Mr. Kelly Andrews,
305 S. Jefferson Street,
Goldsboro, N.C. 27530.

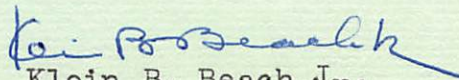

Dear Mr. Andrews:

This is to verify your reception of WALD on 1060 kc on January 12, 1967. Reception to the north of Walterboro must have been unusual on Jan 12 as we have had several reports from Maryland and Virginia on this date.

This station changed frequency from 1220kv to 1060kc last year for better local coverage. We continue with 1000 watts but hope to apply this spring for 5000watts.

Thank you for your report!

Sincerely,

Klein B. Beach, Jr.
WALD.
