Mr. Kelly Andrews
305 South Jefferson Street
Goldsboro, North Carolina

Dear Mr. Andrews:

We received your recent letter and are very glad to learn that you watch Channel 7.

WITN-TV has 316 watts E.R.P. with a General Electric antenna 12 to 1 gain on a 1523 foot tower driven by 50 KW General Electric transmitter which is located at Grifton, North Carolina. Our studios are located in Washington, North Carolina. The signal is microwaved from the transmitter to the studios which is about twenty miles.

In our studios we have two live cameras - one being equipped with a 15 inch Zoomar lens. We have a film and one slide camera, both being vidicons. We also have a special effects generator. We have one Ampex video tape recorder and RCA's latest mobile van with live cameras and video tape and microwave.

Enclosed please find our coverage map.

Cordially,

W I T N - T V

Harvey Mason
Vice President - Engineering
