Dear Kelly,

Please consider this a letter of confirmation of your reception of WFRB on November 7th of this year.

I am enclosing one of our coverage maps as requested. We use Gates transmitters for the AM side and Collins for the FM. We are unique in that we have duplicates from control room to transmitters. Our down time is negligible; a matter of 30 seconds to 2 minutes. Antenna height 343 feet with FM units side mounted at top.

Sincerely,

Bob Kerr, Program Director
