VIDALIA BROADCASTING COMPANY

Dear Mr. Cooper.

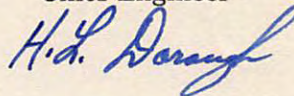

Thanks for your report on reception of WVOP during our monthly frequency check
And Test Nov. 22, 1951 at 1:00 till 6:00 AM. EST

Confirmation is hereby given, that WVOP was testing on the above date and time,
for frequency measurement.

Thanks again for your report and best of luck at your hobby.

73's

H. L. Dorough
Chief Engineer

Frequency: 1450 Kc.
Power: 250 Watts Fulltime
Transmitter: Gates 250-C-1
Antenna: $\frac{1}{4}$ wavelength, windcharger 154 ft.

Tnx. for Report.

We changed Call letters over two years ago. Vidalia has a population of about 7,000. Our coverage is about 60-75 miles by day and about 15 at night. We recently had a report from New Zealand during a test, of good reception. Our regular check is the second Tuesday in each month 1:25 to 1:35. We check with Van Nostrand in Atlanta. Thanks again and good luck.
