July 18, 1979

Dear Kelly:

I apologize that someone felt like they couldn't spare the time to drop you a DX verification from 1965.

We don't keep log records that old Kelly, and would have a difficult time verifying the QSL, however, a skeleton proof of performance would have been required August 1, 1965, or rather due by then, so I can say with a certain amount of confidence that what you did hear was in fact WZKY. That funny phonetic sounds like some of the crazy people around here. Anyway, the proof would more than likely have been accomplished in July of that year.

We have another proof scheduled, Kelly, by August 1 this year. While Richmond is a good clip away, you might get lucky and catch us again with .25KW at 1580KHZ. To help zero in a little bit, you will hear another station right on our Freak called WCKY in the Kentucky mountains somewhere I believe. We are a daytimer, and, of course you won't catch it until after midnight. I would guess that would be a good time to try for the engineer wouldn't want to hang around any later than necessary.

Sincerely,

Dick Boekeloo
