P. O. BOX 632 QUITMAN, GEORGIA

Dec. 30, 1965

Dear Mr. Andrews:

This is to verify your reception of our station on Dec. 20, 1965. We were on the air from 01:15 to 02:15 for a frequency check. We operate full time with 250 watts from a Gates BD250GY transmitter into a series fed 150' guy supported antenna.

Our normal operating times are:
06:00 to 19:00 Mon thru Sat
07:00 to 18:00 Sun

By-the-way, I used to live just north of Levettown, Pa. and I think that WBDB is also 250 watts at night.

Yours truly,

William E. Root, Jr.
