

February 2, 1978

Dear Ernie:

Thanks for your report of reception of my DX test from WKEM-1490. I can positively verify that you received our CW Ids at 4:32, 4:36:15, and 4:48:05. I am suprized that you where not able to hear the music or my voice during the test; as the CW Ids where about 3 db lower than the rest of the program. I also received a letter from Bob Selleck in Conn., and he was able to hear music as well as CW Ids, and my voice Ids. Oh, well, thats MW conditions for you.

At 4:33 am I played a Goldman Band selection for you as you requested; Washington Post March. I was running the transmitter at 768 watts which is our actual day power. The transmitter is a RCA BTA-1R, and we use an antenna which is a 140' steel guyed tower.

In closing, I enjoyed doing the test, and especially appreciate receiving your correct report. Untill I appear in DX News musings again,

73's & Losta DX
