Dear Mr. Cooper:-

Thank-you very much, indeed, for your second report of reception referring to our frequency 1586 kc/s. We are glad that you have had a good transmission; although some fadings injured reception.

We are also interested in your statements about your receiver, and believe that the technically favourable antenna was the main point which gave you the possibility to hear other German stations, too.

Enclosed please find a complete list, containing the European long- and medium- wave stations (incl. the German ones) which certainly will help you in searching for stations, furthermore.

Hoping to hear from you again, we are, dear Sir,

Yours very truly,

NORDWESTDEUTSCHER RUNDFUNK
 Technische Hörerpost
