

December 16th, 1938

Dear OM:-

Your card bears out OK on our frequency check of December 13th, Thanks. KALB was operating on 250 Watts on a wave of 1210 k/c.

Your letter was very interesting. Wish I could be at Times Square on New Years or Broad and Market, Phila. How is everything in Red Hook? Used to drydock the C/S Boston at Erie Basin. Spent 12 years at sea, just left the Boston in April.

Wishing you also a very Merry Xmas and a Happy New Years, I am,

Sincerely yours,

T. L. Stanley, C. E.
