SKOWHEGAN, ME - 1160 kc/s

This is to confirm your reception report of november 20, 1980

~~WQMR~~ WQMR was WS-W last year. We went through a change in ownership and call sign change. We are still 5th w daytime with a 56 watt PSA, Definitely a challenge to receive us during psa operation, I have done it with standard AM car radio 40 miles from the transmitter site .

We have no WQMR coverage maps , But we do have one for WTOS FM.

At this point in time we do very little after hours testing due to my very buzy schedule
