March 15, 1976

Dear Kelly,

Thank you for your letter on your reception of the station on the morning of Feb. 28, 1976. Your letter was most welcomed. This letter confirms your reception of the station on that date, during a engineering test. We use a Gates Vanguard II transmitter, feeding a series tower(195 ft.) located in a marsh. Our aux. transmitter is a Gates BC-1F. We operate by remote contrl, the studio being 3 miles from the transmitter. The test was pre-recorded on equipment to give as much compression as possible.

I hope that the verification of your reception of WKFD's test that I ran has reached you, if not let me know. Good luck, and best DX.

Sincerely,

Eugene R. Faltus
Eugene R. Faltus
