RADIO STATION  
**W S A L**  
SALISBURY, MD.

250 WATTS  
1200 KILOCYCLES  
DAYLIGHT ONLY

December 1, 1937

Dear Mr. Cooper:

Thanks for your report of Nov. 21. Please excuse the delay in getting off this verie to you but I have been quite busy. Your report is correct and quite gratifying. Therefore, you may accept this letter as confirming your reception.

We use a 250 watt transmitter that shunt feeds a vertical radiator by means of a coaxial cable. Our speech and monitoring equipment includes the latest from W. E., RCA and G. R. We will continue to conduct tests occasionally and should you hear us we would be glad to hear your report of reception.

If you are ever in this vicinity please drop in and see the station.

Thanks again-

Truly yours,  
*Robert Swartwout*
