John A. Harlow
Chief Engineer
KYMN Northfield

Mr. Ernest R. Cooper
438 East 21st Street
Carrier Route #56
Brooklyn N.Y.

Mr. Cooper:

I am pleased to verify your Reception Report of KYMN,
dated October 16th, 1972.

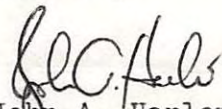

As expected, WTIC gave almost every reporting DXer a lot
of interference. I'm glad most were able to pull us through!
Several tapes have been received, and I see what you mean
about WTIC being down-tempo. They are much like semi-local
WCCO which I'm sure you've heard.

It was a real pleasure to help out the I.R.C.A. and the
N.R.C. while conducting our stations proof of performance
test. (we passed) I realize not many stations bother to
give the serious hobby of DXing any thought.

Enclosed, find a KYMN coverage map.....we're glad to be #60.

Thanks, Ernie, and

Good DX,

John A. Harlow
Chief Engineer
