Mr. Kelly Andrews  
3417 Chalfont Drive  
Richmond, Va. 23224

Dear Kelly:

Thank you very much for your letter and tape outlining your reception of WQQW.

Please consider this letter as verification of your reception of WQQW, Waterbury Connecticut on September 25, 1976 at 8:00 pm EDT. The program on the tape was the Fred Sanders Show, and since Fred is WQQW's chief engineer, we are more than happy to verify accordingly. Actually, we do verify all correct reports that we receive.

WQQW operates with a fulltime power of 5,000 watts which is fed into a directional array consisting of two 190 foot towers. Our main transmitter is a 10 kw. Continental which is run at 5 kw. We purchased the Continental used from KDKA in Pennsylvania a few years ago. We also have a Gates 1,000 watt standby.

We certainly appreciate your reception report as we do not normally reach into your area very often. Isn't it lucky how WQQW faded up out of the noise just at ID time--usually it works the other way around.

Thank you for taking the time to send the tape. Good DX.

Sincerely yours,

John Ramsey  
Assistant to the Chief Engineer
