Goldsboro,N.C.

Dear Sir;

This is to verify your report of receiving our signal Jan.8,1968.
Checking against the program log of that date,the information is correct
as stated in your letter.

We operate on a frequency of 580 Kc,with a daytime power of 5000 watts
non-directional,and a night time power of 1000 watts directional,almost in a
bow tie pattern east and west.The transmitter is an RCA BTA 5-F using an
892-R in the final.

It's always good to know the signal is getting out,and with the Wilson
Station only ten Kc.away from us on frequency, you did well pulling us in.

I hope this verification will help you in your endeavors.

Respectfully Yours

John R. Dickerson
