación*, Cd. Cuauhtémoc, Chih. FEB 25 0700 ID for 91.3 XHEPL with AM mentioned, studio address; good with KTSA; Chih. #15. Heard widely during Loyd

Van Horn's frequency challenge covering this channel, so they may have upgraded. [Jeziorski-QRO] FEB 25 0748-0752 – Poor. Rose up briefly out of mix with a female vocal ballad in Spanish. Parallel station stream. 150 watts at 669 miles. [Battaglino-CA]

- 560 **MEXICO** XESRD *La Tremenda*, Santiago Papasquiaro, Dgo. FEB 25 0810 Poor, well under KLZ talk; a female vocal tune in Spanish that matched the station webstream. New! 1 kW at 893 miles. [Battaglino-CA]
- 590 **MEXICO** XEE *R.Fórmula Durango*, Durango, Dgo. MAR 9 0512 *R.Fórmula* programming and call ID with XHE clear; poor under XEPH; Dgo. #3 and final among active Durango AMs. [Jeziorski-QRO]
- 600 **MEXICO** XEHW *La Mejor*, Chametla, Sin. MAR 10 0709-0718 Under KOGO; mix of Mexican music that matched the station webstream. *La Mejor* mentions between songs. 1 kW at 981 miles. [Battaglino-CA]
- 640 **CUBA** *R.Progreso*, Guanabacoa MAR 11 0544-0555 Poor under KFI C2C, but rose up on a couple of occasions to first copy a female singer performing what sounded like an inspirational song in Spanish, also copied a male singer performing a ballad in Spanish. All were parallel station stream. 50 kW at 2,183 miles. [Battaglino-CA]
- 690 **MEXICO** XEWW Rosarito, BC MAR 6 0710 All alone with Mexican pop dance music and one Spanish word splitters. At 0857, it was male Spanish talk while nulling a similar strength signal from CBKF-1 Gravelbourg. Unusual to hear XEWW here, with CBU Vancouver in almost the same direction and CBKF-1 often too strong to null. Checked 1090 at 0715, looking for XEPRS but just a mediocre signal from KPTR Seattle. 540 XEWA was noted (see above), however. [Pearkins-AB]
- 800 **BONAIRE** *R.Transmundial,* Kralendijk FEB 21 0202 Fair, assumed on seeming to be the same organization as the stations in the AI translation: "This is Transmundial. Broadcasting via satellite throughout Brazil..." [Todd-SC]
- 870 **MEXICO** XETAR *La Voz de la Sierra Tarahumara*, Guachochi, Chih. FEB 26 1237 Messages and announcements in Spanish, switching into indigenous languages from time to time; **CST** time checks (still can't get used to Chihuahua now being on CST instead of MST); occasional rustic flute and fiddle inserts; frequent *La Voz de la Sierra Tarahumara* slogans and call letter ID's; also heard one ID as "La Voz de los Pueblos Indigenos de Chihuahua." Noted several government PSA's at 1250. Fair signal and alone on the frequency with almost no fading for nearly 15 minutes – very enjoyable listening. [Wilkins-CO]
- 890 **CUBA** *R.Progreso*, Chambas FEB 20 0826-0830 Popped up enough from underneath mix of KDXU and KSAC to copy a very distinctive female vocal that matched the station webstream. New! 200 kW at 2,399 miles. [Battaglino-CA]
- 1000 **MEXICO** XEOY *Stereo Cien*, México, CMDX MAR 2 0835 Steady, but under KNWN; Queen's Another One Bites the Dust. Parallel stream. New! 20 kW at 1,451 miles. [Battaglino-CA]
- 1000 **MEXICO** XEFV *La Rancherita*, Cd. Juárez, Chih. MAR 4 0714 Rose up against the mix with ranchera music and Rancherita mentions by male. 250 watts at 594 miles. [Battaglino-CA]
- 1020 **CUBA** *R.Artemisa*, Bahia Honda MAR 4 0459 Distinctive sounder and Cuban anthem; very poor; Cuba #26. [Jeziorski-QRO]
- 1020 **HONDURAS** HRPN *R.Visión Cristiana Internacional,* Choluteca MAR 3 1130 "Radio Visión Cristiana Internacional, la emisora de dios," which is similar to KCKN's slogan except for the final phrase; poor; Honduras #6. [Jeziorski-QRO]
- 1040 **CUBA** *R.Mayabeque*, Güines MAR 3 0656 Underneath WHO; clearly heard the wobbler wobbling away... Effectively serving as a DX test of sorts. New! 10 kW at 2,208 miles. [Battaglino-CA]
- 1040 **MEXICO** XEPLE *R.Palenque*, Palenque, Chis. MAR 7 0500 Far off frequency at 1039.733 with promo for program and "la frecuencia de tu corazón, 1040 AM, el Palenque"; fair; Chis. #4. [Jeziorski-QRO]
- 1050 **MEXICO** XEBCS *La Radio de Sudcalifornia,* La Paz, BCS MAR 3 0750 – Steady but well underneath KTCT; a mix of Mexican music that matched their web stream. 10 kW at 760 miles. [Battaglino-CA]
- 1050 **MEXICO** XEIP *La Poderosa,* Uruapán, Mich. MAR 2 0752 Poor, underneath KTCT's ESPN and XED's disco tunes; a Mexican tune that had an accordian lick that repeated a high note several times that could have passed for a DX test! Parallel webstream. New! 1 kW at 1,328 miles. [Battaglino-CA]
- 1060 **MEXICO** XERDO *La Raza*, Matamoros, Tamps. FEB 21 1341 Presumably the one with "La Raza" slogans and Mexican music. Poor copy, even with local KRCN off the air. [Wilkins-CO]

1555.1 unID MAR 7 0347 – JBA carrier direct, but cannot detect at UTwente, Maryland or Missouri SDRs. Could be real spur of North American station, or internal birdie on the NRD545; too far to be a likely variant from a TA 1557. Or Cayman Islands reactivated? Hi. [Hauser-OK]

TRANS-PACIFIC DX

1422 **JAPAN** JORF Yokohama MAR 1 1323 – Probably the one with snippets of audio sounding like Japanese talk. Not enough to count it yet, but this is what west coast DXers usually hear on this frequency. [Wilkins-CO]

It is rare that I submit anything to Musings these days. For most of the 60+ years that I have been a member of the NRC, Musings was where you did your actual DX reporting. This reporting has since been moved to the DX Digests columns, something I try contribute to regularly. Still, the Musings section affords us members an avenue to communicate on a variety of BCB DXing topics.

In recent years, we have seen the disappearance of annual NRC Conventions. Given our aging membership, and ever-increasing logistic and financial requirements, it is totally understandable. Still, face-to-face communication has always been a key element of the success of the DXing hobby. Without conventions, I believe members need to become a little more sociable in other ways, particularly when it comes to our older members. It is sad to open up a new *DX News* to read of the passing of one of my long time DXing friends or acquaintances.

If there are any long-time NRC members near you, may I suggest you periodically give them a call, and even make an effort to visit them. Let them know you are thinking about them. I try to do that. George Sherman, former long-time Twin Cities member of the NRC, now resides in an assisted-living facility in Minnetonka. I call him every few weeks, and occasionally take him out to lunch. Dave "Ghoti" Fischer, former huge technical supporter of the NRC now lives in a retirement community in the Kansas City suburb of Lees Summit. Whenever Karen and I visit our two daughters in the Kansas City area, I try to get together with Fish to chat DXing over coffee or lunch.

Think about doing something like this. These old DXers really appreciate it.

For the past few weeks I've been hearing radio station WOKV-AM on 690 kHz. from Jacksonville, Florida in the evenings. Even with WPTF-AM on 680 kHz. from Raleigh always coming in at all hours with a Grade A signal I've been able to hear WOKV-AM almost as clearly as a local station. They are a two-site operation with 50 kW non-directional daytime with their transmitter and tower located south and east of Jacksonville and their nighttime signal is supposed to be coming from their six tower array west of Jacksonville beaming east near the town of Baldwin. Their nighttime power is

supposed to be 25 KW. I do know that during hurricanes and other major disasters they have been known to operate with their 50 kW daytime signal at night to help their listeners with safety concerns but I can't figure out why they have been heard so strong lately at night. They announce with their call letters and also you'll hear "ESPN 690 Jacksonville" or just "ESPN Jacksonville."

It is now 5:03 PM on Saturday, March 9th (EST) and I'm hearing WOKV-AM with a very clear and strong signal and they are announcing a Florida State-Miami basketball game with Florida State winning by five points with around three minutes left to play. I'm using the C. Crane 2E radio with the regular C. Crane antenna on the set. Interesting to note that WAPE were the old call letters for WOKV and they actually used to broadcast the sound of an Ape when they gave their call letters and ID on the hour. This happened years ago. There is still a WAPE-FM on 95.1 MHz. with 100 kW in Jacksonville, Florida and both WOKV-AM and WAPE-FM are operated by Cox Radio, LLC out of Atlanta, Georgia.

DXing here in NW Florida -- about 35 miles south of the Alabama state line, has been invigorating after 35+ years in Clearwater, FL and before that, near Orlando. And before that, near Ft. Lauderdale where as a kid, the radio bug first bit when a school mate brought a Hammarlund to the geography class as his project, tuning the shortwaves to Radio Moscow in English, the BBC, RHC, HCJB and others mid-morning. Here, near Ft. Walton Beach, there's only two truly local MW stations (two others repeatedly file their status as active but have been silent for the five years I've been here). This absence of local blockers allows for excellent MW DX. One other thing I've noticed here is the amazing "tunnel" that runs from Alabama through the Tennessee Valley. FM channels are a bit more busy, but some of those frequencies are from stations in somewhat distant Panama City and Pensacola, FL; and Dothan and Mobile, AL;

Here's a topic to spark the rapidly dying-off Old School NRC members just for fun: Why can't we be consistent with reporting ALL loggings in UTC/GMT/Z times/dates? Do you realize how time consuming it is to convert times/dates and formatting for individual editors, much less how convoluted this must be to translate for members in say, Europe, Australia/NZ, or Japan? Maybe you, as a contributor, semi-understandably don't bother to convert/format, but I do to save the editors the time and effort. Plus, there are for a fact several who do not report their valuable reception reports and/or they are rejected for just the above reasons. And while we're at it, how about consistent DXD-W, formatting for all columns (DXD-E, IDXD): FREQ/STATE (or) COUNTRY/DATE/TIME/DETAILS/CONTRIBUTOR or whatever format is chosen.)

Verie, WNIS-990. DX: 2/16 morning listening caught 1090 WBAL for a new one. Then 1160 WCFO heard briefly with Rel and The Quest slogan. 2/19 810 WZYN heard with Rel program for a report. 2/20 heard EWTN on 690, tentative on WQNO New Orleans. 2/25 790 WNIS in well for a report. 2/29 leap day, 1130 caught Radio Estrella and WALQ ID. 3/2 my first Canadian, 740 CFZM in at 5:40 AM with local ads and Zoomer Radio slogan for an email report. 3/13 640 heard Fox Sports Radio under the Cuban, probably Royal Palm Beach FL station. 990 had a tone that turned out to be a het. Heard CBS Sport Radio in there, presumed WNML Knoxville but no ID. Also hearing a Haitian REL station. Lots of tentative stations and a couple daytimers on at night. That's the fun part of DXing. 73's, Martin

Here's how I have been enjoying domestic MWDXing the past triweek:

960, March 10 at 0119 UT, during a TA 9/kHz -1 bandscan, I notice no slop from local KGWA Enid upon 953 or 962 kHz, is it off? No, it's on but dead air. Its 100.9 translator tail wagging the 960 dog is also silent. Immediately I deploy my altazimuth wrist-mounted DX-398 to null what's left of KGWA. There are several weak stations, but one is slightly more dominant. KGWA blasts back on at 0130 with adstring and weather, 0133 back to dead air. So I resume listening intently trying to pull some IDable info. It's basketball with a team named Tigers, low score so far, 11-11; mentioned Kansas?, and at two different times <u>worldunion.com</u>? in ad. Must not be that as it's something in Shenzhen, China, and the website is nothing but a placeholder. 0200 UT, KGWA blasts on again with legal ID as ``Talk 100.9``, AM 960 an afterthought, and Townhall News until 0206 legal ID again, twice, 0206.6 fraxion of a word from whatever far-right extremist network talk program is supposed to be on, and back to DA. THN not among the nets listed for KGWA in NRC AM Log.

Among other 960s I've heard before during KGWA's 'Fox-hole' at local midnight a few years ago are KGKL San Angelo TX, and KNEB Scottsbluff NE, but searching on those does not find any Tiger games now, or ever. It's far too common a team name. A better possibility is KZIM Cape Girardeau MO. Its website is inconclusive, but at 0238 UT the stream is carring a Mizzou Tigers vs LSU game, so that's it! KZIM is also at a more favorable angle than the others to take advantage of KGWA's null. KGWA has been on an STA of 250/250 U1 which expires March 19 unless renewed again; otherwise 1000/1000 U3. Maybe that help such DX a little. It was reading only S9+10/20 from a few miles away, or 1.61 times as many km. KZIM, 500 watts night, has a pretty good ``butterfly wing`` lobe thisaway; notch to the NW so not protecting KGWA at all.

750 kHz, March 12 at 0638 UT, two weak sigs mixing, one talk, one rock. Checking since WSB had been reported off. They make a SAH of 40/minute = 0.67 Hz apart. If on at full 50 kW U1, WSB should be dominant. Shortly the music morphs to talk? Some net talkshows do have music breaks. But *0647.8 what must be WSB cuts on with bigsig talking. From experience, I know the most likely other one would be CKJH, ``Beach [sic] Radio`` in landlocked Melfort, Saskatchewan, 25/25 kW U4 despite supposed to be direxional-north at night. Many Canadian MW fail to protect US stations as licensed. For once, the SAH fits neatly per mwoffsets, both measured last August: CKJH on 749.9995, WSB on 750.0002, i.e. 0.7 Hz apart!

1120, Mar 13 at 2214 UT, no signal, trying the refurbished Wellbrook loop; nor on the internal shortwire, yet JBA carrier daytime from NE or TX on 1110. Suspect KETU Catoosa = Tulsa mkt in Spanish, be off. Licensed 10 kW D4, CH 7 kW. D4 means two different patterns for day and critical hours. Never a bigsig here. Day pattern favors N/S with a notch to the NW but we are close to due west. CH pattern almost identical but a bit smaller, both also with a notch toward KMOX. Recheck at 2305-2310 UT on two other radios, still no KETU --- but with the DX-398 I do get a DF fix on the horrible line noise level, totally different than the source a mile or so away that OG&E repaired a few months ago. Then I`m getting a JBA 1120 carrier from the direxion of KMOX. I reported KETU a lot in 2022y but not 2023y, yet I think it was mostly there last year. Nor have I found any FCC news about it from IRCA in 2023 or 2024. Recheck March 17 at 1602: KETU 1120 still off.

Until the Next? Best of DX and 73 de Glenn

I read about Linda Brodsky's RFI (radio frequency interference) problem described in Vol. 91 No. 9 of *DX News* (Jan. 23, 2024). Hopefully she has resolved her issues by now, but if not, here are some suggestions.

First, you stated that you suspect one of the electric poles near your home may be the source. I'll address that later in this letter. To be certain, first ensure that you are listening to the interference on a battery-powered radio, then turn off each circuit breaker in your home panel box, one at a time. Does the interference go away? If so, find out which devices turned off when the noise stopped. It will be a simple process of elimination to locate the problem device.

Once you're confident, using the above procedure, that the noise is not coming from something in your own home, you can proceed to look outdoors.

Do you have a (somewhat) directional antenna and AM portable you can use outdoors? Some radio scanners have the AM aircraft band available. With one of those, you can hold the radio close in front of you and, using your body as a shield, turn around; see if you can locate from which direction the noise originates. If it seems to come from all around, you may have multiple origins. (I used this method once to find a defective fence charger arcing to a single weed stem, and also discovering the charger was of an outdated design that arced internally. The owner "allowed" me to buy him a model of newer design – problem solved!) An FM radio will be of no help for this application.

The problem of bad insulators on an electric pole is a problem I experienced after buying a house in an older neighborhood. You should know that the FCC places the onus on the power company to locate and replace "leaky" insulators. They will, in fact, thank you for getting their attention because power leaks cost them money (leaks to ground is electricity they don't get paid for!). Many power companies have a single point-of-contract who will bring out some expensive equipment and quickly locate arcing insulators. They typically leak after being struck by lightning.

I hate to advertise for a business that will not compensate the NRC for a plug, but MFJ Enterprises sells equipment at a reasonable price which will allow you to locate leaky power pole insulators (and RFI sources) yourself. The most basic "detective" device is an ultrasound microphone and amplifier. This typically has a small parabolic dish on the front with the microphone mounted at the focal point. They usually have a jack (for headphones) so you can hear the arc. The device lowers the frequency so that a human can hear it. Some also have a signal strength meter. Most also have some kind of sighting mechanism (like a tube or a gun sight) because ultrasound is highly directional. Move the focal point of the dish a few inches away from the arc and you'll miss the source of the noise. Use a tripod for stabilization.

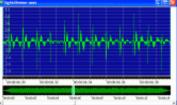

And another shameless plug: the ARRL sells a book to teach you more about hunting down RFI.

My power company came out and located nine (!) bad insulators in my 25-year-old neighborhood. The FCC will actually fine the power company if they take no action on a bad/arcing insulator report! The guy who came out gave me a few of the old insulators after he changed them out. Most of them looked like mushroom roots on the surface of the ceramic (but black) and, being carbon, once the arc finds a path to ground, it will only get worse!

I also had a 4DTV satellite receiver which, although functioning perfectly, sounded like a clock ticking every 15 kHz. Unplugging it when I wanted to use my radio fixed the problem. And a box

sold by Ten-Tec made to install on their Orion radio had to have its own power source ... using the 12V DC out jack on the back of the radio provided an S-5 noise level every 10 kHz!

P.S. – Almost forgot! There used to be a website maintained by a ham op with sound files of various RFI which were identified. I don't remember the URL. (I think you mean this one: <u>https://www.arrl.org/sounds-of-rfi</u> - DY).

Linda Brodsky, Malverne, NY

My recent 18 day stay in CO yielded a record 25 new loggings (see Domestic DX West last issue and current one) using the Airspy HF+ Discovery/ indoor Airloop combination and SDR Console V3 to make overnight top of the hour and at the half hour IQ recordings. With the bandwidth limitation of the receiver, I tried to alternate which portions of the MW band I'd focus on. The more I reviewed the recordings, the more stations I discovered. That's probably true of most recordings, but who has the time to review them over and over? The last few evenings in NY have provided some surprising receptions on my bedside Sangean PR-D5. Overnight on 3/13 and 3/15, on 1650kHz CINA in Ontario and WJFV in VA battled it out for hours. Out of nowhere, WDER 1320 Derry, NH popped up on 3/15 at 2259 with man giving ID "WDER 1320 AM & 92.1 FM" followed by "Core Christianity" which included calls from listeners. It was last noted here in 2021. Then on 3/16 at 2300 WHKY Hickory, NC 1290 came through with an ID!

I spent a little more time with the Qodosen and I've got to say that this is the first receiver I've had in the 67 years I've been DX'ing that makes me feel stupid! There are so many features that are activated/deactivated by various combinations of buttons that I just can't get comfortable with the setup, which is anything but intuitive. Since my interest is MW, I made a cheat sheet of functions that relate to that band and haven't even explored the ones for FM. Sensitivity on MW is good even without an external antenna, but so far I haven't found it to be that much better than the Crane Skywave SSB on MW, though, back in NY, I noted that it's my only receiver that picks up nearby NDB "FR" on 407kHz. Having an external antenna port is a big plus which makes it easy to try it out with a variety of antennas and the newer Crane Skywave SSB 2 has one. On the other hand, the Crane is slightly more expensive and doesn't use the chip that reportedly makes the Qodosen more sensitive. If anyone has the SSB 2, please share your experience with it.

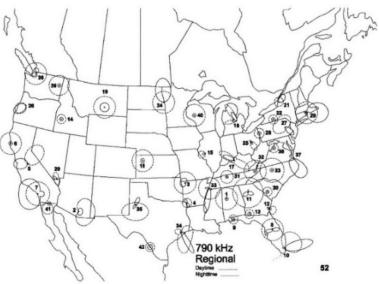

NRC Antenna Pattern Book 8th Edition

The 8th Editon of the NRC *AM Station Antenna Pattern Book* is now available. This all-new edition was prepared by Bill Hale and accompanies the 2018 (39th Edition) of the National Radio Club's *AM Radio Log*. The book comes shrink wrapped in 8½ by 11 three hole punch format for placement in your own three ring binder. The book has maps covering 530 through 1700 kHz showing day and night patterns for U.S., Canadian, and selected

Mexican and Caribbean stations.

The book is available from the National Radio Club at PO Box 473251, Aurora CO 80047-3251 and Priority Mail to addresses in the United States for \$28.95 for members and \$35.95 for nonmembers. Canadian orders are US\$44.55 and all other countries are US\$57.25, both shipped Global Priority Mail.

The Pattern book may also be ordered using Pay Pal from our website <u>http://www.nationalradioclub.org/</u> at slightly higher prices.

Anreported Domestic Stations

One station (KLHT-1040) was reported to DDXD this issue for the first time since at least Volume 67 (1999-2000), and so we have only 180 currently licensed, full-power AM stations in the United States and Canada that have not been reported yet this century. The full list was last published in Volume 90 Issue 29, although an updated version was included in the first issue of *DXtra News* for those who received it.

The National Radio Club

Founded in September 1933, the National Radio Club is a non-profit organization devoted to the medium wave DX hobby. It is operated solely by uncompensated volunteers. Subscription costs cover printing, postage, and operational costs and are subject to change without prior notice. The opinions expressed in this magazine are those of the individual writer and do not necessarily reflect those of the Publisher or the Board of Directors of the National Radio Club, Inc. Any reproduction of material contained in DX News/e-DXN without permission of the National Radio Club or the author is prohibited. All published material in DX News/e-DXN may be reprinted by the National Radio Club at a later date. DX News/e-DXN published material reprinted in other publications should include an attribution naming the author and DX News/e-DXN as the original source. Construction projects described herein may be hazardous and are to be undertaken at the assembler's risk; the NRC, its officers, and author(s) will not be responsible for any injuries or losses arising during these projects. Tool usage and electricity can be dangerous.
