about DX date
Oct. 12, 1949

Dear Sir:

We are very sorry for the seeming delay in getting your DX reception answered. At the time of your reception I sent you one of the cards that we were using for all DX'ers and I may have gotten the wrong address on yours as well as some of the others, and then its possible that the card was lost one the up there. Anyway, we are glad that you are one of the determined ones and have written to us again. The time and program you were monitoring us checks all right and so we are glad to send you this verification even though it is nearly a year to the day.

as to the time and period of operations at night we are a day-timer so we close at sunset. We are checked and monitored by an engineer in Birmingham and he can check us when we are on the air so we have no Frequency check period. We are on the air from time to time to check the equipment but there is no set time. We hope that you receive this letter of verification and add us to your list of DX recptions.

Yours Very truly,

William G. Mitchell
Chief Engineer WJMW

P S I COLLECT STAMPS SO ILL KEEP YOURS. IT'S NEW
TO ME. THANKS BILL
