—560 KILOCYCLES—“The Miracle Frequency”

—500 WATTS—“The Little Station With A Big Wallop”

THE TRI-STATE BROADCASTING COMPANY, INC., MIDDLESBORO, KENTUCKY, PHONE NO. 1520

Feb 17, 1950
Middlesboro, Ky.

Mr Ernest R. Cooper
438 E. 21st St.
Brooklyn 26, N.Y.

Dear Sir:

Received your letter today telling us of your reception of our station WCPM
May I assure you we certainly were please to hear from you.

May I say at this time that the information you gave us pertaining to the
music and announcing was correct.

For the announcing, I will have take credit for it. I'm sure this will explain
the reason it was informal & chatty, I'am strictly an engineer & no announcer
For the Hum you heard when using mike, was the hum from the transmitter
(fans & ect.) WE made the check from the transmitter shack.

We make frequency check every 2nd Sunday morning 4:15 To 4:30 AM E.S.T.
but we were late the last time (5:00 ~~5:30~~)

WE will ~~likely~~ likely sign on at 4:00 next time.

WE sign on for our days broadcast at 5:30 to 6:15 EST

I hope You will ~~accept~~ accept this as a "VERIFIED" statement in reference
to your reception of our station

Please write us at any time we will certainly be glad to hear from you.
Mr Claude Gray of Birmingham Ala. makes our measurements for us.

Your Truly
Edwin P. Healy
Edwin P. Healy Engineer

P.S. Our Chief Engineer is Mr. John D. Caylor

*you can see my typing is like my
announcing. very bad*
