Dear Kelly:

This will verify your reception of WALG on September 26, 1978 from 6:12-6:17 PM E.D.T. Your tentative logging of WALG on February 20, 1978 was probably correct as we have a frequency measurement on the third Monday of each month from 12:15-12:30 AM. During this test we switch to day pattern and power.

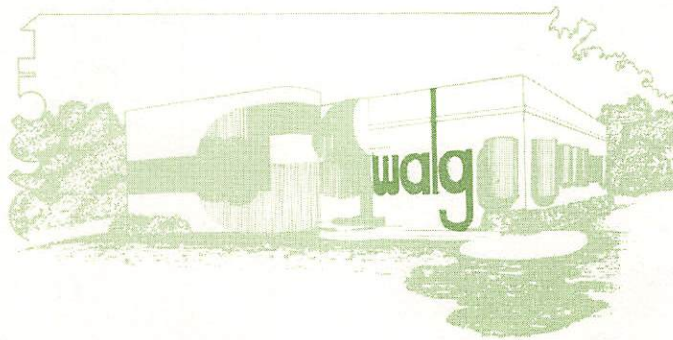

We operate with a 2 tower directional, 5 Kw. day and 1.0 Kw. night, DA-2. Collins 820-E transmitter.

Thanks for your report.

Sincerely,

Bill
