

November 13, 1995

Ernest Cooper
5 Anthony Street
Provincetown, Mass. 02657

Dear Mr. Cooper,

Congratulations on your reception of WSEZ on Monday morning, November 6, 1995. From what I have been able to understand, WSEZ is a rare find, thanks in part to WQEW. Luckily, they were off the air long enough for you to catch our Morse Code ID.

Normally, WSEZ is a 250 watt, daytime only station. However, for the test the Harris MW1 transmitter was at 1,000 watts. Enclosed, please find a coverage map of Southern Indiana.

Thanks again for your letter, and I am looking forward to the test next year.

Sincerely,

A handwritten signature in blue ink that reads "Todd Edwards".

Todd Edwards
Chief Engineer, WUME/WSEZ

WSEZ
