Dear Ernie;

Sorry for not getting back to you as soon as I should have. We have been having some bad weather here that has been setting my engineering schedule back in many areas. I have been working about 12 hours just to get caught up.

Enclosed is a verification for the 03/20/84 test of WHND, and some additional information on WHND. You caught our test in the nick of time. I doubt that I will be running anymore tests, due to poor response and lack of help.

Since the odds were againsts you in hearing us thru the east coast pests, I thought that a "pat on the back" was in order for a job well done. With all the 560 action on the east coast, you were the last person that I would suspect to hear us! If I were Jimmy the Greek I would have placed the odds at 1 to 100. Good Catch! Enclosed is our engineering departments "Pat" on the back T-shirt for the catch. I hope that if you put it on when you go to WOMR they don't mind, (hi).

Sometime in the future I would like to send you a cassette to get an aircheck of your radio program on WOMR. Would it be ok with you for me to send one or two?

Keep in touch. Hope to hear from you.
