

16AM WETT

October 26, 1978

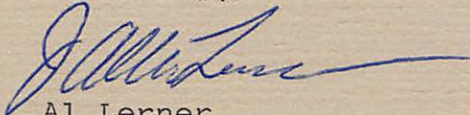

Mr. Kelly Andrews
7016 Montauk Drive
Richmond, Virginia 23225

Dear Kelly:

Many thanks for your note of October 14th on our reception. Your verification was exactly right. Since May we have been operating under Single Tower Authorization - 500 watts non-directional during the day and 250 watts non-directional at night. We normally operate directional east-west which is why you heard us in Richmond. Right now we are moving from one transmitter site to another which accounts for reception from points that we would normally not reach.

Thanks for you letter and keep listening! By the way, John Bridgeman is no longer the Chief Engineer.

Sincerely,

Al Lerner
Chief Engineer
