Mr Earnest R Cooper
National Radio Club
438 East 21st Street
Brooklyn 26, New York

Dear Sir,

This will acknowledge your letter of 19 October 1958. Am very sorry that there has been such a long delay in answering.

Was very pleased as well as surprised to have received such a report from the Long Island-New York Area. The reason being that our transmitter runs only at 500 watts after sundown and at the same time is directional in a South-easterly direction.

The long Island Station does come thro down in this area and is noticeable to the area listeners between 6-8 AM and right before sundown.

Very sorry about the WINX coverage maps but none are available at this time.

Again thanks for the report. Your listening report was correct.

Sincerely Yours

John E Edwards
Chief Engineer

WINX-1600
