

WSER INC.

BOX 38, ELKTON, MARYLAND 21921

301-398-3883 302-737-2205

Sept. 8, 1970

Mr. Ernie Cooper
438 East 21st Street
Brooklyn, N.Y. 11226

Dear Ernie:

We are very sorry for the delay in answering your letter of February 22, 1970, and I hope that you will except our apology. Since then, our then Tech. Director was moved into General Manager and has not had anyone to help him with the work on the equipment at the station. So, this is my first day on the job and I am answering the reports that have piled up.

To make it offical, this letter verify's your reception of radio station WSER-1550 KHZ on February 22, 1970 from 1:22 AM til 1:30 AM EST. We are running a Collins Transmitter, Type 20V-2 into a 3 tower system, beamed mostly due Northwesterly.

Again, we are sorry for the delay in answering your report and hope this letter will due. If you are in the area, please feel free to drop by the station. Also, if we are on with a test in the near future, and you happen to catch us, please drop us a note and let us know how well we were hitting your S meter.

73"s and Best DX,

Dave Schmidt
Tech. Director

PS: I thought this would be better than the prepared card-hi!

WSER ~ 1550
ELKTON, MARYLAND

Dear Mr. Cooper:

This card will verify your reception of Radio Station WSER, Elkton, Maryland, on Sunday, February 22nd, 1970, from 1:22 to 1:31 a.m. E.S.T. WSER operates with a power of 1,000 watts, directionalized. Thank you for your correct report.
