Dear Ernest,

Very glad to verify your report of reception of KOPO at 1:35 AM (MST) on Sunday Oct. 26. I was the engineer on duty at the time of the frequency check and your report is now verified.

We use Raytheon equipment in our station throughout, except for one RCA line amplifier. Our tower is 205' in height - self supporting and series fed.

I run our frequency check every month, the last Sunday morning of each month from 1:20 - 1:35 AM (MST). So perhaps you'll be able to hear us again.

Many thanks again for your nice letter and reception report. I'm sending a coverage map of KOPO.

Sincerely
Howard Smith assist. *ck.*
