Mr. Ernest R. Cooper
438 East 21st Street
Brooklyn 26, N. Y.

Dear Mr. Cooper:

This letter will confirm and verify reception by you
of KGST on December 19, 1949.

As regards to the tone modulation on 1600 Kc, it is
very peculiar indeed. 9 members of the NRC reported
hearing this condition at the time of the test. I
have written to the FCC and WVOM regarding this but
no definite solution has been found.

Thank you very much for your letter.

Sincerely,

Peter K. Onnigian,
Technical Director
