Ernest R. Cooper  
5 Anthony Street  
Provincetown Mass., 02657

Dear Ernest,

I have checked the times you recorded against a tape we made of the broadcast and our logs and do feel you heard us. We were breaking the tone quite often as your report indicates and the times correspond. Our test tone is also a bit under 1000 Hz as your report stated.

So, this will confirm your reception of Radio Station KUKU, Willow Springs, Missouri, on the frequency of 1330 KHz, between 1:33 and 1:54 AM, Central Standard Time, February 26, 1979.

Our transmitter is a Gates, BC-1J, operated at 1000 watts, into a 110 foot, series excited vertical tower, with ground system consisting of 120 buried copper wire radials 185 feet in length.

Thank you for your interesting and informative report and best wishes for continued enjoyment of your fine hobby. Thanks again for listening to and writing us.

Sincerely,

*Lou Wehmer*

Lou Wehmer, Engineer
