Dear Sir,

First of all our congratulations on your first reception of our radio station "Linz" on 1394 kilocycles.

A programme of the 22 Nov. is enclosed, so that you can compare it with your observations.

Now some technical datas which may be of interest for you:

The Linz transmitter is placed 372 m above the Mediterranean. There are 15 KW aerial efficiency, $f = 1394 \text{ kc} = 215,2 \text{ m}$, grid voltage modulation. A vertical iron mast 120 m high, is used as antenna.

Once more many thanks for your report. We should appreciate to hear from you again about the reception of our transmitter.

With good wishes and kind regards

Yours very faithfully
