

RADIO "... the home of the good guys."

15 December 1967

Kelly Andrews
305 South Jefferson
Goldsboro, North Carolina 27530

Dear Kelly,

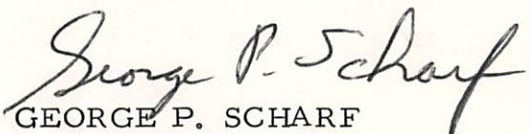

We at WKID are happy to be able to verify your reception of our frequency check on 9 December 1967. Your report will be added to the hundreds of others we have received over the years from about every state in the Union except those on the West Coast.

WKID is a 250 watt daytimer located on the east side of Urbana, home of the University of Illinois. Our equipment is mostly of Gates manufacture and our antenna is a 300' guyed stainless tower of 24" triangular cross section construction.

Our frequency deviation on the check you picked up was -2 Hertz. We are allowed plus or minus 20. Modulation was running right close to 100% on the 1,000 Hz tone. We are monitored out of Lee's Summit, Missouri, on all our checks.

We at WKID are always glad to hear from DXers, and if you are ever in the area feel free to stop by and say hello.

Sincerely,

GEORGE P. SCHARF
Chief Engineer
