Mr. Kelly Andrews
305 S. Jefferson Street
Goldsboro, North Carolina 27530

Dear Mr. Andrews:

This will acknowledge your report of WEAM on August 14, 1966.
We operate 24 hours a day with two directional patterns. Our trans-
mitter is a 5000 watt Gates BC 5E, and we employ the use of four
towers in line on an azimuth of 108°. This gives us an ERP directly
east of 28000 watts.

Thank you for your interest. We hope you will become a steady listener
of WEAM, The Lively One.

Cordially,

Edwin R. Buterbaugh
Chief Engineer
