Dear Ernest,

Thank you for your very interesting letter and this confirms your reception of our station on July 20th. I certainly envy you with that receiver that should be the very last thing in radio. I am very interested in making some further test and think you have a very fine idea. I shall keep your letter close at hand and as you suggested will contact you in a month or so. Our sign on during week days is 6 and on Sunday is 7. Right at the present we are thinking of conducting a short test program about once a week for the benefit of our DX friends. I will drop you a card as to time. Thank you for you report.

Sincerely,

John H. Thomas
