Kelley Andrews
819 Tipperary Drive
Greensboro, N.C.
27406

Dear Mr. Andrews;

This letter is in reference to your request for verification of reception of radio station WBMD. After noting the time and the quote of the I.D., I have found them to be in accordance with the maintenance logs on February 16, 1976. Hence, I have considered your information valid.

WBMD tests it's auxillary transmitter on a weekly basis, usually on Monday mornings. It was this test that you tuned in on at 0251 EST. Programing for WBMD consists of religion in the morning hours, followed by country-western music up to our sign-off at sunset.

For your information-
rf power- 1000 watts nondirectional
tower height- 304'
transmitters- CCA 1000D (main) RCA PTR-1R1 (aux)
location of tower, transmitters and studios-
North Lat. 39° 19' 26" West Long. 76° 32' 56"

Thank you for your interest in WBMD, and continued good listening.

Yours sincerely,

Scott Brenner
Chief Engineer WBMD/WKTK
