Dear Kelly

The reception report of WTRR, 446-452 am EST on November 27th is varified. As you noted, we did in fact reduce power to 250w at 451 and continue the test.

We operate with two Collins xmtrs--20-V-2 Day main aux. night, and the old Collins 300-G as night main, aux. day. Therefore, we check both xmtrs at freq. time.

Equipment-wise, we use Ampro Two channel main board, tapecaster cart machines, QRK TTs and Turner mike. We have Gates Sta-Level, CBS Volumemax and Sennheiser Reverb in the audio chain. Other equipment includes Ampex, Teac, Sony and Roberts tape equipment, Shure, RCA, AKG mikes, Gates producer second studio board.

Format---WTRR is known here as "The Rock--TR-14"--we are adult Rock, APR Network News, heavy on sports and have a talk show "swap shop" each morning at nine.

Communico Broadcasting -- a partnership, is a family company which has operated WTRR since 1947---about the longest continuous operation and ownership (by a single company) in Florida.

Thanks for your letter and interest.

Cordially

Bill
