Kelly Andrews  
Greensboro, N.C.

Dear Kelly:

I am happy to verify your report of our test on December 8. The test was conducted using an RCA BTA-1MX xmtr and a 200 foot NON-D antenna.

Other stations reported on during the test are: KRKO, WBNX, WTOB (testing with tone until around 3:20 AM), WLCY, WAOK and a few more.

I've gotten a lot of reports mentioning WTOB being on and IDing around 3:02 AM so it's a positive. This must be where the continuous tone you heard came from as I used only the CW IDs that had any tone at all.
