DEAR ERNEST,

Sorry for the delay in responding to your report. I have been "covered" up building new studios for the new FM we just bought out. W M F Q Ocala at 92.9. Its widely reported in the VUD. Hopefully, we take over April 1 with a "light AC" format.

Now that you have "veried" WAMR & WCTQ, you need WTRS, WYGC and now WMFQ. You could be the "First" dx'er to log and verify ALL of the Asterisk Stations !!!

I noticed in DXM that you were able to "verie" W M D H in New Castle, Indiana. I used to work there when it was WCTW. I bet if you have an old verie from WCTW it might just have my name on it.

While searching for some new logo material for W T R S I came across some older W C T W stickers along with some original W M D H STUFF.

I have also included some technical infor on W A M R. Hope you enjoy it.
