Dear Mr Cooper,

Yes, you're right that was KBIO pounding out it's weekly freq' check the other morning.

It so happens that we have our chief engineer up at the Montana station KAVR, which we hope to have on the air not a bit later than next Sunday, that I will try and answer your report.

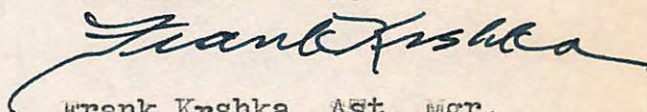

For all information, from the engineer on at that time of morning during the check, you hear KBIO.

KBIO is a 250 Western Electric rig, on the air since August 4th. We use American Broadcasting Company programs and are on the air from 6:30 AM to 11:00PM MST.

We hope you will be able to hear us again and perhaps some day can rig up a DX program in the wee hours of the morning for you fellows.

I think, we worked something like that for you, at KWRC in Pendleton, Oregon when I was there.

Sincerely yours,

Frank Krshka Ast, Mgr.
