Dear Kelly,

Due to staff changes we were unable to confirm your reception report of Feb 22, 1979. Thanks for your note. It's always interesting to get these reports, in fact, we have received one from Finland.

So, I would like to confirm your reception of our 10kw signal on Feb 19, 1979, at 1:05 am EST.

What you heard was CBC's Northern Ontario production centre in Sudbury, 45 miles east of here, which is sent to the Low Power Repeater Transmitters in Northern Ontario. Our sister station, CKNR Elliot Lake, feeds us from 7 pm til 6 am weekdays via a VHF STL. Some of the program material they send originates from the CBC net. Undoubtedly CKNR was taking the CBC sign-off and that's why you did not hear CKNS's call letters.

What could be simpler? Anyways, thanks for your letter.

Philip Landry  
Ch. Eng.

PS Canada's post office, much like yours, is suffering the pangs of inflation. Our rates are now 17¢ first class.
