438 E 21st Street
Brooklyn 26, N. Y.

Dear DX'er:

I checked back on our records as of Feb. 21, 1951 and will be very glad to verify your reception. Also in checking our records I found that a verification card was sent to you, Cant understand why it wasn't received. I'm enclosing a card in this letter.

Now to answer your questions, Jacksonville Beach is located on the Alt. Beach and has a pop. of about 20,000. Our signal is very strong south down the coast fo about 125 miles. North we have steady listeners in N.C. West about 60 miles. East the Alt. ocean.

I would like to go on the record that if you know of any other DX'ers who have written for a verification and have not received it. please inform then to drop me a line and I'll shoot them a card.

Your's for better DXing,
