SOUTH SEA AVENUE

WEST YARMOUTH, CAPE COD, MASS. 02673

Dear Ernie Cooper:

This is to confirm your reception report of WOCE AM on our special experimental test March 6, 1972, between 12:15 a.m. and 1:45 a.m. at a power of 1000 watts.

WOCE AM uses an RCA STAIR transmitter working into an AM tower 300 feet tall and 400 feet from our main studios.

The test consisted of a continuous cartridge interrupted with live announcements. The tone was an NAB test tone record at 1000 cps put on a turntable and allowed to slowly decrease in speed with a bit of reverb added. An Eric Morse code oscillator was used.

Thank you.

Burt Fisher
