AMES, IOWA

Dear Mr. Cooper:

Thanks for your report on our test program of Nov. 27th, 1948. Your report checks with our log.

We are putting out a lot of skip waves it seems. We have received reports from about 30 States. Our ground wave coverage is real good also, for our power and our frequency. We operate with 1000 watts and 1430 kc. from a 200 ft. Winch-arger tower.

We don't have a definite date set for our regular freq. check as yet.

Very truly yours,

WO SFP HAM CALL *Chief Engr. Royle D. DeLoe*
