Dear Kelly:

First, let me apologize for being a bit tardy in answering your letter. And secondly, let me say, it's sure good to hear from the ole home town of Goldsboro. I didn't realize that you could possibly pick us up here in Alexandria but you sure have. I'm happy to verify the ~~the~~ details of our programming that you sent to me and logged in Goldsboro. They check out exactly with what we broadcast at that time. The only difference being is that we are on Daylight Time here and it all took place beginning at 6:00 am our time.

I don't ever recall meeting you, Kelly, but perhaps we did run across each other at some time in Goldsboro. Around WGBR there were quite a few "ham" operators that came and went and I'm sure we have some mutual acquaintances.

I might mention something of interest to you. WPIK is 1 kw non-directional at the moment. Sometime in the near future the station is going to increase its power to 5 kw and will go on a directional pattern. I don't know if this will affect your reception but it might.

Thanks again for your letter. If there is any other information I can furnish you, please let me know at anytime.

Best Wishes to you,

Carl
