JACKSONVILLE, NC

KELLY ANDREWS
305 S. JEFFERSON
GOLDSBORO, N. C.

DEAR KELLY:

We are happy to verify the accuracy of your reception report of WJNC TEST transmissions on JULY 10, '67 at 4:00 PM EDT. Your report is authentic in that it accurately corresponds with our transmitter log for that period.

We are always pleased to hear from dxers and are happy to QSL.

WJNC does much testing in the experimental period after midnight and transmits for a frequency measurement on the first Monday morning of each month at 12:40 a.m. est.

We operate on 1240 kilocycles, non-directional, with a daytime power of 1000 watts and night time power of 250 watts. It is a full-time station as licensed, but operates only from 6:00 a.m. to 12:10 a.m. est. WJNC is located in Onslow County about 20 miles from the Atlantic Ocean and serves a population of about 150,000, many of whom are Marines and dependents at the World's largest Amphibious training base, Camp Lejeune.

Should you ever visit this area, you are cordially invited to visit our radio facility. Meantime, accept my appreciation for your report and happy dxing.

We are happy to verify the accuracy of your report of your visit to our plant on July 1, 1954. Your report is authentic in that it accurately corresponds with our records for that period.

It is always pleasant to hear from others who are happy to visit our plant. We are glad that you had a most enjoyable and profitable visit to our plant on the 1st of July.

The plant is located on the west side of the city, about 10 miles from the center. It is a large plant with a capacity of 1,000,000 units per year. The plant is a modern one with all the latest equipment. We are glad to have you visit and see the plant.

Should you ever visit this area, you are cordially invited to visit our radio facility. We have a most excellent facility for your report and many other things.

James A. Harrington
Chief Engineer
